Sharda University
Gr. Noida (UP)

SECTION B

Event report and reflections:

CMIE Prowess is a database of the financials of Indian companies. Annual Reports of companies is the most important source of this database. For listed companies, the Prowess database contains additional data sourced from the stock exchanges. Prowess provides time-series data beginning 1989-90. The database is updated on a continuous basis.

Prowess is a database of *active business entities* for which some *structured information* related to their financial performance is *available*.

By *active business entities* we mean those business entities that are not mere registrations without any activity. By *business entities* we imply that we are not restricted to only registered companies. We cover other forms of business entities as well. *Structured information* is a conventional presentation format such as an Annual Report or a similar filing and not merely a press release of stray numbers or an unofficial estimate.

Yet, we do not cover *all* active business entities. *Availability* of structured information is of vital importance. We put in our best efforts to cover the maximum number of business entities. But, in spite of our best efforts we cannot claim that Prowess is a comprehensive database. It is the largest and most comprehensive database on the financial performance of Indian business

1. CMIE Features & objectives:

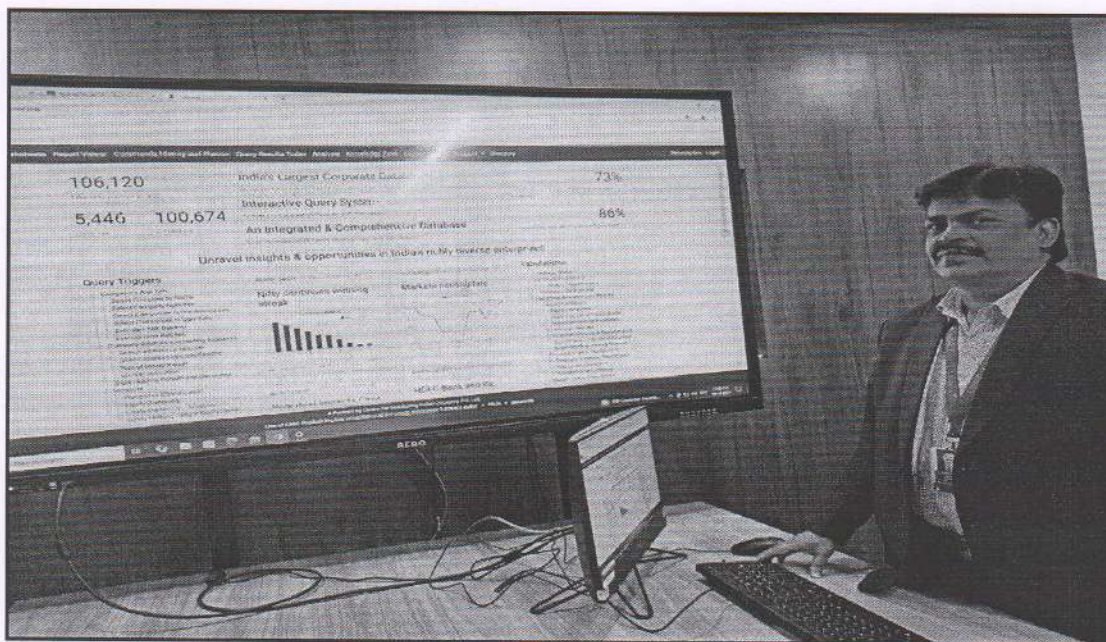

CMIE produces economic and business databases and develops specialized analytical tools to deliver these to its customers for decision making and for research. It analyses the data to decipher trends in the economy.

- Competitor analysis
- Corporate reporting
- Content distribution
- Spot commodity price polling
- Industry statistics gathering.

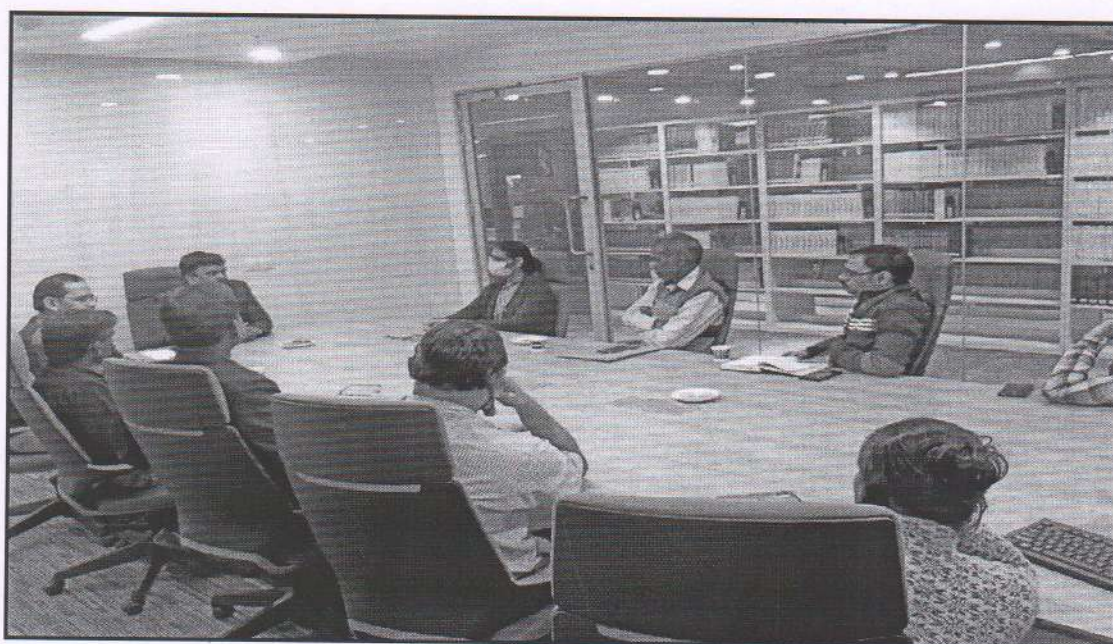

2. Event description:

A remarkable step by Swami Vivekananda Library at Sharda University! Organizing a training session on CMIE Prowess shows proactive support for enhancing Faculties, Staff members and students knowledge and skills, especially those in the Economic and Business research field, where the preserve and distribute digital material such as video, data and uploading the business reports, demonstrations of experiments and techniques are highly beneficial.
