

School of Allied Health Sciences

MSc (Clinical Research)

Program Code: SAH0101

Batch 2021-23

Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

Mission of the University

- 1. Transformative educational experience
- **2.** Enrichment by educational initiatives that encourage global outlook
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship
- **4.** Seeking beyond boundaries

Core Values

- Integrity
- Leadership
- Diversity
- Community

Vision of the School

To produce skilled man power in different areas of biomedical science for better healthcare delivery.

Mission of the School

- To strengthen the main line medical and health services.
- To become effective assisting and support system to medical and health personnel.

Core Values

- Skilled professional
- Multidimensional
- Compassion
- Management

3 Programme Educational Objectives (PEO)

PEO1: To understand and analyze the impact of clinical research in a global, economic, environmental and societal context.

PEO2: To understand the regulatory perspectives and processes, standards and practices of ICH-GCP in conduct of ethical clinical trials.

PEO3:Forecast the resources necessary for developing and managingclinical research grants and trials as required and regulated by global regulatoryagencies.

PEO4:Demonstrate advanced critical thinking skills necessary to enhance employment opportunities or advancement within the clinical research industry.

PEO5: Effectively communicate and collaborate with health care providers and regulatory agencies to develop culturally diverse domestic and global strategies for biopharmaceutical product approvals.

1.3.2 Map PEOs with Mission Statements:

| PEO Statements | School Mission 1 | School Mission 2 |
|----------------|------------------|------------------|
| PEO1: | 3 | 3 |
| PEO2: | 3 | 3 |
| PEO3: | 3 | 3 |
| PEO4: | 3 | 3 |
| PEO5: | 3 | 3 |

1.3.3 Program Outcomes (PO's)

On successful completion of the program, post graduate attributes will be:

PO1: Clinical research and basic medical knowledge: Apply knowledge of basic medical sciences and clinical research to be a successful member of the research team or a individual.

PO2:Design/development of trials:design and implement a clinical (patient-oriented) research study including selection of study methods, measures of the intervention and outcomes, data collection, management and analysis.

PO3: Modern tool usage: Create, select and apply appropriate techniques, resources and modern tools in clinical data management with an understanding of the limitations.

PO4: Ethics: Understand professional and ethical responsibilities in clinical research practice by following standards, norms and practices of ethical and regulatory bodies.

PO5: Communication: Understand the regulatory perspectives, norms and processes and communicate effectively with them for seeking permissions/approvals; being able to comprehend, write and present effectively trial reports and documentation

PO6: Individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO7:Lifelong learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in broadest context of technological change.

| 1.3.4 Mapping of Program Outcome Vs | Program | Educational | Objectives |
|-------------------------------------|---------|--------------------|-------------------|
|-------------------------------------|---------|--------------------|-------------------|

| | PEO1 | PEO2 | PEO3 | PEO4 | PEO5 |
|-----|------|------|------|------|------|
| PO1 | 2 | 3 | 3 | 2 | 2 |
| PO2 | 3 | 2 | 3 | 3 | 2 |
| PO3 | 1 | 1 | 2 | 3 | 3 |
| PO4 | 1 | 3 | 1 | 1 | 3 |
| PO5 | 2 | 3 | 3 | 2 | 3 |
| PO6 | 1 | 2 | 3 | 2 | 3 |
| PO7 | 3 | 2 | 1 | 2 | 3 |

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

1.3.5 Program Outcome Vs Courses Mapping Table¹:

| Program Outcome Courses | Course Name | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 |

| | Course Type | Compulsory | |

| 5 | Course Objective | To provide a comprehensive introduction to the clinical research process, conduct &management of clinical trials. To make student more familiar with roles/jobs as part of the study team. To provide extensive Knowledge & application in different aspects of Clinical research process. To understand the historical development, the principles and content of internationalguidelines for clinical research (Declaration of Helsinki, ICH-GCP) and their influence | | | |
|---|-----------------------|--|---|--|--|
| 6 | Course Outcomes | On successful completion of this course, student will be able CO1:Adopt latest technological advancement in clinical pract professional and ethical uprightness and socio-economic concCO2:Follow and implement GCP and regulatory guidelines research process. CO3:Construct timelines/guidelines and standard operating I day to day clinical trial activities. CO4:To describe the different phases and working process of development CO5:To define the investigator's role and responsibilities in study, particularly regarding informed consent and safety regarding infor | etices with acerns. during clinical procedures for f clinical drug | | |
| 7 | Course Description | This course gives insight of the clinical trial process, its cond management as per GCP guidelines. Good clinical practice p framework of principles which aim to ensure the safety of re participants and the integrity and validity of data. This cours provide with the basic principles of GCP and how these prin applied practically in the research setting. | orovides a search e aims to | | |

| | Hours | | | | | | | |
| | (L-T-P) | | | | | | | |
| | Course Type | Compulsory | | | | | | |
| 5 | Course | 1. To provide Understanding of how to effectively manage clinical trials | | | | | | |
| | Objective | through applying a range skills and knowledge | | | | | | |
| | | 2. To develop effective strategies and problem solving for managing | | | | | | |
| | | clinical trials | | | | | | |
| 6 | Course | On successful completion of this course, student will be able to: | | | | | | |
| | Outcomes | CO1:Identify the key issues involved in the conduct of a clinical study | | | | | | |
| | | including investigator and site selection, site management and conflict | | | | | | |
| | | resolution. | | | | | | |
| | | CO2:Outline a study level feasibility plan and describe the structure of a | | | | | | |
| | | study budget | | | | | | |
| | | CO3:To provide a comprehensive introduction to the clinical research process, conduct & management of clinical trials. | | | | | | |
| | | CO4:Reporting and managing serious adverse events on site, development | | | | | | |
| | | of recruitment strategies and clinical study budget. | | | | | | |
| | | CO5:Staff requirements and construct timelines to target the appropriate | | | | | | |
| | | study population and to store, shift and dispense a study drug or device as | | | | | | |
| | | well as how to review some documents, case report forms protocols and | | | | | | |
| | | study budget | | | | | | |
| | | | | | | | | |
| 7 | Course | This course will equip the students with the imperative skills of clinical | | | | | | |
| | Description | trial management. This course gives a methodical understanding of the | | | | | | |
| | 1 | core areas of clinical trial management thus enhancing skills and | | | | | | |
| | 1 | | | | | | | |

| | | knowledge to the level expected of a Clinical Trial Project Manager | | | | | | | | | |

| | (L-T-P) | | | | | |
| | Course Type | Compulsory | | | | |
| 5 | Course | 1.To equip with knowledge and skills necessary in conducting research | | | | |
| | Objective | work and formulating research synopsis andreport. | | | | |
| | , | 2.To impart knowledge for enabling students to develop data analytics | | | | |
| | | skills and meaningful interpretation to the data sets so as to solve any | | | | |
| | | research problem. | | | | |
| | | 3.To Use theory and previous research to create research questions and | | | | |
| | | hypotheses and to identify and analyze the appropriate method and | | | | |
| | | variables needed for research questions | | | | |
| | | variables needed for research questions | | | | |
| 6 | Course | On successful completion of this course, student will be able to: | | | | |
| | Outcomes | CO1: Develop understanding on various kinds of research, objectives of | | | | |
| | | doing research, research process, research designs and sampling. | | | | |
| | | CO2: demonstrate basic knowledge on qualitative and quantitative | | | | |
| | | research techniques | | | | |
| | | CO3: Demonstrate adequate knowledge on measurement & scaling | | | | |
| | | techniques as well as the quantitative data analysis | | | | |
| | | CO4: Show basic awareness of data analysis-and hypothesis testing | | | | |
| | | Con only busic awareness of data analysis and hypothesis testing | | | | |

| 7 | Course | procedures CO5: Understand values, responsibilities and ethical issues in research, including those issues that arise in using quantitative and qualitative research This course is designed to provide students with the practical tools of | | | | | | |
|---|----------------|--|------------|--|--|--|--|--|
| | Description | doing research and the theoretical background for critiquing and designing research on various topics. This course will also engage students in the discussion of ethics, studying how personal values, ethical models and reflective processes shape our ethical decision making in a leadership context. | | | | | | |
| 8 | Outline syllab | us | CO Mapping | | | | | |
| | Unit 1 | Purpose of research | | | | | | |
| | A | Foundations of Research Methodology, Introduction to research, what is Research? | CO1 | | | | | |
| | В | Objectives and motivations for research | CO1 | | | | | |
| | С | Types of Research, Introduction to Qualitative Research, Quantitative Research Conceptualization, Problem Formulation | CO1 | | | | | |
| | Unit 2 | Principles of Research in quantitative and qualitative approaches: Research design | | | | | | |
| | A | Research Process & Research Design, Introduction to Research Process, Steps in Research Process | CO1, CO2 | | | | | |
| | В | Introduction to Research Design, nature of good design | CO1, CO2 | | | | | |
| | С | Types of Research Design: Exploratory, Descriptive and Causal research | CO1, CO2 | | | | | |
| | Unit 3 | Methods of data collection and types of data | | | | | | |
| | A | Data Collection Method, Introduction to Primary & Secondary data, Methods of collecting primary and secondary data | CO4 | | | | | |
| | В | Advantages & disadvantages of data collection. Measurement & Scaling Technique | CO4 | | | | | |
| | С | Scales of Measurement, Questionnaire Designing. | CO3 | | | | | |
| | Unit 4 | The Research Cycle | | | | | | |
| | A | Analysis & Report Writing, Data Preparation, Data aggregation, Data accuracy, Data structure, Data transformation | CO3 | | | | | |
| | В | Descriptive Statistics, Univariate analysis, Correlation/Regression, InferentialStatistics, Hypothesis Testing Process, Large sample test, Small sample, Parametric and NonParametric Test | CO3 | | | | | |
| | С | Report Writing, Types of Research output, Key Elements of Report Writing | CO3, CO4 | | | | | |
| | Unit 5 | Values, Social Responsibility and Ethics in Research | | | | | | |
| | A | Morals, Values and Ethics, Integrity, Work Ethic, Service Learning, Civic Virtue, Respect | CO5 | | | | | |

| | (L-T-P) | | | | | |
| | Course Type | Compulsory | | | | |
| 5 | Course Objective | To achieve a basic understanding of recombinant DNA technology, human genome structure, Genetic Tests, Prenatal Diagnosis of Genetic Diseases etc. To equip with knowledge of Oncogenes and Malignancy, Detection of Oncogenic activation, Functions of oncogenes To achieve basic understanding of Stem Cell Research and New Targets for Drug Designs | | | | |
| 6 | Course Outcomes | On successful completion of this course, student will be able to: CO1: Employ the scientific method to generate new knowledge, and to solve problems, regarding human heredity. CO2: understand advanced techniques in genome analysis, recombinant DNA technology. CO3: To develop the understanding for Management of inherited human diseases CO4: Demonstrate knowledge of oncogenes and malignancy, their detection and management CO5: synthesize and incorporate the fundamentals of gene and nanotechnology in order to understand how such technology impacts numans. | | | | |
| 7 | Course Description | This course gives in sight into human genetics, oncogenes, stem cell research and Biopharmaceuticals, Re-generative Medicine, Nano technology and Nano medicineetc which will lay foundation and motivate students to pick up and conduct recent challenging research proposals. | | | | |
