ABOUT US

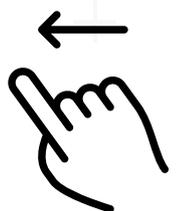

Welcome to the Google Developer Student Club (GDSC)!

We are a community of students who are passionate about technology and eager to learn and grow as developers. Our goal is to provide resources and opportunities for students to develop their skills in technology and to build projects using Google's technologies.

Our mission is to create a supportive and inclusive environment where students can collaborate, learn from each other, and achieve their goals in the tech industry. We believe that with the right resources, support, and opportunities, students can become successful developers and make a real impact on society.

Through our events, workshops, and other initiatives, we aim to provide students with the knowledge and skills they need to succeed as developers. We also offer opportunities for students to network with industry professionals, build projects and showcase their work.

We encourage our core team members to take an active role in the club, and we provide opportunities for them to lead and organize events, workshops and other initiatives. We believe that this will help our core team members to develop leadership skills and provide them with valuable experience in organizing and running events. **Let's learn, build, and change the world together!**

Message from the Dean Academics and Dean of SSET

The goal of school, guided by the Sharda University vision, is to provide transformational education that produces a skilled workforce of professionals including researchers and innovators of tomorrow with intellectual and technological resources. Our commitment and dedication is to focus on experiential, cooperative and project-based learning that allows our students to continue to adopt, grow and succeed in solving real-world problems.

The school provides funding to innovative ideas of the students to develop, products, patents and startups. The school is collaborated with IIA, IEA, Greater Noida Authority and other Industries to ensure benchmarking of programs and activities. The school thrives to establish a partnership with industries, government organizations, & academia and become a collaborative community of faculties, students, staff and alumni to fulfil societal needs with professional ethics. The philosophy of the school is:

"By the Students, For the Students, and With the Students"

Prof. (Dr.) Parma Nand

Dean Academics
and Dean SSET

Message from the Head Of Department, Computer Science and Engineering, SSET

Computer Science & Engineering is one of the most vibrant department of Sharda University with varieties of specialized programs in Artificial Intelligence & Machine Learning, Cyber Security, Internet of Things, Data Science and Business Intelligence. To have holistic development of students of distinct programs of computer science and to grow the innovative culture among the students, Students Activity Club are functional.

These Club are headed by the team of students and they are performing in different dimensions of technology under the guidance of specialized faculty members. Several national and international students are contributing to develop themselves and other peers to excel among the multidisciplinary aspects. The club activities strengthens placements, startups, national/international competitions and research outcomes. We are proud to have high aimed and energetic students clubs performing exceptionally well since last three years.

"Best Wishes to All my Dear Students! "

Message from the Faculty Advisor GDSC Sharda University

As the faculty advisor for the Google Developer Student Club, I am so proud to see the level of passion and dedication that you all have for technology and innovation. Your involvement in the club and your desire to learn more about the latest developments in the field is truly inspiring.

As a community, you have the opportunity to work on projects, attend workshops, and participate in events that will help you develop your skills and knowledge in various areas of Google technologies.

I highly encourage you to take advantage of these opportunities and to continue to push the boundaries of what is possible.

In addition, I also want to remind you that as members of the club, you have access to a wide range of resources, including Core team members, community support, and co-op opportunities. Make use of these resources to help you achieve your goals and to excel in your studies. I look forward to seeing all of the amazing things that you will achieve in the future.

CODE HACK

Coding Competition

About

It doesn't hurt to challenge yourself once in a while, and as a programmer, a competitive setting and limited time seem to be the perfect recipe for doing so. GDSC Sharda University organized one such hackathon that presented an opportunity for participants to exercise their problem-solving skills. It was a two-round event. Each round consisted of three questions sorted in increasing difficulty. The best part was seeing how motivated everyone was while tackling the challenge and making their way through it.

Facilitator

Naitik Rathore is a 3rd year B. Tech student in Computer Science and Engineering. He is a GDSC core team member and tech lead for competitive programming. In 2nd year, he set on a journey to explore the field of competitive programming, not knowing what the path had in store for him. While today, he is helping numerous others. Dedication, blended with consistency, has got him this far. He wishes to help the community with whatever he can. His expertise is in C++.

ML Study

ABOUT

— X

"MACHINE LEARNING". It might be a buzzword, but not JUST a buzzword. Most of us agree that the field is engrossing. Don't we? Now it's time for the biggest question, "What is Machine Learning?". Is it magic? Maybe it is, but using computers. GDSC Sharda University conducted a study jam teaching participants how to make their magic ML models. We mean ML study jam. Starting with an introductory session, study jam continued for four weeks, having classes taking place every Saturday.

FACILITATOR

Rohit Chandra Joshi, a 3rd year B. Tech Computer Science (AI & ML) student, is a core member of the GDSC team and tech lead for Machine Learning. Rohit is a multi-skilled individual with expertise in Java, Python, C, Android, and web development. His passion for machine learning is evident in his skills and he's always willing to share his knowledge and assist others. A true tech-savvy and dedicated learner who is constantly pushing the boundaries of what's possible.

Google Cloud Career Practitioner Campaign

About

Google Cloud Career Practitioner Program is a great beginner-friendly opportunity to learn cloud technologies and their application with Google's very own curated learning paths and hands-on labs. The entire campaign is focused to Learn, Build, Certify and become Industry Ready.

Facilitator of the program

Aakash Nakarmi

- Google Cloud Certified Cloud Digital Leader
- Tech Lead for Cloud Computing at GDSC Sharda University
- Facilitator of the Google Cloud Ready Facilitator Program, 2022 in which he along with his co-facilitators facilitated more than 1400+ students from more than 10 colleges around India

Feedback

Somya Namdeo

I'm grateful to Sharda University, Harshit, and Aakash for their support in the GCCP program. Despite not being a student, GDSC Sharda allowed me to participate, and I learned a lot from the practical cloud computing labs. Thank you all for the opportunity.

Feedback

Sumit Kumar

The campaign was indeed wonderful. I learned how Google Cloud Works by gaining experience from Hands-On labs. Thank you, Google, Qwiklabs, and Sharda University Facilitator Mr. Aakash and Lead Mr. Harshit for Helping and Supporting throughout the event.

WEB CAMPAIGN

</> About </>

Web development campaign was a fantastic event organised to cultivate and promote web development skills and ignite interest in students in the field of web development. This campaign consisted of a series of workshops and seminars led by esteemed web development lead of GDSC assisting enthusiastic learners to master the art of creating dynamic, visually attractive and responsive websites. It also taught them various languages used in the sector of web dev consisting of HTML, CSS and Javascript.

Compose Camp

ABOUT

The Compose Camp was an interactive and engaging series of training sessions organized by GDSC Sharda University. The goal was to inculcate knowledge about Jetpack Compose, a new UI toolkit for Android. The series was four sessions long and took place over three weeks. Tutorials came to an end with a test session as an inessential enhancement. The students took part with zeal and got familiar with the concepts of the toolkit.

ML Study Jam 2.0

ABOUT

Machine learning is like giving superpowers to computers! Machine learning algorithms are like magical spells that turn raw data into valuable insights, helping us solve complex problems and unlock new possibilities. It's like having a personal assistant that can analyse mountains of data faster than a superhero, all without needing explicit instructions. GDSC Sharda University conducted a study jam teaching participants how to make their magic models. We mean ML study jam. Starting with an introductory session, study jam continued for six days on the various concepts related to machine learning.

COMPOSE CAMP

Flutter Forward Extended

About

Flutter is Google's UI toolkit that helps developers build apps for multiple platforms using a single codebase. Flutter Forward is a community-led event series where developers can join to learn the fundamentals of Google technologies. - featuring Flutter and Firebase. Flutter Forward extended was a 6 session Flutter workshop series to create high-quality native interfaces for iOS and android quickly. The students who participated learned a lot to work with existing code, use Google's portable UI kit. It also focused on developing basic Flutter apps with firebase integration and is suitable for developers of all skill levels.

About

A global competition empowering students to tackle the 17 Sustainable Development Goals using technology and innovation for a chance to win prizes and drive positive change.

Solution Challenge

In line with these global objectives, the Solution Challenge encourages participants to leverage Google technology to develop innovative solutions that address pressing social and environmental issues. By aligning their projects with the SDGs, students have the opportunity to make a meaningful impact and contribute towards a more sustainable future.

Through this initiative, the Solution Challenge empowers students to utilize their technical skills, creativity, and knowledge to tackle real-world problems, fostering a spirit of innovation and social responsibility. By connecting Google technology with the SDGs, the challenge promotes the use of technology for positive change and supports the global efforts towards achieving a more sustainable world.

CROWDSOURCE COMMUNITY LEARNING PROGRAM

ABOUT

We have backed up for anyone who may want to contribute towards technology but is new to this or perhaps does not want to be overwhelmed. Wondering how? Come with us and let us introduce you to the Crowdsourcing Learning Community Program. It was a three-month-long learning program under which students contributed through web and mobile applications in fun ways. Having been joined by a prolific speaker and countless participants, this event did justice to its name, "CROWDSOURCE".

CROWDSOURCE AT DEVFEST NOIDA

Ujjwal and Sushant, Crowdsourcing Influencers of the campus, represented Crowdsourcing at Devfest Noida. They educated the audience about the lack of data from Asian countries and how Crowdsourcing is helping to solve this problem. They organized 5 different activities to engage and inform participants about Google Crowdsourcing and provided exclusive Crowdsourcing goodies to the winners of each round. They successfully gathered around 300+ people in the Crowdsourcing community and had 100+ people register to contribute and become a part of the Crowdsourcing family. At the end of the event, all participants received Crowdsourcing goodies. Additionally, Google Crowdsourcing was a community partner for DevFest Noida.

TEAM AT A GLANCE

Google Developer Student Clubs Sharda University

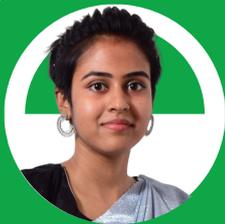

I learned technologies like ML, Web and Google Cloud from different events conducted by GDSC SU. This Club and Community helped me to understand the importance and power of community. With the learning from GDSC Sharda University, I finally became Microsoft Learn Student Ambassador at my Campus. Thank you Harshit and GDSC Team.

Pavan Satya Sai 4th year

Joining GDSC as a club member is one of the best decisions I made in my first year of College. I didn't expect that this will help me to grow so much!! The workshops and events helped me explore different technological domains.

Ayaz 1st year

"GDSC Sharda University positively influenced my development as a graphic designer by enhancing my leadership skills and soft skills. Through hands-on projects, I refined my design expertise while taking on leadership roles. Engaging with the community improved my communication, teamwork, and interpersonal abilities."

Ananya Biswas 1st year

Being a part of GDSC has been an incredible journey, enhancing my creativity, design skills, and keeping me updated with technologies like Flutter. Effective communication and leadership qualities were instilled in me, and leading the team under Harshit's guidance has been amazing. Grateful for the opportunities and growth within GDSC.

Shivam Kumar 1st year

"Embrace boundless opportunities for growth and innovation by joining GDSC Sharda University. Unlock your potential through cutting-edge technology, skill-building workshops, and collaborative projects. Scan the QR code and embark on a transformative journey of learning, networking, and shaping a successful future in the world of tech."
