

Program Curriculum

School of Allied Health Sciences

Bachelor of Radiological Imaging Techniques (Radiology/CT/MRI)

Program CODE SAH0107

Batch 2021-2024

1. Standard Structure of the Program at University Level

1.1 Vision, Mission and Core Values of the University

Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

Mission of the University

- 1. Transformative educational experience**
- 2. Enrichment by educational initiatives that encourage global outlook**
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship**
- 4. Seeking beyond boundaries**

Core Values

- Integrity**
- Leadership**
- Diversity**
- Community**

1.2 Vision and Mission of the School

Vision of the School

To steer the School of Allied Health Sciences towards excellence in academics, innovation and entrepreneurship by constant endeavors

Mission of the School

1. To create the state of the art facility for quality teaching learning, research & innovation
2. To incorporate the contemporary standards in teaching & learning
3. To inculcate in the students values of integrity and compassion towards the care of patients and society.

Core Values

- Critical Thinking and Observation
- Analytical Skills
- Creativity
- Skilled professional
- Multidimensional
- Compassion
- Management

1.3 Programme Educational Objectives (PEO)

1.3.1 Writing Programme Educational Objectives (PEO)

PEO1: Disciplinary knowledge and its appropriate application:

This subject will facilitate students to gain relevant disciplinary understanding of the nature, practice and application of Medical Imaging Technology through lectures, Hands on training on imaging machines, computer practical, workshops and presentations. The material will be assessed in the test and the examination

PEO2 : Professional skills and their appropriate application

Provide Time management, personal organization and teamwork skills, and communication skills will be developed through the presentation projects.

PEO3 : Engagement with the needs of society

The subject will enhance the capacity of the students to respond to the needs and grapple with ethical concerns that accompany the practice of Medical Imaging (e.g. the balance between diagnostic accuracy and radiation dose to the patient, the staff and population as a whole).

PEO4 : Clinical Care

Using a patient/family-centered approach and best evidence, each student will organize and implement the prescribed preventive, investigative and management plans; and will offer appropriate follow-up services.

PEO5 : Lifelong learning

The student should be committed to continuous improvement in skills and knowledge while harnessing modern tools and technology. Program objectives will aim at making the students being able to:
Perform objective self-assessments of their knowledge and skills; learn and refine existing skills; and acquire new skills

PEO6: Social Accountability and Responsibility

The students will recognize that allied and healthcare professionals need to be advocates within the health care system, to judiciously manage resources and to acknowledge their social accountability. They have a mandate to serve the community, region and the nation and will hence direct all research and service activities towards addressing their priority health concerns.

1.3.2 Map PEOs with Mission Statements:

PEO Statements	School Mission 1	School Mission 2	School Mission 3
PEO1:	3	3	2
PEO2:	3	2	3
PEO3:	2	3	2
PEO4:	3	3	3
PEO5:	3	2	3
PEO6:	3	3	2

Enter correlation levels 1, 2, or 3 as defined below:

- 1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)**

1.3.3 Program Outcomes (PO's)

PO1 : Apply the knowledge of clinical, diagnostic and Medical physics, Imaging technology, clinical sciences, as well as an understanding of health care delivery diagnostic imaging system.

PO2 : Find, analyze, evaluate and apply the information systematically and shall make a appropriate diagnosis to provide quality of image along with patient care.

PO3 : Demonstrate effective planning abilities including the prevention, detection, radiation protection, diagnosis, and management of patient without compromising image quality.

PO4 : Apply ethical principles like radiation protection and commit to professional ethics and responsibilities and norms of the Imaging techniques practice.

PO5 : Conduct and present research and clinical studies which will contribute to the advancement of Imaging techniques, quality, diagnosis and health sciences.

PO6 : Explain theory of technology, instrumentation and physics in Medical Imaging using discipline specific terminology.

1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

	PEO1	PEO2	PEO3	PEO4	PEO5	PEO6
PO1	3	2	1	3	3	3
PO2	3	3	3	3	2	2
PO3	2	1	2	3	2	2
PO4	2	2	3	2	3	3
PO5	2	3	3	2	3	2
PO6	3	3	2	1	3	2

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

1.3.5 Program Outcome Vs Courses Mapping Table¹:

Program Outcome Courses	Course Name	PO1	PO2	PO3	PO4	PO5	PO6
Sem-1							
BIT104.1	Human Anatomy as Applied to Radiology & Imaging –I	3	3	3	2	3	2
BIT105.2	Human Physiology –I	3	3	2	3	3	3
BIT106.3	Basics & Radiation Physics -I	3	3	3	3	3	2
BIT107.4	English –I	3	2	2	3	2	3
BIT160.5	Human Anatomy as Applied to Radiology & Imaging –I (P)	3	3	3	2	3	2
BIT161.6	Human Physiology –I (P)	3	3	2	3	3	3
BIT156.7	Basic & Radiation Physics –I (P)	3	3	3	3	3	2
BIT162.8	English-I	3	2	2	3	2	2

Paper ID and Subject Code (For new Subject) will be allotted by the Controller of Examination Sharda University.

- **Value added courses are mandatory for each student of odd semester (List of VAC is enclosed as Annexure 1) and it is non-graded.**
- **Open elective course is mandatory for each student of even semester (List of approved open elective courses offered by the University are enclosed as Annexure 2 and it will be in audit mode and mandatory to pass it.**
- **In each academic session, project work will be provided to the students.**
- **Bachelor of Radiological and Imaging 7th semester/ 8th Semester (6months of mandatory Clinical training & Internship). Assessment based on Viva at the end of each semester and Project submission after the end of the Internship.**

C. Course Templates

SYLLABUS OF BRIT

School: SAHS		Batch : 2021-24	
Program: BMIT		Current Academic Year: 2021-2022	
Branch: All		SEMESTER: FIRST	
1	Course Code	BIT-104	
2	Course Title	Human Anatomy as Applied to Radiology & Imaging - I	
3	Credits	4	
4	Contact Hours (L-T-P)	3-1	
	Course Status	Compulsory	
5	Course Objective	1: Defining, listing and understanding basic anatomy of Human Body in reference to bone, joints, and blood . 2. Understanding, characterizing & explaining the anatomical details of the systems of human body with special emphasis on skelton system , CVS , Respiratory & digestive system . 3. Performing, demonstrating & implementing the concept of anatomy principles in the practice of imaging and radiation technology.	
6	Course Outcomes	CO1: Demonstrate the general and anatomical aspects to make the fundamental concepts of anatomy. CO2: Describe the composition , functions and applied related to bones and skelton system in human body . CO3: Demonstrate an understanding of Cardio Vascular System, its structure , functioning and related applied aspects . CO4: Discuss the basic principles of structure, functions and applied of respiratory system . CO5 Discuss the structure , functions and applied of Gastro Intestinal Tract in human body	
8	Outline syllabus		CO Mapping
	UNIT 1	Anatomical introduction	
	A	Introduction - human body as a whole, Definitions and terms of anatomy	CO1,CO2
	B	Positions and planes	CO1,CO2
	C	Types of muscle and difference between them	CO1,CO2
	UNIT 2	Bones and joints	CO1,CO2
	A	Classification of bones according to shape, development, regional, structural (macroscopically – compact bone and spongy bone) Parts of young and adult long bone	CO2
	B	CARTILAGE 1. Different types of cartilage (hyaline, fibro and elastic cartilage)	CO2

		(C)JOINTS 1.Classification of joints Fibrous joints with example, cartilaginous joints with example Synovial joint – types with example, diagram of typical synovial joint and its characteristic features			
	C	Lymphatic system Glands – difference between endocrine and exocrine glands			CO2
	UNIT 3	Circulatory system			CO3
	A	Heart - structure and function Blood supply of heart			CO3, CO1
	B	Systemic and pulmonary circulation			CO1, CO3
	C	Difference between artery and vein			CO3
	UNIT 4	Respiratory system			CO1, CO4
	A	Parts of respiratory system – (nose, nasal cavity, pharynx, larynx, trachea, lung, alveoli)			CO4
	B	Bronchopulmonary segments			CO4
	C	Lung and pleura Names of paranasal air sinuses			CO4
	UNIT 5	GIT			CO1, CO5
	A	Parts of GIT- gross anatomy and functions (oesophagus, stomach, small intestine and large intestine and liver)			CO5
	B	Difference between small and large intestine Functions of liver and gall bladder			CO5
	C	Oral cavity Names of main salivary glands			CO5

School: SAHS		Batch : 2021-24	
Program: BMIT		Current Academic Year: 2021-2022	
Branch: All		SEMESTER: FIRST	
1	Course Code	BIT-105	
2	Course Title	Human Physiology –I	
3	Credits	6	
.	Contact Hours (L-T-P)	3-1-2	
	Course Status	Compulsory	
5	Course Objective	1: Defining, listing and understanding basic Physiology of Human Body in reference to Nerve & Muscle, and blood . 2. Understanding, characterizing & explaining the physiological functions of the systems of human body with special emphasis on Heart , CVS , Respiratory & digestive system . 3. Performing, demonstrating & implementing the concept of Physiological principles in the practice of imaging and radiation technology.	
6	Course Outcomes	CO1: Demonstrate the general and nerve muscle physiology aspects to make the fundamental concepts of physiology. CO2: Describe the composition , functions and applied related to blood in human body . CO3: Demonstrate an understanding of Cardio Vascular System, its structure , functioning and related applied aspects . CO4: Discuss the basic principles of structure, functions and applied of respiratory system . CO5 Discuss the structure , functions and applied of Gastro Intestinal Tract in human body .	
8	Outline syllabus		CO Mapping
	UNIT 1	GENERAL & NERVE MUSCLE PHYSIOLOGY	CO1
	A	Components of cell, functions of cell organelles, transport across cell membrane, intercellular communication and body fluids , homeostasis & membrane potential.	CO1
	B	Structure , functions & classification of nerve tissues, physiological properties of nerve and nerve impulse & neuroglia.	CO1, CO2
	C	neuromuscular junction, Difference between skeletal muscle, smooth muscle & cardiac muscle.	CO1, CO3, CO4, CO5
	UNIT 2	BLOOD	CO2
	A	Composition & functions of blood, plasma proteins, blood volume & haemoglobin.	CO2
	B	Erythrocytes, jaundice, leucocytes & platelets	CO2,
	C	blood coagulation, blood groups, blood transfusion, Rh factor, Hematocrit value, ESR, Lymph , RE system & immunity	CO2& CO3
	UNIT 3	CARDIO VASCULAR SYSTEM	CO3
	A	Cardiac Muscle, physiological anatomy of the heart & blood vessels, cardiac cycle.	CO1&CO3

Beyond Boundaries

	B	Conducting system of heart, Heart sounds & ECG.			CO3
	C	Heart Rate, Cardiac Output, Blood Pressure & Pulse.			CO3
	UNIT 4	RESPIRATORY SYSTEM			CO4
	A	Physiological anatomy & functions of respiratory system , airways, dead space, graph of lung volume & capacities .			CO1& CO4
	B	Transport of Gases.			CO2, CO3 & CO4
	C	Regulation of respiration & Hypoxia			CO1& CO4
	UNIT 5	DIGESTIVE SYSTEM			CO5
	A	Physiological anatomy and functions of GIT, Saliva , Mouth & Oesophagus.			CO1& CO5
	B	Stomach, Pancreas, Liver & Gall Bladder. digestive juices and their functions.			CO1& CO5
	C	Small Intestine , Large Intestine , Digestion and Absorption in GIT.			CO1, CO3& .CO5

2	Course Title	Basics and Radiation Physics-I	
3	Credits	6	
4	Contact Hours (L-T-P)	3-1-2	
	Course Status	Compulsory	
5	Course Objective	1 : Defining, listing and understanding basic physics. 2. Understanding, characterizing, explaining, identifying and applying on machines. 3. performing, demonstrating, implementing and applying the concept of general physics in better understanding the relevance to imaging technology	
6	Course Outcomes	CO1: Describe the physics principles underlying the operation of medical imaging equipment; CO2: Demonstrate an understanding of and apply mathematical methods of image construction and processing; CO3: Demonstrate an understanding of aspects of clinical applications of imaging methods; CO4: Discuss basic principle of imaging machines and how to used with it CO5 Discuss issues in the operation of medical imaging equipments.	
8	Outline syllabus		CO Mapping
	UNIT 1	Basic physics	CO1, CO2
	A	Revision of mathematics related to radiography measurements and unit of C.G.S and M.K.S. system .Radiation units .	CO1, CO2
	B	Electrical charges, potential differences, current and resistance.	CO1, CO2
	C	Ohms low for electrical circuits, Direct current	CO1, CO2
	UNIT 2	EMI (Electromagnetic inductions)	
	A	Conductor, insulator and semi- conductor	CO1, CO3,
	B	Electrical power ammeters and voltmeters	CO1, CO2,
	C	Electromagnetism, Electromagnetic induction self and mutual Induction.	CO, CO2
	UNIT 3	Generators and transformers	
	A	Production of A.C. Generators High Frequency generators (Construction, working and Uses).	CO2
	B	The diode as rectifier and as an X-Ray tube components (target material, filament, tube housing.).	CO2
	C	Types of rectification and methods used in diagnosis of X-Rays,	CO1,CO2
	UNIT 4	X RAY Transformer	
	A	Transformers, Transformers losses (hysteresis loss, eddy correct, copper loss)	CO3
	B	construction regulations of transformers	CO3
	C	Types of transformers and its used in X-Ray apparatus .	CO3
	UNIT 5	Production of X ray	

	A	Thermionic emission and its application in x ray production, (bhrehmstrahlung,characteristic, binding energy, auger electron,), Vacuum, diode- variation of tubes current and anode ,cathode voltage.			CO4
	B	Interaction of X-Ray with matter (Compton, photoelectric, coherent, photodisintegration ,pair production)			CO4
	C	Application in diagnostic radiology, Advantages and Disadvantages of Each modality			CO5.CO6

2	Course Title	Human Anatomy as Applied to Radiology & Imaging - II	
3	Credits	6	
4	Contact Hours (L-T-P)	3-1-2	
	Course Status	Compulsory	
5	Course Objective	1: Defining, listing and understanding basic anatomy of Human Body in reference to bone, joints, and blood . 2. Understanding, characterizing & explaining the anatomical details of the systems of human body with special emphasis on skelton system , CVS , Respiratory & digestive system . 3. Performing, demonstrating & implementing the concept of anatomy principles in the practice of imaging and radiation technology.	
6	Course Outcomes	CO1: Demonstrate the types and function of joints and fracture CO2: Demonstrate the anatomy of reproductive system CO3: Demonstrate the radiological anatomy and surface anatomy CO4: Demonstrate the excretory system anatomy CO5 : Demonstrate the nervous system anatomy	
8	Outline syllabus		CO Mapping
	UNIT 1	<u>FRACTURE</u>	CO1
	A	Joints and fracture	CO1
	B	Dislocation (Types, Appearance, and practical assessment),	CO1, CO3
	C	Types of fracture and special view for fracture	CO1
	UNIT 2	Reproductive system	CO2
	A	General introduction to anatomy of Reproductive system	CO1, CO2
	B	Anatomical function of reproductive system	CO2
	C	Reproductive organs radiographic landmarks	CO2
	UNIT 3	RADIOLOGICAL ANATOMY/ SURFACE ANATOMY.	CO1, CO3

	A	Surface landmarks of all organs viscera	CO3
	B	Surface landmarks of all bones,	CO3
	C	Joints in relating to organs on the body for radiographic positioning-	CO3
	UNIT 4	Radiological anatomy and locations	CO1,CO3
	A	Anatomical terminology with regard to location of bones and organs.	CO3
	B	Anatomical sutures and skull	CO3
	C	Anatomical landmarks	CO3
	UNIT 5	Excretory system and nervous system	CO4,CO5
	A	General introduction to anatomy of excretory system	CO4,CO5
	B	Function and anatomy of excretory system	CO4,CO5
	C	General introduction to anatomy of nervous system	CO4,CO5

1	Course Code	BIT-110	
2	Course Title	Human Physiology –II	
3	Credits	6	
4	Contact Hours (L-T-P)	3-1-2	
	Course Status	Compulsory	
5	Course Objective	1: Defining, listing and understanding basic Physiology of Human Body in reference to Excretory system, Endocrine & Reproductive system . . 2. Understanding, characterizing & explaining the physiological functions of the systems of human body with special emphasis on nervous system and special senses. 3. performing, demonstrating & implementing the concept of Physiological principles in the practice of imaging and radiation technology.	
6	Course Outcomes	CO1: Demonstrate the Excretory system physiology in aspects to make the fundamental concepts of physiology. CO2: Describe the Endocrinology ,various hormone functions, regulation and applied related to it in human body . CO3: Demonstrate an understanding of male and female reproductive system , its structure , functioning and related applied aspects . CO4: Discuss the basic principles of structure, functions and applied of Central Nervous System . CO5 : Discuss the structure , functions and applied of special senses.	
8	Outline syllabus		CO Mapping
	UNIT 1	THE EXCRETORY SYSTEM	CO1
	A	Physiological anatomy of kidney, structure and functions of excretory system, structure of nephron & JG Apparatus	CO1
	B	Mechanism of formation of Urine. & mechanism of concentration and dilution of urine--- The Counter Current System .	CO1, CO4
	C	Physiology of micturition and Regulation of Body Temperature in Humans.	CO1, CO4
	UNIT 2	ENDOCRINE SYSTEM	CO2
	A	General principles of endocrinology, The pituitary Gland.	CO2& CO4
	B	The Thyroid Gland , The parathyroids , Calcitonin and Vitamin D.	CO2& CO4
	C	The Adrenal Cortex & Pancreas.	CO2& CO4
	UNIT 3	REPRODUCTIVE SYSTEM	CO3
	A	Changes during Puberty, Classification of Male sex hormones and their functions, Spermatogenesis & semen.	CO2, CO3&CO4
	B	Changes during Puberty, Classification and Functions of female sex hormones, menstruation, ovulation and contraception.	CO2, CO3 & CO4

Beyond Bound

	C	Physiological changes during pregnancy, functions of placenta and physiology of lactation.			CO2, CO3 & CO4
	UNIT 4	<i>THE NERVOUS SYSTEM</i>			CO4
	A	Organisation of Nervous system, The Synapse , Physiology of receptor organs for special and general sensation, physiology of reflex action, classification and properties of reflexes .			CO4
	B	Intro to Sensory and motor system. Functions of hypothalamus, thalamus, basal ganglia, cerebrum & cerebellum .			CO4
	C	Autonomic nervous system, Cerebrospinal Fluid and Blood Brain Barrier.			CO4
	UNIT 5	<i>SPECIAL SENSES</i>			CO5
	A	Taste and Smell.			CO4& CO5
	B	Vision—structure and function of eye, errors of refraction & their correction. colour blindness.			CO4& CO5
	C	Hearing—structure and function of ear, general outline of mechanism of hearing and perception of sound.			CO4 & CO5

	Course Status	Compulsory	
5	Course Objective	1 : Defining, listing and understanding basic physics. 2. Understanding, characterizing, explaining, identifying and applying on machines. 3. performing, demonstrating, implementing and applying the concept of general physics in better understanding the relevance to imaging technology	
6	Course Outcomes	CO1: Study about x ray tube components and its working,types CO2: Learn about protection of x ray tube and its methods CO3: Demonstrate an understanding of aspects Grids and filters, its types and uses CO4: Discuss basic principle of Ultrasound, production, applications uses in imaging technology CO5 Discuss basics principles, components of medical imaging equipments.	
8	Outline syllabus		CO Mapping
	UNIT 1	<i>X-Ray tube</i>	CO1, CO2
	A	Construction, types (coolidge, crooks,),	CO1, CO2
	B	working and new advancements in x ray tubes(rotation anode, stationary anode, Micro focus, heavy duty, grid controlled x ray	CO1, CO2
	C	Mammography X RAY tube, super rotalix x ray tube, angiography x ray tube, carbon nano x ray tube).	CO1, CO2
	UNIT 2	<i>Protection of x ray tube</i>	
	A	Diagnostic type method of heat dissipation,(conduction, convection, radiation ,fan AC ,OIL cooling) Failure measurement in Radiation exposure.	CO1, CO3,
	B	Scattered Radiation (primary, secondary, Tertiary) leakage, and its protection	CO1, CO2,
	C	Method to reduce scattered radiation (lead apron, lead goggles etc). Inverse square law	CO, CO2
	UNIT 3	<i>Grid and filters</i>	
	A	Grid and its types, moving , stationary, parallel, focused, cross grid, grid ratio, grid frequency, characterization of grid. Problems with grid like grid cut off	CO2
	B	Filters.(inherent, added, total ,wedge filters uses, composition, advantages, disadvantages),Beam limiting devices,(cones ,collimators, cylinders, diaphragm etc)	CO2
	C	Radioactivity,(types like particle or radiation) alpha, beta, gamma radiation, half life, decay constant, decay law ,isotopes	CO1,CO2

	UNIT 4	<i>Ultrasound/CT</i>			
	A	Basic Principles of ultrasound, and its types and uses, Production, piezoelectric affect ,Transducers , types of transducers			CO3
	B	Colour Doppler -principle and its applications in imaging technology			CO3
	C	Basic principle, generations of CT,CT Numbers (HU unit) HU Scale			CO3
	UNIT 5	<i>Fluoroscopy/Mammography/MRI</i>			
	A	Fluoroscopy Definition, Basic principle types (Direct, indirect)			CO4
	B	Mammography Principle, machine components and its working			CO4
	C	Nuclear magnetic resonance, magnetic resonance imaging. Basic principle, basic machine Components			CO4.CO5
	Mode of examination	Theory/Viva

1	Course Code	BIT-205
2	Course Title	Dark Room Procedure- I
3	Credits	6
4	Contact Hours (L-T-P)	4-1-2
	Course Status	Compulsory
5	Course Objective	<ol style="list-style-type: none"> Defining, listing and recognizing the x ray films and identify image artefacts and improve it.. Understanding, characterizing, explaining, identifying problems with x ray films and remove it from x ray film and improve image quality. Performing, demonstrating, implementing and applying the concept of darkroom related in better understanding the relevance Radiographic image.
6	Course Outcomes	CO1: To learn about the photographic process: Introduction, visible light, images produced by radiation, light sensitive photographic materials

		CO2: To learn about the Film processing: Development. The nature of development-manual or automatic. The PH scale CO3: To learn about the construction of x-ray film & its cross over effect CO4: To learn about the Intensifying screens and cassettes. Luminescence: fluorescence and phosphorescence CO5 : To learn about the Image characteristic: Real and mental images, reflected, transmitted and emitted light images Photographic emulsions		
8	Outline syllabus			CO Mapping
	UNIT 1	<u>Basic Principle of radiographic film</u>		CO1, CO3
	A	Fundamental of photographic emulsion, light sensitive materials, construction and emulsion formation.		CO1, CO2
	B	Formation of latent image. Chemical development of the latent image.		CO1, CO2
	C	Storage of X-Ray films and its transportation.		CO3, CO2
	UNIT 2	Grain Technology		
	A	Type of photography emulsion size of grain		CO2, CO4
	B	Advances in film grain technology		CO3, CO4,
	C	Speed of the films		CO3, CO4
	UNIT 3	Sensitometry		
	A	Evaluation of emulsion characteristic – density. Contrast and latitude – basic fog- characteristic curve.		CO3
	B	Mechanism of Lumiscence – fluorescence and phosphorescence. Fluorescent screens .		CO4
	C	Cassettes. Intensification factor. Size of crystals		CO4
	UNIT 4	X RAY films		
	A	(Construction,all types and its uses)(X-rays, material etc.)		CO4
	B	Cassettes- principle, Construction & types.		CO4
	C	CR Cassette (principle, Construction, function, working and uses), medical imaging films, laser imager, day light processing, dry processing.		CO4
	UNIT 5	Dark room Processing		
	A	Dark room Processing agents, Developing Agents		CO2
	B	Function and construction of the developer – standardization by time and temperature		CO2
	C	Process of development- latitude- exhaustion of developer – regeneration by replacement.		CO2,CO3

1	Course Code	BIT-207
2	Course Title	Apparatus of Radiography and Imaging-I
3	Credits	6
4	Contact Hours (L-T-P)	4-2-0
	Course Status	Compulsory
5	Course Objective	<ol style="list-style-type: none"> 1. Defining, listing and recognizing the imaging instruments and makes practices. 2. Understanding, characterizing, explaining, identifying parts of imaging equipments and how to use it. 3. Performing, demonstrating, implementing and applying the concept and physics of machines in better understanding the relevance Radiographic equipments.
6	Course Outcomes	CO1: To learn about its Principles and about related Equipment CO2: To know about CT scan, Historical development, its principle and applications

		CO3: To know about conventional, spiral (helical), Multislice, Historical development, its principle and applications CO4: To know about Computerized Radiography-: Principle, application, advantage & technique CO5 : To know about the reconstruction techniques of computed tomography.		
8	Outline syllabus	CO Mapping		
	UNIT 1	CO1, CO2		
		<u>Introduction</u>		
	A	Basic circuits of X-Ray machine, .		
	B	Construction and functioning of each part,		
	C	Component of x ray machine.		
	UNIT 2			
	A	Tomography- Advantages of various movement, linear, circular elliptical, hypocycloidal- Basic of Topographic principles-		
	B	Effects of operational angle, F.F.D., vibration blur, magnification- Estimation of relevant layer thickness and localization of required area by plain films and fluoroscopy-		
	C	Sequential tomography- Horizontal tomography- simultaneous multisession tomography		
	UNIT 3	<u>Basics of CT</u>		
	A	Computed Tomography equipment working, principle		
	B	Slip Ring Technology		
	C	Detectors and its types,		
	UNIT 4	<u>Generations Of CT</u>		
	A	Generations of CT		
	B	Axial CT		
	C	Helical CT, Multi detectors technology (MDCT)		
	UNIT 5	<u>Reconstruction Techniques</u>		
	A	All protocols in CT Imaging		
	B	Image reconstruction principle, mathematical, analog methods,		
	C	2D and 3D, RECON image reconstructions.		
	Mode of examination	Theory

3	Credits	6
4	Contact Hours (L-T-P)	4-2-0
	Course Status	Compulsory
5	Course Objective	<ol style="list-style-type: none"> 1. Defining, listing and recognizing the anatomical structure of the human body in relevant to radiographic techniques. 2. Understanding, characterizing, explaining, identifying and locating the anatomical structure of the human body irrespective to radiographic anatomy.. 3. Performing, demonstrating, implementing and applying the concept of general radiography in better understanding the relevance Radiographic Anatomy and understand diagnostic image. 4. Analyzing, categorizing, comparing and differentiating the

		anatomical structure of the human body by radiographic image and applying on imaging technology as radiographic anatomy	
6	Course Outcomes	CO1: To know regarding anatomical terminology and Positioning terminology CO2: To develop understanding about positioning of the upper limb CO3: To learn about Chest & Thorax Bones CO4: To learn to ensure availability of medical and diagnostic supplies CO5: To develop understanding about Selecting and performing basic views (projections) and conventional contrast	
8			CO Mapping
	UNIT 1	<u>Introduction of skeleton system</u>	CO1,CO2
	A	Individual bones of skeleton system of human body	CO1, CO2
	B	Different projections of bones.	CO1, CO2
	C	Different movements of joints	CO1
	UNIT 2	<u>Radiographic terminology</u>	
	A	Special projection, all radiographic projections	CO2
	B	Terminology and special projections.	CO2,
	C	With radiographic anatomy.	CO1, CO2
	UNIT 3	<u>Joints and movement</u>	
	A	Movement of all joints	CO1,C02
	B	Including flexion, extension, inversion, eversion	CO2,CO1
	C	Internal, external rotation, etc	CO1
	UNIT 4	<u>Upper limb projections</u>	
	A	All radiographic projections of upper limbs	CO2,C03
	B	Different views for fingers AP/LAT/Oblique ,thumb AP/Lat. oblique all special projection of thumb, Views for scaphoid bone	CO2
	C	Wrist, and, forearm, elbow s all special views, Clavicle .sterno-clavicular joint etc.	CO3

	UNIT 5	<u>Thorax projections</u>	
	A	Projection for shoulder joint,	CO3,C04
	B	Sternum.ac joint ,SC joint, clavicle,	CO4,C05
	C	Scapula and its views	CO4,CO5

Program: BMIT		Current Academic Year: 2022-2023
Branch: All		SEMESTER: FOURTH
1	Course Code	BIT-209
2	Course Title	Dark Room Procedure – II
3	Credits	6
4	Contact Hours (L-T-P)	4-2-0
	Course Status	Compulsory
5	Course Objective	<ol style="list-style-type: none"> 1. Acquire skills necessary for safe and effective darkroom practice, 2. Mix and store chemicals to perform at their optimum. 3. Choose materials suitable for the range of work to be undertaken 4. Describe the necessity for separate wet and dry areas 5. Develop an appreciation of print tonality on final interpretation of images.
6	Course Outcomes	CO1: To know about constitution of developing solutions both in

		manual and automatic processing and properties of developing chemicals. To learn about the Film processing: Development. The nature of development-manual or automatic. The PH scale. CO2: To learn about film processing: Fixing and role of a fixing solution. Constitution of the fixing solutions and properties of the constituents. Factors affecting the quality of fixer. CO3: To understand about Location To understand about Layout, To understand Illumination, To understand about related, Accessories & apparatus required CO4: To learn about the GRIDS types and cassettes CO5: To learn about factors and its affects in radiographic film.	
8		CO Mapping	
	UNIT 1	Developing	
	A	Types of developer used in radiography powder and liquid concentrates- standard high contrast and high energy developers-	CO1
	B	Ultra rapid development methods- increased temperature.	CO1
	C	Used of replenisher, Special ultra rapid developer combined developer/ fixer solutions.	CO1,CO2
	UNIT 2	Fixation	CO2
	A	- fixing agents- constituents of radiographic fixer and function of the chemicals fixation time exhaustion of fixer-	CO2
	B	Silver recovery combined with generation of fixer (electrolysis)- other silver recovery methods- rapid fixer.	CO2
	C	Film rinse- acid stop bath- washing of films static bath- water flow and rate of change- test for washing- film during methods	CO2
	UNIT 3	Film Processing	
	A	Practical processing- preparation of solutions- water supply mixing vessels- Order of mixing chemicals- stock, solutions and storage- storage of dry chemicals and liquid, concentrates.	CO2,CO3
	B	Processing apparatus – temperature control- immersion heaters- thermostat – ice cooling and refrigeration cooling. Type and care of hangers. Technical and processing faults	CO3
	C	Fog, static pressure, screen artifacts	CO3
	UNIT 4	Dark Room Lay out	
	A	The X-Ray dark room- minimum dimensions- planned circulation and	CO3

		layout – light proofing- ventilation- radiation protection- radiation and chemical proof materials.			
	B	Bench design, film hoppers, film makers, hanger location- Location of processing unit- Pass box, fixer or wash tank	CO3,CO4		
	C	Wet of dry viewing rooms following manual of automatic processing rapid drying apparatus- effects of circulation and layout planning of efficiency	CO3		
	UNIT 5	Factors affecting radiographic film			
	A	The radiographic image- effects of exposure factors on contrast details and image sharpness. Relationship between kilo voltage and exposure time and tube current (mAs), effects of distance, filtration, collimation, screens, Grids, film speed developers and processing techniques	CO4,CO5		
	B	Presentation of the radiograph- identification – orientation- technical information- techniques for film making action markers using radiation source, use of lead letters and numbers, accessories- viewing boxes- magnifier- high intensity localized viewers- projectors.	CO5		
	C	Dental mounts, films, films envelopes- filling system and units- stores viewers, Fluorescent screen photography- photofluorography, Cineradiography and cineradiography, Cassettes types- film magazines – manual and automatic operation.	CO5

3	Credits	6
4	ContactHours (L-T-P)	4-2-0
	Course Status	Compulsory
5	Course Objective	1.To develop understanding about Explanation of diagnosis and report to patient , if required 2.To develop understanding about Documentation of patient records: 3. To develop understanding about Procedure to patients - Explaining Do's and Don'ts to the patient
6	Course Outcomes	CO1: To develop understanding about Drugs in the x-ray department CO2: To learn How to handle: Children, Adult etc CO3: Learn how handle patient in special conditions CO4: To develop understanding about Preparation of the patient for

		special radiological procedure CO5: To develop understanding about Side effect and reaction of contrast media, classification of reactions of contrast media and treatment of contrast reactions		
8			CO Mapping	
	UNIT 1	Emergency Trolley		
	A	Trolley setting for special X-Ray examinations, like barium study, IVP study, HSG study,		
	B	Emergency trolley and drugs and		
	C	all type needle, syringe, Catheters, cannula.		
	UNIT 2	Safety		
	A	Safety of patient		
	B	Patient on traction, wheel chair, stretcher, infusion, blood transfusion, tracheostomy		
	C	anesthesia patient, Oxygen therapy.etc		
	UNIT 3	Patient care:-		
	A	Child patient care ,accidental patient ,MLC patient,		
	B	Anesthetized patient,patient on trolley traction etc.		
	C	Patient preparation of diabetes patient , preparation of infants		
	UNIT 4	Patient shifting		
	A	work with mobile x ray set		
	B	patient having oxygen therapy,		
	C	patient having intravenous infusion of fluid.		
	UNIT 5	Reactions		
	A	Contrast reactions		
	B	CM reaction management its managements		
	C	Drugs using management of contrast reaction in radiology department

3	Credits	6
4	Contact Hours (L-T-P)	4-2-0
	Course Status	Compulsory
5	Course Objective	<ol style="list-style-type: none"> 1. It is used to diagnose or treat patients by recording images of the internal structure of the body to assess the presence or absence of disease, foreign objects, and structural damage or anomaly 2. Understand standard positions for diagnostic imaging examinations. 3. Learn normal anatomy as seen on plain radiographs, magnetic

		resonance imaging (MRI), and X-ray computed tomography (CT). 4. Expand his/her knowledge of anatomy in all organ systems and its appearance on various imaging modalities (CT, MRI, ultrasound, etc). 5. Demonstrate the ability to use information technology and feedback to improve their fund of knowledge and skills.
6	Course Outcomes	CO1: To learn and understand to prepare the patient and the fluroscopy machine and room for the procedure CO2: To develop understanding regarding Ultrasound Scanning principal Display of images, modes Doppler ultrasound CO3: To know about Magnetic Resonance Imaging (MRI)-: Principle, application, its advantage over computed tomography or ultra sonography. Its limitations, uses & cross sectional anatomy. CO4: To develop understanding about Mammography, Equipment, Positioning and projections CO5: To learn about portable and mobile radiography and its uses,advantages,Disadvantages
8		CO Mapping
	UNIT 1	Fluoroscopy-
	A	Equipments, Image intensifier, IITV
	B	Dose measurements, dose hazards- limitation of K.V., mA. Focus – skin distance. Fluoroscopic timer
	C	Radiation protection to staff during fluoroscopy and associated examinations.
	UNIT 2	Ultrasound
	A	Construction and function of Imaging equipment like Ultrasound,Transducer,construction,fuction
	B	Doppler Ultrasound
	C	Applications of Doppler ultrasound
	UNIT 3	MRI
	A	MRI principle instrumentation,Magnetization,gradients,fuction of gradients
	B	Basic pulse sequence, spin echo, gradient echo and all its application as pulse sequences all,
	C	all using in MR Imaging protocols.
	UNIT 4	Soft Tissue radiogragraphy
	A	Soft tissue techniques-(Mammography) Equipments,working,applications
	B	non-screen techniques- simultaneous screen and non-screen technique-
	C	Digital Mammography
	UNIT 5	Portable X rays
	A	Portable x ray equipments,

	B	mobile x ray equipments, ward radiography equipments,			CO5
	C	C ARM equipment.			CO5

2	Course Title	Radiographic Technique of Extremities -II
3	Credits	6
4	Contact Hours(L-T-P)	4-2-0
	Course Status	Compulsory
5	Course Objective	1. This course will introduce to and familiarize the student with the basic routine of radiographic positioning, shielding techniques, and related terminology. 2. Describe student positioning terms, Demonstrate proper use of

		positioning skills, Cite the structures demonstrated on routine radiographic procedures, 3. Evaluate images for positioning, centering , appropriate anatomy and overall image quality, 4. Discuss equipment and supplies necessary to complete radiographic procedures 5. Apply general radiation safety and protection practices associated with radiologic examinations.		
6	Course Outcomes	CO1: To know regarding anatomical terminology CO2: To know regarding Exposure factors : Millie ampere, Kilovolt age CO3: Understand clinical observation of radiology department , radiographic procedures and x-ray equipment. CO4: Ability to define radiographic positioning terms , manipulate equipment properly, CO5: position and align anatomical structure and equipment, evaluate images for proper demonstration of anatomy and pathology.		
8			CO Mapping	
	UNIT 1	Introduction		
	A	Terminology of positioning,		CO1
	B	Projections,		CO1
	C	Movements of lower limb		CO1
	UNIT 2	Radiography of foot		
	A	Radiography of toes ,foot, ankle joint, (special view of ankle joint), tibia, fibula		CO1,CO2,CO4
	B	Radiography of Knee joints and its all special view		CO2,CO4
	C	Sky line and its methods		CO2,CO4
	UNIT 3	Radiography of thigh bone		
	A	Radiography of femur bone and its view		CO4,CO5
	B	Special view and techniques of femur		CO4,CO5
	C	View for pelvic and techniques		CO4,CO5
	UNIT 4	Radiography of thigh Pelvice		
	A	Radiography hip joint single and both ,pelvic		CO3,CO4
	B	special views of pelvice		CO4,CO5
	C	Radiography in Emergency situations.		CO4,CO5
	UNIT 5	Mescellaneous

	UNIT 1	<u>Radio Nuclide Imaging:</u>	<u>CO1, CO2</u>
	A	Basic principles of Nuclear medicine	CO1, CO2
	B	Instrumentations (Scintillation and detectors) of Radio Nuclide Imaging	CO1, CO2
	C	Radionuclide and their half life	CO1
	UNIT 2	<u>Nuclear medicine instrumentation</u>	
	A	Gamma camera, SPECT , PET scanner	CO1, CO2
	B	Production of radionuclide medicines, PET CT,PET MRI	CO1, CO2
	C	Bone radionuclide imaging	CO1, CO2
	UNIT 3	<u>Advancement in MRI</u>	
	A	MRI, spectroscopy, Functional MRI	CO5
	B	MR perfusion, diffusion	CO5
	C	MR angiography ,dynamic study, CSF Flow metry	CO5
	UNIT 4	<u>Advancement in USG</u>	
	A	Advancements in Ultrasound,	CO3
	B	Doppler ultrasound	CO3
	C	Advance application in Doppler US	CO3
	UNIT 5	<u>Advancement in CT</u>	
	A	CT advancement, Advancement on detector technology	CO4
	B	X ray tube	CO4
	C	CT applications like, dual source CT, Portable CT,	CO4

Program: BMIT		Current Academic Year: 2023-2024
Branch: All		SEMESTER: FIFTH
1	Course Code	BIT-309
2	Course Title	Radiation Hazards, Protection And Planning of The Department-I
3	Credits	4
4	Contact Hours (L-T-P)	3-1-0
	Course Status	Compulsory

5	Course Objective	<div>1. Defining, hands on practice and recognizing the imaging instruments and makes practices.</div> <div>2. Understanding, characterizing, explaining, identifying parts of imaging equipments and how to use it..</div> <div>3. Performing, demonstrating, implementing and applying the concept and physics of machines in better understanding the relevance Radiographic equipments.</div>
6	Course Outcomes	<div>CO1: Introduction to Radiation Hazards, To develop understanding for biological effect of radiation and Orientation to Radiation Protection</div> <div>CO2: Introduction to various radiation units – Roentgen, rad, rem, etc</div> <div>CO3: TO develop understanding for Dosimetry, various radiation measuring instruments</div> <div>CO3: To develop understanding for Principles and Methods of Radiation</div> <div>CO4: To know about AERB related guidelines, , ICRP recommendations, measurement of X-ray and other radiation, rules of AERB</div>
8	CO Mapping	
	UNIT 1	<u>Introduction of radiation hazards</u>
	A	Hazards and objectives
	B	Direct and indirect effects of radiation
	C	Principles of radiation protection and Methods of radiation protection
	UNIT 2	<u>Types of Radiation hazards on human body</u>
	A	Somatic Effects And Genetic Effects
	B	stochastic effect
	C	Deterministic effects
	UNIT 3	<u>Radiation effect</u>
	A	Radiation effects & hazards on pregnant women (tartogenic effect)
	B	Radiations units
	C	Radiation effect on DNA , RNA,,Radiation protection of female during radiographic examination
	UNIT 4	<u>Devices</u>
	A	Radiation detection devices
	B	Measurement devices
	C	Radiation Doses MPD (Maximum permissible
	UNIT 5	<u>Radiation protection</u>
	A	Radiation protective equipment
	B	Storage , handling and maintenance of radiation protective equipment/devices

	C	Role of different regulatory bodies regarding radiation protection in india			CO4,CO5

Understanding, characterizing, explaining, identifying parts of imaging equipments and how to use it. 6. Performing, demonstrating, implementing and applying the concept and physics of machines in better understanding the relevance Radiographic equipments.	
6	Course Outcomes	CO1: To learn about central nervous system and procedures CO2: To know about alimentary system and barium procedures CO3: To know about biliary system and techniques for biliary system procedures CO4: To know about liver and spleen radiography procedures CO5 : To know about the lymphatic system procedure	
8	Outline syllabus		CO Mapping
	Unit 1:	Central Nervous System	CO1,
	A	Routine projections for skull and spine- ventriculography and encephography	CO1
	B	Injection of contrast media- film series to cover all ventricular outlines	CO1
	C	Central angiography, Myelography – methods of contrast injection.	CO1
	Unit 2:	Alimentary System	
	A	Barium swallow , Pharynx and oesophagus contrast technique with valsalva manoeuvre – fistula	CO2
	B	Barium meal procedure for fluoroscopic examination of stomach, jejunum and colon appropriate timing- Diaphragmatic hernia- Post – operative examinations	CO2
	C	Barium meal follow through – plain film, erect, P.A., decubitus for abdominal , Barium enema- preparation of the patient- Administration of opaque medium- routine projections under fluoroscopic control, special techniques in colostomy, Hirschsprung's disease- double contrast enema with insufflation technique Insufflation. CT Colonoscopy	CO2
	Unit 3:	Biliary system	
	A	Routine projections for plain films differentiation of opacities in right hypochondrium (See genitor – urinary system) Respiratory movements.	CO3
	B	Oral cholecystography – preparation of the patient- advice on taking of oral opaque medium- reasons for non-appearance of opaque medium in system	CO3
	C	Intravenous cholecystography (I.V.C) Action of fatty meal- direct and indirect cholangiography- Demonstration of hepatic ducts. PTC – indication , patient preparation and technique	CO3

	UNIT 4:	Liver and spleen			
	A	Peumoperitoneum- fluoroscopy and radiography of diaphragmatic excursion – selective Aortogram – splenohepatic enography.			CO4
	B	Arthography – media for visualizing joint space-asepsie, special projections.			CO4
	C	Sinography- tracing of fistulae and inflammatory conditions by opaque media and fluoroscopic control.			CO4
	UNIT 5	Lymphatic system			
	A	soft tissue differentiation for regions concerned- calcification of glands-.			CO5
	B	technique for lymphography with colour tracer and opaque media			CO5
	C	Techniques for intraocular F.B. Technique for swallowed bones and obstructions to barium swallow- Techniques to locate non- opaque F.B- Technique for inhaled F.B.			CO5

	(L-T-P)	
	Course Status	Compulsory
5	Course Objective	<ol style="list-style-type: none"> 1. Defining, listing and recognizing the anatomical structure of the human body in relevant to radiographic techniques. 2. Understanding, characterizing, explaining, identifying and locating the anatomical structure of the human body irrespective to radiographic anatomy.. 3. Performing, demonstrating, implementing and applying the concept of general radiography in better understanding the relevance Radiographic Anatomy and understand diagnostic image. 4. Analyzing, categorizing, comparing and differentiating the anatomical structure of the human body by radiographic image and applying on imaging technology as radiographic anatomy
6	Course Outcomes	CO1: To know regarding anatomical terminology and Positioning terminology CO2: To develop understanding about positioning of the Thorax and sternum CO3: To learn about ct basic protocols CO4: To learn to about MRI protocols , angiography CO5: To learn about foetal radiography, dental and HSG radiography
8		CO Mapping
	Unit 1:	Basic Projection
	A	Projection of shoulder joint, sternum.
	B	S.I. Joint, Hip joint,
	C	patella, calcaneum , lordic view chest, Apicogram.
	Unit 2.	CT basic Protocol
	A	All different CT brain protocol HRCT temporal bone and 3d reconstruction
	B	All CT thorax(NCCT, CECT, HRCT) and abdomen protocol
	C	CT extremities protocols, VRT, SSD , MPR, MIP
	UNIT 3:	MRI Protocols
	A	All different MRI brain protocol
	B	All different MRI MSK (musko-skeltal) protocol (knee, shoulder, wrist, ankle, elbow, pelvis, bony pelvis etc.)
	C	Multiparametric MRI studies (prostate gland , breast MRI), MRI Dynamic studies
	UNIT 4:	CT and MRI Angiography and special investigation
	A	CT carotid angiography , head and neck angiography, peripheral angiography, coronary angiography, pulmonary angiography , abdominal aorta angiography, triple phase live
	B	MRI Brain angiography, Head and neck angiography, MRI epilepsy protocol , MRI pituitary dynamic study etc.

	C	CT and MRI enterography, CT renal angiography			CO5
	Unit 5	<u>Procedures for foetal and female infertility</u>			
	A	Techniques for evaluation of foetal development, maturity, abnormality, position and multiplicity – placentography - use of compensating filters--			CO5
	B	contrast media and soft tissue techniques – cystography and arteriography – pelvimerry - consolidation of radiation hazard – Cephalometry			CO5

DEPARTMENT OF RADIOLOGY
SCHOOL OF ALLIED HEALTH SCIENCES,
SHARDA UNIVERSITY, GREATER NOIDA
Rules for Internship Training Programme

1) For the Degree of Bachelor of Imaging Technology, the students after passing the professional examinations as per the syllabi prescribed by the Sharda University, students shall undergo Six Months compulsory rotatory internship training Programme to develop skill and acquire Technical & clinical knowledge with efficiently handle the imaging machines independently.

2) These rules shall be implemented by Department of Radiology, School of Allied Health Sciences, Sharda University, Greater Noida, The evaluation of the interns shall be done very carefully by the In- charge, Internship Training Programme and the Head of the concerned department on the basis of the technical skill, knowledge and ability to handle the imaging machines and cases independently. The Dean of the college shall have to monitor Internship Training Programme in collaboration with Heads of the Department and Program coordinators.

3) The Coordinator, Heads of the Program shall be responsible for the maintenance of standard and records of the interns.

General -

Internship is a phase of training where in a candidate is expected to learn technical skill , with fair independence in technical , where as to work under supervision at high risk areas; so that at the end of Internship he/ she is capable to handle the imaging machines independently.

The Rules & Regulations recommended by the Department of Radiology & , School of Allied Health Sciences,

- 1) The Dean of SAHS & HOD of radiology shall be authorized for implementation of Internship Programme & also for the issue of Internship completion certificate.
- 2) Internship shall commence not later than One week from the day of declaration of results of 3rd yr BRIT. Examination.
- 3) It shall be binding on the candidate to follow strictly, the code of conduct prescribed by the Department of Radiology,& School of Allied Health Sciences.
- 4) Compulsory Internship shall include rotational clinical assignments, Administrative skills over a period of 26 weeks.

On successful completion of Internship, to the satisfaction of the Programm coordinator, Head of Radiology Dept. & the Dean of SAHS, the Internship completion certificate shall be issued by the institution; and it will be forwarded to the Sharda University for the award of B.R.I.T. Degree.

OBJECTIVES -

Radiological imaging encompasses different imaging modalities and processes to image the human body for diagnostic and treatment purposes and therefore plays an important role in initiatives to improve public health for all population groups. Furthermore, Radiological imaging is frequently justified in the follow-up of a disease already diagnosed and/or treated.

At the end of Internship Programme, the candidate shall be able to-

- 1) Handle all imaging machines independently.
- 2) Understand the rationale & basic investigative approach to the Medical system & produced images with minimization of radiation dose without compromising diagnostic e quality effectively or make a timely decision for referral to appropriate specialty.
- 3) Demonstrate skill of managing patients attending duration imaging procedures, by developing skills to use appropriate manipulative techniques and methods
- 4) Develop ability to understand radiation hazard concepts and its protections & use of appropriate devices as per required investigations.

INTERNSHIP SCHEDULE -

Candidate shall be posted to four Rotational Technical assignments of total 26 weeks,

Modalities	Department/Place	Duration
CT Scan	Radiology Dept	5 weeks
MRI	Radiology dept	5 weeks
Digital/CR x ray/Special inv/Mammography	Radiology dept	4 weeks
Dental	School of Dental Sciences(Radiology dept)	4 weeks
OT (Ortho)/Cath Lab	Ortho Dept	4 weeks
Casualty	Casualty	4 weeks

EVALUATION-

During the rotational posting, student shall handle the imaging machines learn technical parameters and superficial clinical diagnosis on different modalities and handle the patients & also undertake skills of maintaining administrative records & Maintenance of equipment. The candidate shall maintain a **log book & record** all the events of the respective posting He /She shall be closely monitored by the Program coordinator and senior Technical staff in charge throughout the posting & the same shall also sign in the Log book on completion of the assignment.

There shall be Formative & summative assessment at the end of each of the 4 postings given in the schedules.

LEAVE FOR INTERNS -

An internee shall be entitled for maximum 6 days leave (not more than 3 days at a time) during six Months period of internship posting.

An internee will not be permitted to avail more than 2 days leave in any department. The leave other than C.L. will not be admissible.

Any leave in excess of above rule or absence from the work on any ground should be treated, as absence and the intern shall have to complete the required attendance as a repeat day.

Internees cannot avail casual leave without prior permission to Dean \Principal\HOD/Program coordinator of the college, in emergency interns should intimate within 24 hours, with supporting reasons to the Dean\ Principal \ HOD. Any student taking Leave without prior permission will be compensated for 2 days.

Working hours for interns are to be not less than 7 hours per day.

He\She can avail weekly off\ Sunday and national \Govt. holidays permissible to hospital with prior permission of Hospital Authority.

Issue of Internship completion certificate

Internee will be issued internship completion certificate by the Dean only after completion of internship training Programme satisfactorily.
