**SCHOOL OF
NURSING SCIENCE
AND RESEARCH**

Organizes

1st International Conference on

**INNOVATIVE APPROACHES IN
NURSING, CLINICAL PRACTICE,
EDUCATION AND RESEARCH**

6th July - 10th July 2020 | Google meet

In more and more nursing programs, students work in groups solving problems, analyzing cases, and discussing higher-level questions about nursing. Technology also exposes students to clinical scenarios they would not encounter in their practice and helps to bridge the gap between theory and practice. With technology, we can add reality to a scenario and make traditional case studies more realistic.

About the Conference

Innovation is central to maintain and improving quality of care. Worldwide nurses are engaged in unique activities on a daily basis to improve patient care outcome and to reduce cost to health care system. Since future nurses will work with technology, the correct and effective use of technological tools, and the integration of innovation into education and practice should take place in today's education system.

It is important for nurses to understand the major health challenges faced by people throughout the world. Nurses must be prepared to practice as competent healthcare professionals in a highly complex, diverse, and ever-changing environment.

Objectives

- Enlighten about innovative practices and views in Clinical Nursing Research.
- Enhance knowledge about innovative practices in nursing education.
- Empower quality assessment in current nursing education era.
- Outline the application of statistics in nursing research.
- Acquaint participants towards collaborative decision making.
