

# **School of Basic Sciences and Research**

## **Department of Life Sciences**

**Program Structure: Three Year U.P.  
Higher Education for Zoology Discipline**

**AY: 2021-22 Onwards**

## 1. Standard Structure of the Program at University Level

---

### 1.1 Vision, Mission and Core Values of the University

---

#### Vision of the University

**To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.**

#### Mission of the University

- 1. Transformative educational experience**
- 2. Enrichment by educational initiatives that encourage global outlook**
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship**
- 4. Seeking beyond boundaries**

*Creative Campaign can be TEDs: This is guiding principle for promotion and wide circulation among various stakeholders.*

*Guidelines: Similar Mnemonics can be designed by schools.*

#### Core Values

- **Integrity**
- **Leadership**
- **Diversity**
- **Community**

**Note: Detailed Mission Statements of University can be used for developing Mission Statements of Schools/ Departments.**

## 1.2 Vision and Mission of the School

---

### **Vision of the School**

**Achieving Excellence in the Realm of Basic and Applied Sciences to Address the Global Challenges of Evolving Society**

### **Mission of the School**

- 1. To equip the students with knowledge and skills in basic and applied sciences.**
- 2. Capacity building through advanced training and academic flexibility.**
- 3. To establish centre of excellence for ecologically and socially innovative research.**
- 4. To strengthen inter institutional and industrial collaboration for skill development and global employability.**

### **Core Values**

- 1. Passion**
- 2. Perseverance**
- 3. Scientific nature**
- 4. Yearning for truth**

## 1.2 Vision and Mission of the Department

---

### **Vision of the Department**

**To acquire and impart knowledge of biology and bio-techniques so as to build capacity for addressing current global challenges**

### **Mission of the Department**

- 1. To train and transform students into thinking researchers/ professionals who are able to integrate theoretical knowledge and analytical skills in diverse areas of Biotechnology.**
- 2. To make students and faculties updated with advance techniques and to introduce the students to dynamic environment of bioscience**
- 3. To conduct cutting-edge interdisciplinary research.**
- 4. To introduce various skill development courses thereby enhancing the employability and providing opportunities for industry-academia collaboration.**

## 1.3 Programme Educational Objectives (PEO)

---

### 1.3.1 Writing Programme Educational Objectives (PEO)

---

Program educational objectives are broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.

- PEO1: To create a foundation of various zoology concepts and phenomena in the minds of students through theoretical and practical knowledge.
- PEO2: To keep students upgraded with new discoveries in biological world and inculcate continuous learning and self-improvement so that students are motivated for higher studies and research.
- PEO3: To make the students to tackle detailed problem-solving and analytical tasks associated with pure and applied zoological questions, in areas that include evolution, ecology and conservation.
- PEO4: To make students industry- or academia-ready by developing independent thinking, good communication and scientific skills and to acquaint them with professional ethics so that they can work well in an industrial or academic environment.
- PEO5: To make students understand interdisciplinary nature of research in zoology by assigning them different research projects/ case studies/ presentations.

### 1.3.2 Map PEOs with Mission Statements:

---

| <b>PEO Statements</b> | <b>School<br/>Mission 1</b> | <b>School<br/>Mission 2</b> | <b>School<br/>Mission 3</b> | <b>School<br/>Mission 4</b> |
|-----------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|
| <b>PEO1:</b>          | 3                           | 2                           | -                           | -                           |
| <b>PEO2:</b>          | 3                           | 2                           | 2                           | -                           |
| <b>PEO3:</b>          | 3                           | 3                           | 2                           | 1                           |
| <b>PEO4:</b>          | 2                           | 3                           | 2                           | 2                           |
| <b>PEO5:</b>          | 3                           | 2                           | 2                           | 2                           |

Enter correlation levels 1, 2, or 3 as defined below:

**1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)**

If there is no correlation, put “-“

### 1.3.2.1 Map PEOs with Department Mission Statements:

| <b>PEO Statements</b> | <b>Department Mission 1</b> | <b>Department Mission 2</b> | <b>Department Mission 3</b> | <b>Department Mission 4</b> |
|-----------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|
| <b>PEO1:</b>          | 3                           | 1                           | 1                           | 1                           |
| <b>PEO2:</b>          | 3                           | 3                           | 2                           | 2                           |
| <b>PEO3:</b>          | 2                           | 2                           | 2                           | 2                           |
| <b>PEO4:</b>          | 3                           | -                           | 2                           | 3                           |
| <b>PEO5:</b>          | 3                           | 2                           | 3                           | 2                           |

Enter correlation levels 1, 2, or 3 as defined below:

**1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)**

If there is no correlation, put “-“

### 1.3.3 Program Outcomes (PO's)

---

**PO1: Knowledge:** The student will have knowledge of the animals of the Earth and provide valuable insight for wise management of the planet's resources.

**PO2: Skill Set Development:** The student will be skilled in the observation and study of nature, biological techniques, experimental skills and scientific investigation.

**PO3: Oral Communication and Scientific Writing:** The students will be able to demonstrate good oral communication. Students will also be knowledgeable about writing technical (project report, assignments and reviews) content.

**PO4: Environment and Sustainable Development:** The student will be able to recognizing the essential roles of science and biology in the lives of citizens today and tomorrow; and the valuable insight for wise management of the planet's resources.

**PO5: Ethics, Independent Thinking and Team Work:** The student will be able to focus on "real world" relationships and dependencies among the phenomena and processes will give character to any location or place.

**PO6:**

**PO7:**

### 1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

---

| Mapping | PEO1 | PEO2 | PEO3 | PEO4 | PEO5 |
|---------|------|------|------|------|------|
| PO1     | 3    | 2    | 2    | 2    | 2    |
| PO2     | 3    | 2    | 2    | 3    | 2    |
| PO3     | 1    | 1    | -    | 3    | 2    |
| PO4     | 1    | 2    | 3    | -    | 2    |
| PO5     | 1    | 2    | -    | 3    | 2    |

*1. Slight (Low)*

*2. Moderate (Medium)*

*3. Substantial (High)*

## ***B. Program Structure***

**1. TITLE:** Three Year U.P. Higher Education Program Structure for Zoology Discipline

**2. DURATION OF THE COURSE:** 3 Years

**3. YEAR OF IMPLIMENTATION**

**This syllabus will be implemented for the session academic year 2021-22 onwards.**

**4. PREAMBLE**

**Total Credits- 150**

Minimum credit required for multiple entry and exit:

|  |                       |     |
|--|-----------------------|-----|
| Total credit of the 03 year UG Program for year wise multiple entry and exit | 01 <sup>st</sup> Year | 46  |
|  | 02 <sup>nd</sup> Year | 96  |
|  | 03 <sup>rd</sup> Year | 146 |

**Total Number of Semesters – 06 (Two semesters per year)**

**Total Number of Theory Papers – 28**

**Total Number of Practical courses – 20**

**Total Number of Minor Projects/Dissertations- 02**

**Number of papers (theory) per semester – 04-05**

**Number of Laboratory courses per semester – 02-04**

**Community Connect: 01**

**Internship: 01**

| Semester wise subjects  |                  |   |                      |           |                                  |   |
|---|------------------|---|----------------------|-----------|----------------------------------|---|
| No.   | Course Name      | Subject                                     | Theory/<br>Practical | Credit    |                                  | (Min.-Max.Total Credits) After completion {Minimum Credits} [Max Duration in years] |
|   |                  |   |                      | Total     | Min. - Max. of the semester/year |   |
| <b>Year 01: Certificate Course in Medical Diagnostics &amp; Public Health</b> |                  |   |                      |           |                                  |   |
| 1.  | <b>Semester1</b> | Cytology, Genetics and Immunology           | Major I              | Theory    | 04                               | 23  |
| 2.  |                  | Cell Biology and Cytogenetics Lab           | Major I              | Practical | 02                               |   |
| 3.  |                  | Introduction to Microbiology                | Major II             | Theory    | 04                               |   |
| 4.  |                  | Microbiology Lab                            | Major II             | Practical | 02                               |   |

| <b>Subject:</b> ZOOLOGY  |  |                                   |
| <b>Course Code:</b> B050101T   | <b>Course Title:</b> Cytology, Genetics and Immunology   |                                   |
| <b>Course outcomes:</b><br>The student at the completion of the course will be able to:  |  |                                   |
| <ol style="list-style-type: none"> <li>1. Understand the structure and function of all the cell organelles.</li> <li>2. Know about the chromatin structure and its location.</li> <li>3. To be familiar with the basic principle of life, how a cell divides leading to the growth of an organism and also reproduces to form new organisms.</li> <li>4. How one cell communicates with its neighboring cells?</li> <li>5. Understand the basic principles of genetics and how genes (earlier called factors) are inherited from one generation to another.</li> <li>6. Understand the Mendel's laws and the deviations from conventional patterns of inheritance.</li> <li>7. Comprehend how environment plays an important role by interacting with genetic factors.</li> <li>8. How to detect chromosomal aberrations in humans and study the pattern of inheritance by pedigree analysis in families.</li> <li>9. To have an in depth understanding about Immune System &amp; its mechanisms.</li> </ol> |  |                                   |
| <b>Credits:</b> 4  | <b>Core:</b> Compulsory  |                                   |
| <b>Max. Marks:</b> 25+75   | <b>Min. Passing Marks:</b> .....   |                                   |
| Total No. of Lectures-Tutorials-Practical (in hours per week): <b>L-T-P:</b> 4-0-0   |  |                                   |
| <b>Unit</b>  | <b>Topics</b>  | <b>Total No. of Lectures (60)</b> |
| <b>I</b>   | <b>Structure and Function of Cell Organelles I</b> <ul style="list-style-type: none"> <li>• Plasma membrane: chemical structure—lipids and proteins</li> <li>• Cytoskeleton: microtubules, microfilaments, intermediate filaments</li> <li>• Cell-cell interaction: cell adhesion molecules, cellular junctions</li> <li>• Introduction to all national Biologists (Zoologists) who have contributed/contributing to Zoological and Life Sciences as a mark of tribute to ancient and modern biology will be included as part of the Continuous Internal Evaluation (CIE)</li> </ul> | <b>6</b>                          |
| <b>II</b>  | <b>Structure and Function of Cell Organelles II</b> <ul style="list-style-type: none"> <li>• Mitochondria: Structure, oxidative phosphorylation</li> <li>• Peroxisome and ribosome: structure and function</li> <li>• Endomembrane system: protein targeting and sorting, endocytosis, exocytosis</li> </ul>   | <b>6</b>                          |
| <b>III</b>   | <b>Nucleus and Chromatin Structure</b> <ul style="list-style-type: none"> <li>• Structure and function of nucleus in eukaryotes</li> <li>• Chemical structure and base composition of DNA and RNA</li> <li>• DNA supercoiling, chromatin organization, structure of chromosomes</li> <li>• Types of DNA and RNA</li> </ul>   | <b>8</b>                          |

|             |   |          |
|-------------|---|----------|
| <b>IV</b>   | <b>Cell cycle, Cell Division and Cell Signalling</b> <ul style="list-style-type: none"> <li>• Cell division: mitosis and meiosis</li> <li>• Cell cycle and its regulation, apoptosis</li> <li>• Signal transduction: intracellular signaling and cell surface receptors, via G-protein linked receptors, JAK-STAT pathway</li> </ul>  | <b>8</b> |
| <b>V</b>    | <b>Mendelism and Sex Determination</b> <ul style="list-style-type: none"> <li>• Basic principles of heredity: Mendel's laws, monohybrid and dihybrid crosses</li> <li>• Complete and Incomplete Dominance</li> <li>• Penetrance and expressivity</li> <li>• Genic Sex-Determining Systems, Environmental Sex Determination, Sex Determination in <i>Drosophila</i>, Sex Determination in Humans</li> <li>• Sex-linked characteristics and Dosage compensation</li> </ul>  | <b>8</b> |
| <b>VI</b>   | <b>Extensions of Mendelism, Genes and Environment</b> <ul style="list-style-type: none"> <li>• Extensions of Mendelism: Multiple Alleles, Gene Interaction</li> <li>• The Interaction Between Sex and Heredity: Sex-Influenced and Sex-Limited Characteristics</li> <li>• Cytoplasmic Inheritance, Genetic Maternal Effects</li> <li>• Genomic Imprinting, Anticipation</li> <li>• Interaction Between Genes and Environment: Environmental Effects on Gene Expression, Inheritance of Continuous Characteristics</li> </ul>  | <b>8</b> |
| <b>VII</b>  | <b>Human Chromosomes and Patterns of Inheritance</b> <ul style="list-style-type: none"> <li>• Human karyotype</li> <li>• Chromosomal anomalies: Structural and numerical aberrations with examples</li> <li>• Pedigree analysis</li> <li>• Patterns of inheritance: autosomal dominant, autosomal recessive, X-linked recessive, X-linked dominant</li> </ul>   | <b>8</b> |
| <b>VIII</b> | <b>Immune System and its Components</b> <ul style="list-style-type: none"> <li>• Historical perspective of Immunology, Innate and Adaptive Immunity, Structure and functions of different classes of immunoglobulins, Hypersensitivity</li> <li>• Immune system: innate and adaptive immunity, clonal selection, complement system</li> <li>• Humoral immunity and cell mediated immunity</li> <li>• Immunoglobulin and T-cell receptor genes: organization of Ig gene loci, molecular mechanism of generation of antibody diversity</li> <li>• HLA complex: organization, class I and II HLA molecules, expression of HLA genes</li> </ul> | <b>8</b> |

| <b>Unit</b>   | <b>Topics</b>  | <b>Total No. of Lectures (60)</b> |
| <b>I</b>  | <b>Structure and Function of Biomolecules</b> <ul style="list-style-type: none"> <li>• Structure and Biological importance of carbohydrates(Monosaccharides, Disaccharides, Polysaccharides and Glycoconjugates)</li> <li>• Lipids (saturated and unsaturated fatty acids, Tri-acylglycerols, Phospholipids, Glycolipids, Steroids)</li> <li>• Structure, Classification and General properties of <math>\alpha</math>-amino acids; Essential and non-essential <math>\alpha</math>-amino acids, Levels of organization in proteins; Simple and conjugate proteins.</li> </ul> | <b>8</b>                          |
| <b>II</b>   | <b>Bioenergetics</b> <ul style="list-style-type: none"> <li>• Principles of Bioenergetics, Bioenergetics and Thermodynamics</li> <li>• Biological Oxidation-Reduction Reactions, Free Energy Calculations, The Cell's Energy Currency- Phosphoryl Group Transfers and ATP</li> <li>• Free-Energy-Driven Transport across Membranes</li> </ul>  | <b>8</b>                          |
| <b>III</b>  | <b>Metabolism of Carbohydrates and Lipids</b> <ul style="list-style-type: none"> <li>• Metabolism of Carbohydrates: glycolysis, citric acid cycle, gluconeogenesis, phosphate pentose pathway</li> <li>• Glycogenolysis and Glycogenesis</li> <li>• Lipids --- Biosynthesis of palmitic acid; Ketogenesis,</li> </ul>  | <b>8</b>                          |

|             |   |          |
|-------------|---|----------|
|             | <ul style="list-style-type: none"> <li>• <math>\beta</math>-oxidation and omega -oxidation of saturated fatty acids with even and odd number of carbon atoms</li> </ul>   |          |
| <b>IV</b>   | <b>Metabolism of Proteins and Nucleotides</b> <ul style="list-style-type: none"> <li>• Catabolism of amino acids: Transamination, Deamination, Urea cycle</li> <li>• Nucleotides and vitamins</li> <li>• Review of mitochondrial respiratory chain, Oxidative phosphorylation, and its regulation</li> </ul>  | <b>6</b> |
| <b>V</b>    | <b>Digestion and Respiration</b> <ul style="list-style-type: none"> <li>• Structural organization and functions of gastrointestinal tract and associated glands</li> <li>• Mechanical and chemical digestion of food; Absorptions of carbohydrates, lipids, proteins, water, minerals and vitamins; Histology of trachea and lung</li> <li>• Mechanism of respiration, Pulmonary ventilation; Respiratory volumes and capacities; Transport of oxygen and carbon dioxide in blood Respiratory pigments, Dissociation curves and the factors influencing it; Control of respiration</li> </ul> | <b>7</b> |
| <b>VI</b>   | <b>Circulation and Excretion</b> <ul style="list-style-type: none"> <li>• Components of blood and their functions</li> <li>• Haemostasis: Blood clotting system, Blood groups: Rh factor, ABO and MN</li> <li>• Structure of mammalian heart</li> <li>• Cardiac cycle; Cardiac output and its regulation, Electrocardiogram, Blood pressure and its regulation</li> <li>• Structure of kidney and its functional unit; Mechanism of urine formation</li> </ul>  | <b>8</b> |
| <b>VII</b>  | <b>Nervous System and Endocrinology</b> <ul style="list-style-type: none"> <li>• Structure of neuron, resting membrane potential</li> <li>• Origin of action potential and its propagation across the myelinated and unmyelinated nerve fibers</li> <li>• Types of synapse</li> <li>• Endocrine glands - pineal, pituitary, thyroid, parathyroid, pancreas, adrenal; hormones secreted by them</li> <li>• Classification of hormones; Mechanism of Hormone action</li> </ul>  | <b>8</b> |
| <b>VIII</b> | <b>Muscular System</b> <ul style="list-style-type: none"> <li>• Histology of different types of muscle;</li> <li>• Ultra-structure of skeletal muscle;</li> <li>• Molecular and chemical basis of muscle contraction;</li> <li>• Characteristics of muscle twitch; Motor unit, summation and tetanus</li> </ul>   | <b>7</b> |

**Suggested Readings:**

| <b>Programme/Class:</b> Degree  | <b>Year:</b> Third   | <b>Semester:</b> Sixth            |
| <b>Subject:</b> ZOOLOGY   |  |                                   |
| <b>Course Code:</b>   | <b>Course Title:</b> Structural bioinformatics lab   |                                   |
| <b>Course outcomes:</b><br>After studying this course, students will be able to<br>CO1: Understand about overview of bioinformatics scope and their disciplines. Generation of large-scale data in the field of molecular biology.<br>CO2: Review of database source, database management system, Biological databases and their classification. Sequences databases and specialized databases.<br>CO3: To attain knowledge about data storage model/format, retrieval of information and integration.<br>CO4: Understanding about different sequence formats. Perform sequence alignment and phylogenetic prediction with different tools/software with algorithm.<br>CO5: To apply different techniques for gene prediction, motif search and genome sequencing analysis.<br>CO6: Basic knowledge of various bioinformatics concepts, scope, database usage, tools and software used for each application along with their algorithms |  |                                   |
| <b>Credits:</b> 2   |  | <b>Core:</b> Compulsory           |
| <b>Max. Marks:</b> 25+75  |  | <b>Min. Passing Marks:</b> .....  |
| Total No. of Lectures-Tutorials-Practical (in hours per week): <b>L-T-P:</b> 0-0-4  |  |                                   |
| <b>Unit</b>   | <b>Topics</b>  | <b>Total No. of Lectures (60)</b> |
| <b>I</b>  | Introduction to data types and Sources; Classification and Presentation of Data; Quality of data; Private and Public data sources<br>General Introduction of Biological Databases: Nucleic acid databases, Protein databases<br>Specialized Genome databases, Structure databases  | <b>15</b>                         |
| <b>II</b>   | Biological sequences and Alignment Methods<br>Global and Local alignment, Pairwise alignment and Multiple sequence alignment<br>Phylogenetic tree analysis   | <b>15</b>                         |
| <b>III</b>  | Flat files, relational, object-oriented databases and controlled vocabularies<br>File Format (GenBank, DDBJ, FASTA, PDB, SwissProt); Introduction to Metadata<br>File Storage; Boolean Search and Fuzzy Search, Data integration   | <b>15</b>                         |
| <b>IV</b>   | <b>Virtual Labs</b> <ul style="list-style-type: none"> <li>• <a href="https://www.vlab.co.in">https://www.vlab.co.in</a></li> <li>• <a href="https://zoologysan.blogspot.com">https://zoologysan.blogspot.com</a></li> <li>• <a href="http://www.vlab.iitb.ac.in/vlab">www.vlab.iitb.ac.in/vlab</a></li> <li>• <a href="http://www.onlinelabs.in">www.onlinelabs.in</a></li> <li>• <a href="http://www.powershow.com">www.powershow.com</a></li> <li>• <a href="https://vlab.amrita.edu">https://vlab.amrita.edu</a></li> <li>• <a href="https://sites.dartmouth.edu">https://sites.dartmouth.edu</a></li> </ul> | <b>15</b>                         |
| <b>Suggested Readings:</b><br>Attwood TK., "Introduction to Bioinformatics", Pearson Education, 2006.<br>J. S, Ignacimuthu.S, "Basic Bioinformatics", Narosa, 2013.<br>Roy Biswajit, "Bioinformatics/B.Sc. Zoology", Narosa, 2009   |  |                                   |

**Course prerequisites:** To study this course, a student must have had the subject biology in class/12<sup>th</sup>  
The eligibility for this paper is 10+2 from Arts/ Commerce/ Science

**Mapping of outcomes vs. Topics**
