|-----|--------------|---|
| Pro | gram: MBA    | Current Academic Year: 2018-19  |
| Bra | nch: HCHA    | Semester: II  |
| 1   | Course Code  | MBA 168   |
| 2   | Course Title | Epidemiology and Biostatistics  |
| 3   | Credits      | 03  |
| 4   | Contact      | 3-0-0   |
|     | Hours        |   |
|     | (L-T-P)      |   |
|     | Course Type  | Compulsory  |
| 5   | Course       | 1. To become familiar with epidemiology terminology, outcome measures     |
|     | Objective    | and study design.   |
|     |              | 2. To appreciate application of epidemiology to subfields (Eg. Infectious |
|     |              | disease, reproductive health, genetics)                                   |

|   |                       | 3. To apply principles of epidemiology and biostatistics in the prevention of disease and improvement of health.  4. To Combine appropriate epidemiological concepts and statistical methods. |                    |  |  |  |  |
|---|-----------------------|---|--------------------|--|--|--|--|
| 6 | Course<br>Outcomes    | CO1: The student will be able to define the purpose & goals of epidemiology. CO2: The student will be able explain the determinants of health and   |                    |  |  |  |  |
|   |                       | causation of disease. CO3: The student will be able to apply epidemiological quarantine health research.  | principles in      |  |  |  |  |
|   |                       | CO4: The student will be able to analyse data of epidem using common statistical methods for inference. CO5: The student will be able to evaluate measures of dand correlates in populations  | lisease occurrence |  |  |  |  |
| 7 | Course<br>Description | Introduces basic epidemiological and bio statistical principles, concepts,  |                    |  |  |  |  |
| 8 | Outline syllabu       | ls  | CO Mapping         |  |  |  |  |
|   | Unit 1                | Basics of Epidemiology  |                    |  |  |  |  |
|   | A                     | Definition and scope of epidemiology, Achievements of epidemiological studies   | CO1                |  |  |  |  |
|   | В                     | Definitions of health and disease, Measures of disease frequency  | CO1,CO2            |  |  |  |  |
|   | С                     | Health Indicators   | CO1, CO2, CO4      |  |  |  |  |

| 6 | Course<br>Outcomes    | CO1: The student will be able to describe about bio medical waste and its impact on health and environment. CO2: The student will be able to understand principals and act involved in managing waste effectively and safely. CO3: The student will be able to apply existing legislation, concept, and practices regarding bio medical waste management. CO4: The student will be able to analyse the interrelationship between health, environment & waste management. |                   |  |  |  |  |  |
| 7 | Course<br>Description | Bio-medical waste (BMW), by its very nature, has a high potential for causing injury and infection than any other type of waste. It must, therefore be handled with sound and safe methods wherever generated.  Inappropriate handling of bio-medical waste will have serious public health consequences and also impacts on the environment. This course aims to impart knowledge and skills in BMW management and prepare the  |                   |  |  |  |  |  |
