

# **Programme and Course Structure**

# Sharda School of Basic Sciences and Research Department of Mathematics

M.Sc. (Mathematics)

**Programme Code: SBR0301** 

Batch: 2024-26

#### 1.1 Vision, Mission and Core Values of the University

# Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

#### **Mission of the University**

- 1. Transformative educational experience.
- 2. Enrichment by educational initiatives that encourage global outlook.
- 3. Develop research, support disruptive innovations and accelerate Entrepreneurship.
- 4. Seeking beyond boundaries.

#### **Core Values**

- 1.Integrity
- 2. Leadership
- 3.Diversity
- 4.Community

#### 1.2 Vision and Mission of the School

# Vision of the School

Achieving excellence in the realm of science to address the challenges of evolving society.

#### Mission of the School

- 1. Equip the students with knowledge and skills
- 2. Capacity building by providing academic flexibility to student and faculty members
- 3. To establish centre of excellence for innovative research
- 4. Address the deficiencies of the society pertaining to environment
- 5. To strengthen academic- industry collaboration for better employability
- 6. Developing a culture for continued betterment in all facets of life

#### **Core Values**

- 1.Integrity
- 2. Leadership
- 3. Diversity
- 4. Community

# 1.3 Vision and Mission Department of Mathematics

#### Vision of the Department

To become a globally recognized destination for education in applied mathematics and research.

# **Mission of the Department**

- 1. To develop mathematical skills in students and make them employable across a wide range of professions and promote interest research.
- 2. To develop entrepreneurial skills in students to serve the society at large.
- 3. To develop skills for the applications of mathematics in the various fields.

#### **Core Values**

- 1. Integrity
- 2. Leadership
- 3. Diversity
- 4. Community

#### M. Sc. (Mathematics)

#### 1.4 Programmeme Educational Objectives (PEO's)

**PEO1:** To deliver deep subject knowledge in the courses of study to enable students to shine in various fields such as sciences, engineering and technology, IT etc.

**PEO2:** To develop positive attitude and skills to enable the students to become a multi facet personality.

**PEO3:** To prepare students for entrance examinations conducted by IIT's/Universities to pursue Ph. D. Programmes as well as NET, UGC-CSIR.

**PEO4:** To develop students to be excellent to be excellent communicators and team players.

#### 1.4.1 Programme Outcomes (PO's)

**PO1: Mathematical knowledge:** Application of Mathematical knowledge in various fields of science, engineering and management etc.

**PO2: Nature of Mathematics:** Understand the concise, precise and rigorous nature of Mathematics.

**PO3: Critical thinking:** Develop the skill to think critically on abstract concepts of Mathematics.

**PO4: Problem analysis:** Develop the ability to analyze a problem logically and dissect into micro-parts and thus resolving the problem to accessible components.

**PO5: Mathematical logic and Ethics:** Formulates and develops mathematical arguments in logical manner and Realize and understand professional, ethical and cultural responsibilities.

#### 1.4.2 Programmeme Specific Outcomes (PSO's)

**PSO1**: Scientific thinking and logical abilities.

**PSO2**: Application of Mathematical principles in practical situations and software developments.

**PSO3**: Analyze any problem to micro-levels and solve the problem step by step.

**PSO4**: Owning up responsibility for logical comprehension and preparedness for constant improvement.

# 1.4.2 Mapping of PEOs with Mission Statements:

PEO	School	School	School	School	School	School
Statements	Mission	Mission	Mission	Mission	Mission	Mission
	1	2	3	4	5	6
PEO1:	3	2	3	1	2	3
PEO2:	3	2	3	1	2	3
PEO3:	3	3	3	3	3	3
PEO4:	3	2	3	1	3	3

# 1.4.3 Mapping of Programme Outcome (PO's)Vs Programme Educational Objectives (PEO's)

	PEO1	PEO2	PEO3	PEO4

#### **COURSE STRUCTURE**

#### **Real Analysis (MMT 101)**

Scho	ool: SSBSR	Batch: 2024-26	
Prog	gramme: M.Sc.	Academic Year: 2024-25	
	ich: Mathematics	Semester: I	
1	Course Code	MMT 101	
2	Course Title	Real Analysis	
3	Credits	4	
4	Contact Hours	4-0-0	
	(L-T-P)		
	Course Status	Compulsory	
5	Course Objective	<ol> <li>The objective of this course is to develop the knowled concepts of Real numbers and their properties.</li> <li>The objective of this course is to develop a deeper and</li> </ol>	more rigorous
		understanding of Calculus including defining terms and pro about sequences, series, limits, continuity, derivatives, integrals, and sequences of functions.	the Riemann
6	Course Outcomes	CO1: Explain functions between sets; equivalent sets; fin and uncountable sets and some operations on real numbers. CO2: Evaluate convergent, divergent, bounded, Cauchy and sequences and series. (K2,K5) CO3: Explain and determine the continuity, discontinuity a continuity of functions. (K2,K3,K4) CO4: Determine the uniform convergence of sequences an series. (K2,K3)	(K2,K4) d monotone nd uniform
		CO5: Evaluate convergence and divergence of sequences functions. (K2,K5)	and series of
		CO6: Describe and use the concepts of fundamental theor calculus, Riemann Integral and Riemann – Stieltjes integral	l (K2,K3)
7	Course Description	This course is an introduction to the fundamentals of Real a provides the understanding of convergence, divergence, unconvergence and absolute convergence of sequences and se numbers. It gives an idea about continuity, discontinuity an continuity of functions. It will be helpful in solving Real in	iform cries of Real d uniform

# Complex Analysis(MMT 106)

Scho	ool: SSBSR	Batch: 2024-26
Prog	gramme: M.Sc.	Academic Year: 2024-25
Bra	nch: Mathematics	Semester: II
1	Course Code	MMT-106
2	Course Title	Complex Analysis
3	Credits	4
4	Contact Hours	4-0-0
	(L-T-P)	
	Course Status	Compulsory
5	Course Objective	<ul> <li>This course is aimed to provide an introduction to the theories for functions of a complex variable. The concepts of analyticity, Cauchy-Riemann relations and harmonic functions, Complex integration and complex power series are presented. Discuss the classification of isolated singularities and examine the theory and illustrate the applications of the calculus of residues in the evaluation of integrals.</li> <li>Students will study geometric properties of conformal mappings in the plane and their relations with analytic functions</li> </ul>
6	Course Outcomes	CO1: Discuss the concept of complex number and its algebra calculates continuity, differentiability, analyticity of a function and analyse the derivative of a function. (K2,K3, K4) CO2: Describe the concept of analytic function and check the analyticity of the functions. (K3, K6) CO 3: Explain the concept of harmonic function and evaluate harmonic conjugates and discuss about series and their convergence, power series, radius of convergence. (K2, K4,K5) CO 4: Illustrate the concept of complex integration, write the Green's theorem, anti-derivative theorem, Cauchy-Goursat theorem, Cauchy's integral formula, Liouville theorem, Morera's theorem and evaluate derivative of analytic functions. (K3, K5,K6) CO 5: Discuss the concept of singularities and its types; write Taylor and Laurent series, Cauchy's residue theorem, evaluate the definite integrals using Cauchy's residue theorem.(K1,K2,K5,K6) CO6: Demonstrate the understanding of conformal mappings and Construct conformal mappings between many kinds of domain. (K2, K5)
7	Course Description	This course is an introduce the theories for functions of a complex variable. The concepts of analyticity, Cauchy-Riemann relations and harmonic functions, Complex integration and complex power series are presented. Discuss the classification of isolated singularities and examine the theory and illustrate the applications of the calculus of residues in the evaluation of integrals.

Survey and reporting: In this mode students will educate villagers and survey the ground level status of various government schemes meant for rural development. The analysed results will be reported to concerned agencies which will help them for taking necessary/corrective measures. E.g. Pradhan Mantri Jan Dhan Yojana, Pradhan Mantri MUDRA Yojana, Pradhan Mantri Jeevan Jyoti Bima Yojana, Atal pension Yojana, Pradhan Mantri Awas Yojana, Pradhan Mantri FasalBima Yojana, Swachh Bharat Abhiyan, Soil Health Card Scheme, Digital India, Skill India Programme, Beti Bachao, Beti Padhao Yojana, DeenDayal Upadhyaya Gram Jyoti Yojana, Shyama Prasad Mukherjee Rurban Mission, UJWAL Discom Assurance Yojana, PAHAL,Pradhan Mantri Awas Yojana-Gramin, Pradhan Mantri Yuva Yojana, Pradhan Mantri Jan Aushadhi Yojana, Pradhan Mantri KhanijKshetra Kalyan Yojana, Pradhan Mantri Suraksha Bima Yojana, UDAN scheme, DeenDayal Upadhyaya Grameen Kaushalya Yojana, Pradhan Mantri Sukanya Samriddhi Yojana, Sansad Adarsh Gram Yojana, Pradhan Mantri SurakshitMatritva Abhiyan, Pradhan Mantri RojgarProtsahan Yojana, Midday Meal Scheme, Pradhan Mantri Vaya Vandana Yojana, Pradhan Mantri Matritva Vandana Yojana, and Ayushman Bharat Yojana.</li> </ul>
		Yojana, and Ayushman Bharat Yojana.
8.1	Guideline s for Faculty Members	It will be a group assignment. There should be not more than 10 students in each group. The faculty guide will guide the students and approve the project title and help the student in preparing the questionnaire and final report. The questionnaire should be well design and it should carry at least 20 questions (Including demographic questions). The faculty will guide the student to prepare the PPT. The topic of the research should be related to social, economical or environmental issues concerning the common man. The report should contain 2,500 to 3,000 words and relevant charts, tables and photographs. The student should <b>submit the report</b> to CCC-Coordinator signed by the faculty guide by 15 April 2019. The students have to send the hard copy of the <b>report and PPT</b> , and then only they will be allowed for ETE.
8.2	Role of CCC- Coordinat	The CCC Coordinator will supervise the whole process and assign students to faculty members.
	or	<ol> <li>PG-M.ScSemester II – the students will be allocated to faculty member (mentors/faculty member) in even term.</li> <li>UG- B.ScSemester III - the students will be allocated to faculty member (mentors/faculty member) in odd term.</li> </ol>

8.3	Layout of the Report	Abstract(250 words)							
	_	a. Introduction							
		b. Literature review(optional)							
		c. Objective of the research							
		d. Research Methodology							
		e. Finding and discussion							
		f. Conclusion and recommendation							
		g. References							
		Note: Research report should base on primary data.							
8.4	Guideline	Title Page: The following elements must be included:							
	for Report	• Title of the article;							
	Writing	Name(s) and initial(s) of author(s), preferably with first names spelled							
		out;							
		<ul> <li>Affiliation(s) of author(s);</li> </ul>							
		Name of the faculty guide and Co-guide							
		<b>Abstract:</b> Each article is to be preceded by a succinct abstract, of up to 250							
		words, that highlights the objectives, methods, results, and conclusions of the							
		paper.  Text:Manuscripts should be submitted in Word.							
		-							
		• Use a normal, plain font (e.g., 12-point Times Roman) for text.							
		<u>^</u>							
		<ul> <li>Use italics for emphasis.</li> <li>Use the automatic page numbering function to number the pages.</li> <li>Save your file in docx format (Word 2007 or higher) or doc format (older Word versions)</li> </ul>							
		Reference list:							
		The list of references should only include works that are cited in the text and that have been published or accepted for publication.							
		The entries in the list should be in alphabetical order.							
		Journal article							
		Hamburger, C.: Quasimonotonicity, regularity and duality for nonlinear systems of partial differential equations. Ann. Mat. Pura Appl. 169, 321–354 (1995)							
		Article by DOI

# **Graph Theory and its Application (MMT 209)**

Scho	ool: SSBSR	Batch: 2024-26					
Prog	gramme: M.Sc.	Academic Year: 2025-26					
	nch: Mathematics	Semester: III					
1	Course Code	MMT-209					
2	Course Title	Graph Theory and its Application					
3	Credits	4					
4	Contact Hours	4-0-0					
	(L-T-P)						
	Course Status	Compulsory					
5	Course Objective	The goal of this course is to introduce the necessary ma	thematical				
		concepts of relevant vocabulary from graph theory and	combinatory,				
		and know the statements and proofs of many of the imp	ortant				
		theorems in the subject, and be able to perform related	calculations.				
6	Course Outcomes	CO1: Describe the basic concept of graphs and evaluate	e distances,				
		radius, diameter, centre of a graph, the number of distin	ect spanning				
		trees in a complete graph. (K2,K4,K5)					
		CO2: Explain the concept of tree and write Kruskal and	l Prim				
		algorithms, Huffman's algorithm. (K2,K4,K6)					
		CO3: Discuss about matching of graphs and write the the	neorems				
		related to matching. (K1,K2,K6)	1				
		CO4: Describe graph colouring, chromatic number, both					
		chromatic numbers and write Greedy algorithm. (K2,K	/				
		CO5: Discuss interval graphs and chordal graphs, chron polynomials and write Brook's theorem. (K1, K2, K6)	Hatic				
		CO6: Explain Hamilton property, Non-Hamiltonian gra	onhs Non-				
		planarity of K5 and K3,3, classification of regular polyt					
		write 5-colour theorem. Ramsey theory. (K2,K4,K6)	topes and				
		write 3 colour theorem. running theory. (122,111,110)					
7	Course Description	This course covers the theory of graphs and networks for	or both				
	1	directed and undirected graphs. Topics include graph isomorphism,					
		Eulerian and Hamiltonian graphs, matching, covers, connectivity,					
		coloring, and planarity. There is an emphasis on applica					
		world problems and on graph algorithms such as those	for spanning				
		trees, shortest paths, and network flows.

# **Number Theory with Cryptography (MMT 206)**

Sch	ool: SSBSR	Batch: 2024-26						
Pro	gramme: M.Sc.	Academic Year: 2025-26						
Bra	nch: Mathematics	Semester: III						
1	Course Code	MMT 206						
2	Course Title	Number Theory with Cryptography						
3	Credits	4						
4	Contact Hours (L-T-P)	4-0-0						
	Course Status	Compulsory						
5	Course Objective	To make students familiar with the basic concepts of number theory, congruence. Also students are able to understand public & private key cryptography.						
6	Course Outcomes	CO1: Explain the basic concepts of number theory and calculate GCD, LCM; write factorization theorem, Euclid theorem, and Prime number theorem (K2,K3,K4,K6)  CO2: Discuss about congruences along with solutions, residue system, write Fermat's little theorem, Wilson theorem, Chinese remainder theorem, Hanselemma and calculate Primitive roots. (K1,K2,K5,K6)  CO3: Describe classical encryption techniques, Substitution ciphers and transposition ciphers, modern block ciphers principles, public & private key cryptography, write RSA algorithm. (K2,K6)  CO4: Discuss and write Gauss lemma, Legendre symbol, quadrqtic reciprocity law, Jacobi symbol.(K2,K6)  CO5: Explain the greatest integer function, Euler's totient function, the						
		number of divisors function.(K2,K4) CO6: Discuss and evaluate the sum of divisors function, Mofunction, Mobius inversion formula. (K1,K2,K5)	bius mu					
7	Course Description	This course is an introduction to basics of number theory with cryptography, congruences, quadratic residues, some standard arithmetic functions.						
8	Outline syllabus :N	umber theory with Cryptography (MMT-206)	CO Mapping					
	Unit 1	BASICS						

A	Primes, Divisibility, Euclid's algorithm, GCD, LCM, expressing.	CO1
В	GCD as a linear combination of the numbers, Unique factorization theorem, Euclid's theorem on infinitude of primes.	CO1
С	Idea of existence of large gaps between primes, Statement of prime number theorem.	CO1
Unit 2	CONGRUENCES	
A	Definition, Residue system modulo m, Fermat's little theorem, Euler's generalization of Fermat's theorem.	CO2
В	Wilson's theorem, Solution of congruences, Chinese remainder theorem.	CO2
С	Hansel's lemma, Prime power moduli, Primitive roots.	CO2
Unit 3	CRYPTOGRAPHY	
A	Classical encryption techniques, Substitution ciphers and transposition ciphers, Modern block ciphers and Block ciphers principles.	CO3
В	Public key Cryptography: Public keys , Encrypting the message.	СОЗ
С	Private keys, decrypting and retrieval of the original message (RSA algorithm).	CO3
Unit 4	QUADRATIC RESIDUES	
A	Gauss lemma.	CO4
В	Legendre symbol, Jacobi symbol.	CO4
С	Quadratic reciprocity law.	CO4
Unit 5	SOME STANDARD ARITHMETIC FUNCTIONS	
A	The greatest integer function, Euler's totient function.	CO5
В	The number of divisors function, The sum of divisors function.	CO6
С	Mobius mu function, Mobius inversion formula.	CO6

## **Mathematics Lab I ( MMT-151)**

Sch	ool: SSBSR	Batch: 2024-26						
Pro	gramme: M.Sc.	Academic Year: 2025-26						
Bra	nch: Mathematics	Semester: I						
1	Course Code	MMT-151						
2	Course Title	Mathematics Lab I						
3	Credits	2						
4	Contact Hours (L-T-P)	0-0-4						
	Course Status	Compulsory						
5	Course Objective	amental ver the syntax comments, tage have been fic colving etc						
6	Course Outcomes  CO1: Describe the fundamentals of MATLAB and use MATLAB for interactive computations. (K2, K3) CO2: Demonstrate with strings and matrices and their uses. (K2, K3) CO3: Illustrate basic flow controls (if-else, for, while). (K3) CO4: Create plots and export this for use in reports and presentations. (K3, K5) CO5: Develop Programme scripts and functions using the MATLAB development environment. (K4, K5) CO6.Create and control simple plot and user-interface graphics objects in MATLAB (K4, K5)							
7	Course Description The course will give the fundamental knowledge and practical abilition in MATLAB required to effectively utilize this tool in technical numerical computations and visualisation in other courses.  Syntax and interactive computations, Programmeming in MATLAI using scripts and functions, rudimentary algebra and analysis. One-two-dimensional graphical presentations. Examples on engineering applications.							
8	Outline syllabus	1	CO Mapping					
	Unit 1	Practical based MATLAB as a calculator.	CO1					
		Creating an Array in MATLAB	CO1					
	Unit 2	Practical related to Mathematical Operations with Arrays	CO3					
	Unit 3	Practical related to How to make scripts files in MATLAB and do some examples.	CO4					
	Unit 4	Practical related to Make some function files in	CO5,CO6					
		MATLAB. Basic two-dimensional and three-dimensional	Page 73					

Page 73

	plotting, c	plotting, change in axes and annotation in a figure.							
Unit 5		<b>Practical related to</b> If-End statement, If-Else-End statement, nested If-Else-End statement							
	_	Solving a system of linear equations, curve fitting with polynomials using inbuilt functions such as polyfit.							
Mode of examination	Practical &	Practical &Viva							
Weightage	CA	CE	ETE						
Distribution	30%	30%	40%
