## Programme Structure

# Sharda School of Basic Sciences and Research <br> Department of Mathematics 

## M.Sc. (Mathematics)

Programme Code: SBR0301

Batch: 2023-25

## Vision, Mission and Core Values of the University

## Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

## Mission of the University

1. Transformative educational experience.
2. Enrichment by educational initiatives that encourage global outlook.
3. Develop research, support disruptive innovations and accelerate

## Core Values

1.Integrity
2. Leadership
3.Diversity
4.Community

## Vision and Mission of the School

## Vision of the School

Achieving excellence in the realm of science to address the challenges of evolving society.

## Mission of the School

1. Equip the students with knowledge and skills
2. Capacity building by providing academic flexibility to student and faculty members
3. To establish centre of excellence for innovative research
4. Address the deficiencies of the society pertaining to environment
5. To strengthen academic- industry collaboration for better employability
6. Developing a culture for continued betterment in all facets of life

## Vision and Mission Department of Mathematics

## Vision of the Department

To become a globally recognized destination for education in applied mathematics and research.

## Mission of the Department

1. To develop mathematical skills in students and make them employable across a wide range of professions and promote interest research.
2. To develop entrepreneurial skills in students to serve the society at large.
3. To develop skills for the applications of mathematics in the various fields.

## M. Sc. (Mathematics)

### 1.4 Programmeme Educational Objectives (PEO's)

PEO1: To deliver deep subject knowledge in the courses of study to enable students to shine in various fields such as sciences, engineering and technology, IT etc.

PEO2: To develop positive attitude and skills to enable the students to become a multi facet personality.

PEO3: To prepare students for entrance examinations conducted by IIT's/Universities to pursue Ph . D. Programmes as well as NET, UGC-CSIR.

PEO4: To develop students to be excellent to be excellent communicators and team players.

### 1.4.1 Programme Outcomes (PO's)

PO1: Mathematical knowledge: Application of Mathematical knowledge in various fields of science, engineering and management etc.

PO2: Nature of Mathematics: Understand the concise, precise and rigorous nature of Mathematics.

PO3: Critical thinking: Develop the skill to think critically on abstract concepts of Mathematics.

PO4: Problem analysis: Develop the ability to analyze a problem logically and dissect into micro-parts and thus resolving the problem to accessible components.

PO5: Mathematical logic and Ethics: Formulates and develops mathematical arguments in logical manner and Realize and understand professional, ethical and cultural responsibilities.

### 1.4.2 Programmeme Specific Outcomes (PSO's)

PSO1 : Scientific thinking and logical abilities.
PSO2 : Application of Mathematical principles in practical situations and software developments.

PSO3 : Analyze any problem to micro-levels and solve the problem step by step.
PSO4 : Owning up responsibility for logical comprehension and preparedness for constant improvement.

Mapping of PEOs with Mission Statements:

| PEO | School | School | School | School | School | School |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Statements | Mission | Mission | Mission | Mission | Mission | Mission |
| 1 | 2 | 3 | 4 | 5 | 6 |  |
| PEO1: | 3 | 2 | 3 | 1 | 2 | 3 |
| PEO2: | 3 | 2 | 3 | 1 | 2 | 3 |
| PEO3: | 3 | 3 | 3 | 3 | 3 | 3 |
| PEO4: | 3 | 2 | 3 | 1 | 3 | 3 |

## Real Analysis (MMT 101)

|  | ol: SSBSR | Batch: 2023-25 |
| :---: | :---: | :---: |
|  | gramme: M.Sc. | Academic Year: 2023-24 |
|  | ch: hematics | Semester: I |
| 1 | Course Code | MMT 101 |
| 2 | Course Title | Real Analysis |
| 3 | Credits | 4 |
| 4 | Contact Hours (L-T-P) | 4-0-0 |
|  | Course Status | Compulsory |
| 5 | Course Objective | 1. The objective of this course is to develop the knowledge of various concepts of Real numbers and their properties. <br> 2. The objective of this course is to develop a deeper and more rigorous understanding of Calculus including defining terms and proving theorems about sequences, series, limits, continuity, derivatives, the Riemann integrals, and sequences of functions. |
| 6 | Course <br> Outcomes | CO1: Explain functions between sets; equivalent sets; finite, countable and uncountable sets and some operations on real numbers. (K2,K4) CO2: Evaluate convergent, divergent, bounded, Cauchy and monotone sequences and series. (K2,K5) <br> CO3: Explain and determine the continuity, discontinuity and uniform continuity of functions. (K2,K3,K4) <br> CO4: Determine the uniform convergence of sequences and series. (K2,K3) <br> CO5: Evaluate convergence and divergence of sequences and series of functions. (K2,K5) <br> CO6: Describe and use the concepts of fundamental theorem of Integral calculus, Riemann Integral and Riemann - Stieltjes integral (K2,K3) |
| 7 | Course Description | This course is an introduction to the fundamentals of Real analysis. This provides the understanding of convergence, divergence, uniform convergence and absolute convergence of sequences and series of Real numbers. It gives an idea about continuity, discontinuity and uniform continuity of functions. It will be helpful in solving Real integrals. |

|  | C | Riemann - Stieltjes integral, refinement of partitions, <br> properties and some important theorems on Riemann - <br> Stieltjes integration | CO6 |  |  |

## STATISTICAL METHODS (MMT 104)

| School: SSBSR |  | Batch: 2023-25 |
| :---: | :---: | :---: |
| Programme: M. Sc. |  | Academic Year: 2023-24 |
| Branch: Mathematics |  | Semester: I |
| 1 | Course Code. | MMT104 |
| 2 | Course Title | STATISTICAL METHODS |
| 3 | Credits | 4 |
| 4 | Contact Hours (L-T-P) | 4-0-0 |
|  | Course status | Compulsory |
| 5 | Course Objectives | - To familiarise the students how to calculate and apply measures of location and measures of dispersion --grouped and ungrouped data cases and communicate quantitative data verbally, graphically, symbolically and numerically. <br> - To make students familiar with the concept of Probability and Statistics, discrete and continuous probability distributions to various business problems and theory of measure theory and integration of a measurable function with respect to a measure |
| 6 | Course Outcomes | CO1: Describe the overall process and particular steps in designing studies, collecting and analyzing data, interpreting and presenting results; Develop skills in presenting quantitative data using appropriate diagrams, tabulations and summaries. (K1, K2, K6) <br> CO2: Explain the basic concepts of probability, random variables, probability distribution, and joint probability distribution and describe the properties of discrete and continuous distribution functions. (K1,K2,K4) <br> CO3: Explain the fundamentals of measure theory and be acquainted with the proofs of the fundamental theorems underlying the theory of integration and illustrate measure theory random variables, independence, expectations and conditional expectations, product measures and discrete parameter martingales. (K2,K3,K4) <br> CO4: Explain the concept of length, area, volume using lebesgue's theory. (K2,K4) <br> CO5: Describe how these underpin the use of Mathematical concepts such as volume, area, and integration and evaluate the same. (K1,K2, K5) <br> CO6: Explain and illustrate the general principles of measure theory and integration in such concrete subjects as the theory of probability. (K2,K3,K4) |
| 7 | Course Description | In this course we will explore the use of statistical methodology in designing, analyzing, interpreting, and presenting experiments and observations. We will |

| 5 | Course Status <br> Objective | Compulsory <br> The goal of this course is to introduce the necessary mathematical <br> concepts for MATLAB and cover the syntax and semantics of <br> MATLAB including control structures, comments, variables, functions <br> etc. Once the foundations of the language have been established <br> students will explore different types of scientific Programmeming <br> problems including curve fitting, ODE solving etc. |
| 6 | Course <br> Outcomes | CO1: Describe the fundamentals of MATLAB and use MATLAB for <br> interactive computations. ( K2, K3) <br> CO2: Demonstrate with strings and matrices and their uses. (K2, K3) <br> CO3: Illustrate basic flow controls (if-else, for, while). (K3) <br> CO4: Create plots and export this for use in reports and presentations. <br> (K3, K5) <br> CO5: Develop Programme scripts and functions using the MATLAB <br> development environment. (K4, K5) <br> CO6: Write the Programme for evaluates linear system of equations, <br> ordinary differential equations in MATLAB. ( K5,K6) |
| 7 | Course <br> Description | The course will give the fundamental knowledge and practical <br> abilities in MATLAB required to effectively utilize this tool in <br>  <br> technical numerical computations and visualisation in other courses. <br> Synax and interactive computations, Programmeming in MATLAB |
| Outline syllabus |  |  |
| using scripts and functions, rudimentary algebra and analysis. One- |  |  |
| and two-dimensional graphical presentations. Examples on |  |  |
| engineering applications. |  |  |$|$| Introduction |
| :--- | :--- | :--- |

| A | Vector and matrix generation, Subscripting and the colon notation. |  |  | CO1 |
| :---: | :---: | :---: | :---: | :---: |
| B | Matrix and array operations and their manipulations, |  |  | CO1 |
| C | Introduction to some inbuilt functions. |  |  | CO1 |
| Unit 2 | Relational and Logical Operators |  |  |  |
| A | Flow control using various statement and loops including If-End statement, If-Else -End statement |  |  | CO1, CO3 |
| B | Nested If-Else-End Statement, |  |  | CO3 |
| C | For - End and While-End loops with break commands |  |  | CO3 |
| Unit 3 | m-files |  |  |  |
| A | Scripts and functions |  |  | CO2,CO5 |
| B | concept of local and global variable |  |  | CO2,CO5 |
| C | Few examples of in-built functions, editing, saving mfiles. |  |  | CO2,CO5 |
| Unit 4 | Two dimensional Graphics |  |  |  |
| A | Basic Plots, Change in axes and annotation in a figure |  |  | CO4 |
| B | multiple plots in a figure |  |  | CO4 |
| C | saving and printing figures |  |  | CO4 |
| Unit 5 | Applications of MATLAB |  |  |  |
| A | Solving a linear system of equations, |  |  | CO5, CO6 |
| B | Curve fitting with polynomials using inbuilt function such as polyfit, solving equations in one variable, |  |  | CO5, CO6 |
| C | Solving ordinary differential equations using inbuilt functions |  |  | CO5, CO6 |

## TOPOLOGY (MMT 107)

| School: SSBSR |  | Batch: 2023-25 |
| :---: | :---: | :---: |
|  | ramme: M.Sc. | Academic Year: 2023-24 |
| Branch: Mathematics |  | Semester: II |
| 1 | Course Code | MMT 107 |
| 2 | Course Title | TOPOLOGY |
| 3 | Credits | 4 |
| 4 | Contact Hours (L-T-P) | 4-0-0 |
|  | Course Status | Compulsory |
| 5 | Course Objective | This course provides an introduction to topics involving concepts of Topological space and separate axioms (Hausdorff space and base problems), Compactness (Urysohn's theorem), Connectedness With Nets(converge filter Zorn's lemma). |
| 6 | Course Outcomes | CO1: Explain the concept of Topological spaces and calculate interior, exterior limit point and boundary points. (K2, K3, K4) <br> CO2: Describe the concept of separate axioms and evaluate $T_{0}, T_{1}, T_{2}$ spaces, normal and completely normal spaces. (K1,K2, K5) <br> CO3: Discuss the compactness (Urysohn's theorem) and evaluate cover, open cover, finite sub cover, compact sets. (K1, K2, K5) <br> CO4: Explain Lindeloff space, locally compact, Map: continuous function and write Heine borel theorem, describe homeomorphism, open and closed map, compactness for continuous images. (K2,K4,K6) <br> CO5: Explain about separated sets, disconnectedness, totally disconnectedness, maximal connected set and illustrate component and path, locally connected and write Urysohn's theorem. (K2, K3, K4, K6) <br> CO6: Describe the concept of Nets and Filters and write zorn's lemma. (K1,K2, K6) |
| 7 | Course Description | This course provides an introduction to topics involving concepts of Topological space and separate axioms (Hausdorff space and base problems), Compactness (Urysohn's theorem), Connectedness With Nets (converge filter Zorn's lemma). The primary objective of the course is to develop the advance understanding of Topology. |
| 8 | Outline syllabus | CO <br> Mapping |

| Unit 1 | Topological space |  |  |
| :---: | :---: | :---: | :---: |
| A | Topology, weaker and stronger topology, indiscrete and discrete topology |  | CO1 |
| B | Co-finite and usual topology, interior, exterior |  | CO1 |
| C | limit point and boundary points. |  | CO1 |
| Unit 2 | Separation axioms |  |  |
| A | Base, sub-base and countability (first countable and second countable) |  | CO 2 |
| B | separation axioms: $T_{0}, T_{1}, T_{2}$ spaces, normal and completely normal spaces |  | CO 2 |
| C | regular and completely regular spaces, $T_{3}, T_{4}$ and Tychnoff space, Hausdorff space and based problems |  | CO 2 |
| Unit 3 | Compactness |  |  |
| A | Cover, open cover, finite sub cover, compact sets, finite intersection property |  | CO3 |
| B | Heine borel theorem, Lindeloff space, locally compact, Map: continuous function |  | CO3, CO4 |
| C | homeomorphism, open and closed map, compactness for continuous images |  | CO3, CO4 |
| Unit 4 | Connectedness |  |  |
| A | Separated sets, disconnectedness, totally disconnectedness, maximal connected set |  | CO5 |
| B | component and path, locally connected and based examples |  | CO5 |
| C | Urysohn's theorem (proof). |  | CO5 |
| Unit 5 | Nets |  |  |
| A | Binary relation, Directed set, residual subset, sequence convergence of a set |  | CO6 |
| B | cluster point, subnet. Filters: Filter, Cofinite filter, neighbourhood filter, filter base |  | CO6 |
| C | convergent filter and Zorn's lemma |  | CO6 |

DIFFERENTIAL GEOMETRY \& TENSOR ANALYSIS (MMT 108)

| School: SSBSR |  | Batch: 2023-25 |
| :---: | :---: | :---: |
| Programme: M. Sc. |  | Academic Year: 2023-24 |
| Branch: Mathematics |  | Semester: II |
| 1 | Course Code | MMT 108 |
| 2 | Course Title | DIFFERENTIAL GEOMETRY \& TENSOR ANALYSIS |
| 3 | Credits | 4 |
| 4 | Contact Hours (L-T-P) | 4-0-0 |
|  | Course Status | Compulsory |
| 5 | Course Objective | 1. Familiarise students with basic concept of local theory of curves: space curves, e.g., plane curves, tangent and normal and binormal; Osculating plane, normal lines and normal plane, curvature and torsion, rectifying plane; Helices, arc length, Serret-Frenet formulae. Have an idea of Bertrand curves and its properties, Contact between curve and surfaces, tangent surfaces, tangent vectors and vector fields, Fundamental theorems for space curves, involutes and evolutes of curves, Metric-first fundamental form and second fundamental form. <br> 2. Have an understanding of Normal curvature, quadratic form of normal curvature, mean curvature, Gaussian curvature and minimal surface, geodesics, canonical geodesic equations, normal properties of geodesics, geodesics curvature, lines of curvature, Rodrigue's formula. Know about Tensor calculus, Vector spaces, the dual spaces, tensor product of vector spaces, transformation formulae, contraction, inner product and outer product of two tensor. To know Contra variant and covariant tensors, mixed tensors of higher order, symmetric and skew-symmetric tensors, Quotient theorem, Reciprocal tensors, metric tensor, conjugate metric tensor with examples. Christoffel's symbols, covariant differentiation and Riemannian curvature tensor. |
| 6 | Course Outcomes | CO1: Describe the concept of local theory of curves: space curves, Osculating plane, normal lines and normal plane and explain curvature and torsion rectifying plane; Helices, arc length, Serret-Frenet formulae. (K1,K2,K4) <br> CO2: Explain the theory of curves: Bertrand curves, Contact between curve and surfaces, tangent surfaces, tangent vectors and vector fields and write Fundamental theorems for space curves, involutes and evolutes of curves describe Metric-first fundamental form and second fundamental form. | $\begin{aligned} & \hline 3.0 \\ & 1 \end{aligned}$ | (L-T-P) | (0-0-2) |  |  |  |
| 4 | Learning Hours | Contact Hours 30 <br> Project/Field Work 20 <br> Assessment 00 <br> Guided Study 10 <br> Total hours 60 |  |  |  |
| 5 | Course Objectives | 1. To expose our students to different social issues faced by the people in different sections of society. <br> 2. To connect their class-room learning with problem solving skills in real life scenario. |  |  |  |
| 6 | Course Outcomes | After completion of this course students will be able to: <br> CO1. Recognise social problems prevailing in different sections of society and finding the solution in sustainable manner. <br> CO2. Get practical exposure of all round development which complements their class room learning <br> CO3. These activities will add value to students, faculty members, school and university. <br> CO4. Apply their knowledge via research, and training for community benefit. <br> CO5. Analyze work on socio-economic projects with teamwork and timely delivery. <br> CO6. Survey will help to identify the gaps and create a plan to further improve the situation related to social problems prevailing in different sections of society and finding the solution in sustainable manner. |  |  |  |

At

| 7 | Theme | Major themes for research: <br> 1. Survey and self-learning: In this mode, students will make survey, analyse data and will extract results out of it to correlate with their theoretical knowledge. E.g. Crops and animals, land holding, labour problems, medical problems of animals and humans, savage and sanitation situation, waste management etc. <br> 2. Survey and solution providing: In this mode, students will identify the common problems and will provide solution/ educate rural population. E.g. air and water pollution, need of after treatment, use of renewable (mainly solar) energy, electricity saving devices, inefficiencies in cropping system, animal husbandry, poultry, pest control, irrigation, machining in agriculture etc. <br> 3. Survey and reporting: In this mode students will educate villagers and survey the ground level status of various government schemes meant for rural development. The analysed results will be reported to concerned agencies which will help them for taking necessary/corrective measures. E.g. Pradhan Mantri Jan Dhan Yojana, Pradhan Mantri MUDRA Yojana, Pradhan Mantri Jeevan Jyoti Bima Yojana, Atal pension Yojana, Pradhan Mantri Awas Yojana, Pradhan Mantri FasalBima Yojana, Swachh Bharat Abhiyan, Soil Health Card Scheme, Digital India, Skill India Programme, Beti Bachao, Beti Padhao Yojana, DeenDayal Upadhyaya Gram Jyoti Yojana, Shyama Prasad Mukherjee Rurban Mission, UJWAL Discom Assurance Yojana, PAHAL,Pradhan Mantri Awas Yojana-Gramin, Pradhan Mantri Yuva Yojana, Pradhan Mantri Jan Aushadhi Yojana, Pradhan Mantri KhanijKshetra Kalyan Yojana, Pradhan Mantri Suraksha Bima Yojana, UDAN scheme, DeenDayal Upadhyaya Grameen Kaushalya Yojana, Pradhan Mantri Sukanya Samriddhi Yojana, Sansad Adarsh Gram Yojana, Pradhan Mantri SurakshitMatritva Abhiyan, Pradhan Mantri RojgarProtsahan Yojana, Midday Meal Scheme, Pradhan Mantri Vaya Vandana Yojana, Pradhan Mantri Matritva Vandana Yojana, and Ayushman Bharat Yojana. |
| :---: | :---: | :---: |
| 8.1 | Guideline <br> s for <br> Faculty <br> Members | It will be a group assignment. <br> There should be not more than 10 students in each group. <br> The faculty guide will guide the students and approve the project title and help the student in preparing the questionnaire and final report. <br> The questionnaire should be well design and it should carry at least 20 questions (Including demographic questions). <br> The faculty will guide the student to prepare the PPT. <br> The topic of the research should be related to social, economical or environmental issues concerning the common man. <br> The report should contain 2,500 to 3,000 words and relevant charts, tables and photographs. <br> The student should submit the report to CCC-Coordinator signed by the faculty |

|  |  | guide by 15 April 2019. <br> The students have to send the hard copy of the report and PPT, and then only they will be allowed for ETE. |
| :---: | :---: | :---: |
| 8.2 | Role of CCCCoordinat or | The CCC Coordinator will supervise the whole process and assign students to faculty members. <br> 1. PG-M.Sc.-Semester II - the students will be allocated to faculty member (mentors/faculty member) in even term. <br> 2. UG- B.Sc.-Semester III - the students will be allocated to faculty member (mentors/faculty member) in odd term. |
| 8.3 | Layout of the Report | Abstract(250 words) <br> a. Introduction <br> b. Literature review(optional) <br> c. Objective of the research <br> d. Research Methodology <br> e. Finding and discussion <br> f. Conclusion and recommendation <br> g. References <br> Note: Research report should base on primary data. |
| 8.4 | Guideline for Report Writing | Title Page: The following elements must be included: <br> - Title of the article; <br> - Name(s) and initial(s) of author(s), preferably with first names spelled out; <br> - Affiliation(s) of author(s); <br> - Name of the faculty guide and Co-guide <br> Abstract: Each article is to be preceded by a succinct abstract, of up to 250 words, that highlights the objectives, methods, results, and conclusions of the paper. <br> Text:Manuscripts should be submitted in Word. <br> - Use a normal, plain font (e.g., 12-point Times Roman) for text. <br> - Use italics for emphasis. <br> - Use the automatic page numbering function to number the pages. <br> - Save your file in docx format (Word 2007 or higher) or doc format (older Word versions) <br> Reference list: <br> The list of references should only include works that are cited in the text and that have been published or accepted for publication. <br> The entries in the list should be in alphabetical order. <br> Journal article <br> Hamburger, C.: Quasimonotonicity, regularity and duality for nonlinear systems |

| 5 | Course Objective | To make effective presentations and to develop a range of writing processes appropriate to various writing tasks. Observe appropriate generic conventions and formats for technical documents. |  |
| 6 | Course Outcomes | CO1: Describe the concept how to write effective reports and effective proposals. <br> CO2: Explain the how to implement the basics of Presentation. Practise the general guidelines of technical presentation. Practise use of graphics in data presentation. . <br> CO3: Discuss how to prepare effective technical documentation. Practise various research techniques using internet. <br> CO4: Demonstrate the structure and content of synopsis and dissertation. <br> CO5: Describe how to write bibliographies. <br> CO6: Write various kinds of business letters and emails effectively. Practice oral presentation skills through public speaking and oral presentation of reports. Present a research topic effectively |  |

## ABSTRACT ALGEBRA (MMT 201)

| School: SSBSR | Batch: 2023-25 |  |
| :--- | :--- | :--- |
| Programme: M. Sc. | Academic Year: 2023-24 |  |
| Branch: <br> Mathematics | Semester: III |  |
| 1 | Course Code. | MMT-201 |
| 2 | Course Title | ABSTRACT ALGEBRA |
| 3 | Credits | 4 |
| 4 | Contact Hours <br> (L-T-P) | 4-0-0 <br> 5Course status <br> Objective |
| Compulsory1. To familiarise students with basic concepts of group, subgroup, <br> quotient group and permutation groups, and given an idea of the <br> normal subgroup, sylow groups, internal and external direct product. <br> 2. To make students familiar with the concept of homomorphism, <br> isomorphism, automorphism and inner- automorphism, different <br> algebraic structures ring, integral domain, field, ideal and quotient <br> ring, prime and maximal ideal, Irreducible polynomials, principal <br> ideal domains and unique factorization domains. Know about <br> Extension of fields: algebraic extensions, roots of polynomials and <br> splitting fields. |  |  |
| 6 | Course <br> Outcomes | CO1: Explain and illustrate the concept of group, subgroup, quotient <br> group and permutation groups.(K2,K3,K4) <br> CO2: Describe the normal subgroup, sylow groups and evaluate <br> internal and external direct product. (K1,K2,K5) <br> Description <br> CO3: Explain the concepts of homomorphism, isomorphism and <br> analysis automorphism and inner- automorphism. (K2,K4) <br> CO4: Discuss about ring integral domain, field ideal and quotient ring, <br> prime and maximal ideal. (K2) <br> CO5: Evaluate irreducible polynomials, principal ideal domains and <br> unique factorization domains. (K5) <br> CO6: Explain about Extension of fields: algebraic extensions and <br> evaluate roots of polynomials and splitting fields. (K2,K4,K5) |
|  | This course is an introduction to concept of groups, normal <br> subgroups. The primary objective of the course is to develop the <br> understanding of rings and fields. |  |

FUNCTIONAL ANALYSIS (MMT 205)

|  | ol: SSBSR | Batch: 2023-25 |
| :---: | :---: | :---: |
|  | ramme: M.Sc. | Academic Year: 2023-24 |
|  | ch: hematics | Semester: III |
| 1 | Course Code | MMT 205 |
| 2 | Course Title | FUNCTIONAL ANALYSIS |
| 3 | Credits | 4 |
| 4 | Contact Hours (L-T-P) | 4-0-0 |
|  | Course Status | Compulsory |
| 5 | Course Objective | To familiarise students with basic concepts of Functional analysis and given an idea of implemented the concepts of Elementary understanding of Normed linear spaces. Can perform basic Bounded linear operator and Know how to calculate system of Inner product spaces. Understand the basic concept of functional analysis and learn basic definitions and terminology associated with to functional analysis. |
| 6 | Course Outcomes | CO1: Describe the basics of functional analysis, normed linear spaces, Holder's inequality, Minkowski's inequality and explain $l^{p}$ spaces, equivalence of norms and calculate banach spaces. (K2, K3, K4) <br> CO2: Explain bounded linear spaces, finite dimensional normed space and compactness and evaluate dual of normed spaces $\mathfrak{R}^{n} ; l^{p}$ also of C[a, b]). (K2,K4,K5) <br> CO3: Discuss the concept of open mapping and closed graph theorems, explain uniform boundedness principle and its applications.(K1,K2,K4) <br> CO4: Write Hahn-Banach theorem and its consequence. (K6) <br> CO5: Illustrate Inner product spaces, Hilbert spaces with examples and write Projection theorem, Bessel's inequality, existence of complete orthonormal basis of a Hilbert space Riesz representation theorem. (K3,K6) <br> CO6: Describe the concept of bounded linear functional, Hilbert adjoint operator, self adjoint operator, Compact operators and write |

A.

|  |  | Riesz-Schauder theorem. (K1,K2,K6) |  |
| :---: | :---: | :---: | :---: |

Graph Theory and its Application (MMT 209)

| School: SSBSR |  | Batch: 2023-25 |
| :---: | :---: | :---: |
| Programme: M.Sc. |  | Academic Year: 2024-25 |
| Branch: Mathematics |  | Semester: III |
| 1 | Course Code | MMT-209 |
| 2 | Course Title | Graph Theory and its Application |
| 3 | Credits | 4 |
| 4 | Contact Hours (L-T-P) | 4-0-0 |
|  | Course Status | Compulsory |
| 5 | Course Objective | The goal of this course is to introduce the necessary mathematical concepts of relevant vocabulary from graph theory and combinatory, and know the statements and proofs of many of the important theorems in the subject, and be able to perform related calculations. |
| 6 | Course Outcomes | CO1: Describe the basic concept of graphs and evaluate distances, radius, diameter, centre of a graph, the number of distinct spanning trees in a complete graph. (K2,K4,K5) <br> CO2: Explain the concept of tree and write Kruskal and Prim algorithms, Huffman's algorithm. (K2,K4,K6) <br> CO3: Discuss about matching of graphs and write the theorems related to matching. (K1,K2,K6) <br> CO4: Describe graph colouring, chromatic number, bounds on chromatic numbers and write Greedy algorithm. (K2,K6) <br> CO5: Discuss interval graphs and chordal graphs, chromatic polynomials and write Brook's theorem. (K1, K2, K6) CO6: Explain Hamilton property, Non-Hamiltonian graphs, Nonplanarity of K5 and K3,3, classification of regular polytopes and write 5-colour theorem. Ramsey theory. (K2,K4,K6) |
| 7 | Course Description | This course covers the theory of graphs and networks for both directed and undirected graphs. Topics include graph isomorphism, Eulerian and Hamiltonian graphs, matching, covers, connectivity, coloring, and planarity. There is an emphasis on applications to real world problems and on graph algorithms such as those for spanning trees, shortest paths, and network flows. |

|  |  | Chvatal's theorem and toughness of a graph. |  |
| :--- | :--- | :--- | :--- |
|  | B | Non-Hamiltonian graphs with large vertex degrees. <br> Planar graphs Embedding a graph on plane, Euler's <br> formula. | CO6 |
| C | Non-planarity of K5 and K3,3, classification of <br> regular polytopes, Kuratowski's theorem (no <br> proof), 5-colour theorem. Ramsey theory. | CO6 |  |
| Mode of <br> examination | Theory |  |  |
| Weightage <br> Distribution | CA | MTE | ETE |

FLUID DYNAMICS (MMT 204)

| School: SSBSR |  | Batch: 2023-25 |
| :--- | :--- | :--- |
| Programme: M.Sc. | Academic Year: 2023-24 |  |
| Branch: Mathematics | Semester: III |  |
| 1 | Course Code | MMT-204 |
| $\mathbf{2}$ | Course Title | FLUID DYNAMICS |
| 3 | Credits | $\mathbf{4}$ |
| 4 | Contact Hours |  |
| (L-T-P) | 4-0-0 |  |
| 5 | Course Status | Cbjective |
| 6 | Compulsory <br> The goal of this course is to introduce the necessary mathematical <br> concepts for analysing fluid dynamics. Learn to perform integral <br> analyses and overall balances from conservation laws and <br> differential equations analyses for fields. Understand modelling <br> approximations such as inviscid, incompressible, and turbulent for <br> different types of flows. |  |
| 8 | Outline syllabus | Coutcomes |
| CO1: Explain the definition, properties and classification of fluid; define <br> Pascal's law and write basic hydrostatic equation, Buoyancy and <br> Archimedes' principle. (K1, K2,K4,K6) <br> CO2: Describe the streamlines, path lines and streak lines, <br> steady/unsteady, uniform/non-uniform, one-two dimensional flows and <br> evaluate velocity and acceleration in an Eulerian flow field. (K1,K2,K5) <br> CO3: Explain equations for stream function, velocity potential function <br> in rectangular and cylindrical co-ordinates and discuss the concept of <br> equations for source, sink, irrotational vortex, circulation.(K1,K2,K4) <br> CO4: Explain and apply Integral equations for the control volume: using <br> Reynold's Transport theorem. (K2,K3,K4) <br> CO5: Explain equations for conservation of mass, energy and <br> momentum and write Bernoulli's equation and its application. <br> (K2,K4,K6) <br> CO6: Apply Mass conservation in 2 dimension in rectangular co- <br> ordinates, Euler's equations in 2,3 dimensions and subsequent derivation <br> of Bernoulli's equation and write Navier-Stokes equations.(K3,K4,K6) |  |  |
|  | Course <br> Description | This course is an introduction to basics concept of velocity field, <br> fluid statics, basic conservation laws for systems and control <br> volumes, dimensional analysis and similitude, Euler and Bernoulli <br> equations, NavierStokes equations, viscous flows, boundary-layer <br> flow in channels and around submerged bodies, applications. |

## Number Theory with Cryptography (MMT 206)

| School: SSBSR |  | Batch: 2023-25 |  |
| :---: | :---: | :---: | :---: |
| Programme: M.Sc. |  | Academic Year: 2024-25 |  |
| Branch: Mathematics |  | Semester: III |  |
| 1 | Course Code | MMT 206 |  |
| 2 | Course Title | Number Theory with Cryptography |  |
| 3 | Credits | 4 |  |
| 4 | Contact Hours (L-T-P) | 4-0-0 |  |
|  | Course Status | Compulsory |  |
| 5 | Course Objective | To make students familiar with the basic concepts of number theory, congruence. Also students are able to understand public \& private key cryptography. |  |
| 6 | Course Outcomes | CO1: Explain the basic concepts of number theory and calculate GCD, LCM; write factorization theorem, Euclid theorem, and Prime number theorem. (K2,K3,K4,K6) <br> CO2: Discuss about congruences along with solutions, residue system, write Fermat's little theorem, Wilson theorem, Chinese remainder theorem, Hansel lemma and calculate Primitive roots. (K1,K2,K5,K6) <br> CO3: Describe classical encryption techniques, Substitution ciphers and transposition ciphers, modern block ciphers principles, public \& private key cryptography, write RSA algorithm. (K2,K6) <br> CO4: Discuss and write Gauss lemma, Legendre symbol, quadrqtic reciprocity law, Jacobi symbol.(K2,K6) <br> CO5: Explain the greatest integer function, Euler's totient function, the number of divisors function.(K2,K4) <br> CO6: Discuss and evaluate the sum of divisors function, Mobius mu function, Mobius inversion formula. (K1,K2,K5) |  |
| 7 | Course <br> Description | This course is an introduction to basics of number theory with cryptography, congruences, quadratic residues, some standard arithmetic functions. |  |
| 8 | Outline syllabus :Number theory with Cryptography (MMT-206) |  | CO Mapping |
|  | Unit 1 | BASICS |  |
|  | A | Primes, Divisibility, Euclid's algorithm, GCD, LCM, expressing. | CO1 |

| B | GCD as a linear combination of the numbers, Unique factorization theorem, Euclid's theorem on infinitude of primes. |  | CO1 |
| :---: | :---: | :---: | :---: |
| C | Idea of existence of large gaps between primes, Statement of prime number theorem. |  | CO1 |
| Unit 2 | CONGRUENCES |  |  |
| A | Definition, Residue system modulo m, Fermat's little theorem, Euler's generalization of Fermat's theorem. |  | CO 2 |
| B | Wilson's theorem, Solution of congruences, Chinese remainder theorem. |  | CO 2 |
| C | Hansel's lemma, Prime power moduli, Primitive roots. |  | CO 2 |
| Unit 3 | CRYPTOGRAPHY |  |  |
| A | Classical encryption techniques, Substitution ciphers and transposition ciphers, Modern block ciphers and Block ciphers principles. |  | CO 3 |
| B | Public key Cryptography: Public keys, Encrypting the message. |  | CO 3 |
| C | Private keys, decrypting and retrieval of the original message (RSA algorithm). |  | CO3 |
| Unit 4 | QUADRATIC RESIDUES |  |  |
| A | Gauss lemma. |  | CO4 |
| B | Legendre symbol, Jacobi symbol. |  | CO4 |
| C | Quadratic reciprocity law. |  | CO4 |
| Unit 5 | SOME STANDARD ARITHMETIC FUNCTIONS |  |  |
| A | The greatest integer function, Euler's totient function. |  | CO5 |
| B | The number of divisors function, The sum of divisors function. |  | CO6 |
| C | Mobius mu function, Mobius inversion formula. |  | CO6 |

MEASURE THEORY(MMT 202)

| School: SSBSR | Batch: 2023-25 |  |
| :--- | :--- | :--- |
| Programme: <br> B.SC | Academic Year: 2024-25 |  |
| Branch: <br> Mathematics | Semester: IV |  |
| 1 | Course Code | MMT 202 |
| 2 | Course Title | MEASURE THEORY |
| 3 | Credits | 4 |
| 4 | Contact <br> Hours <br> (L-T-P) | 4-0-0 <br> 5 |
| Course Status <br> Objective | Compulsory <br> This course provides an introduction to topics involving concepts of <br> Topological space, $\sigma$-algebra of measurable sets, Borel sets, measurable <br> functions, Lebesgue measure, integration of complex functions and <br> linear functional. |  |
| 6 | Course <br> Outcomes | CO1: Explain the concept of Topological spaces and calculate interior, <br> exterior limit point and boundary points. (K2, K3, K4) <br> CO2: Describe the concept of approximation of measurable functions, explain <br> Lebesgue's monotone convergence theorem and Fatou's lemma and evaluate <br> integration of positive functions, term by term differentiation of a series of <br> positive measurable functions. (K1,K2, K5) <br> CO3: Discuss the integration of complex function.(K1, K2) <br> CO4: Explain Lebesgue's dominated convergence theorem, role of sets <br> of measure zero, write extension of a measure to a complete measure. <br> (K2,K4,K6) <br> CO5: Explain integration as linear functional, Topological ingredients <br> and write positive Borel measure, Hausdorff spaces. (K2, K3, K4, K6) <br> CO6: Describe the concept locally compact Hausdorff spaces, support of a <br> complex function, vector space of continuous complex functions with <br> compact support and write Urysohn's lemma, Riesz representation <br> theorem. (K1,K2, K6) |
| 7 | Course <br> Description | This course provides an introduction to topics involving concepts of <br> Topological space and separate axioms, $\sigma$-algebra of measurable sets, <br> Borel sets, measurable functions, Lebesgue measure, integration of <br>  <br> complex functions and linear functional. The primary objective of the <br> course is to develop the advance understanding of Measure Theory. |

|  |  |  |  | Mapping |
| :---: | :---: | :---: | :---: | :---: |
| Unit 1 | Preliminaries: |  |  |  |
| A | Topological spaces, continuous functions |  |  | CO1 |
| B | $\sigma$-algebra of measurable sets, Borel sets, measurable functions |  |  | CO1 |
| C | lim sup and liminf of sequence of functions. |  |  | CO1 |
| Unit 2 | Lebesgue measure: |  |  |  |
| A | Approximation of measurable functions by simple functions, positive measures |  |  | CO 2 |
| B | Integration of positive functions, Lebesgue's monotone convergence theorem |  |  | CO 2 |
| C | Term by term differentiation of a series of positive measurable functions, Fatou's lemma. |  |  | CO 2 |
| Unit 3 | Integration of complex functions: |  |  |  |
| A | Complex measurable functions, integration of Complex measurable functions |  |  | CO3 |
| B | Lebesgue's dominated convergence theorem, role of sets of measure zero |  |  | CO3, CO4 |
| C | Extension of a measure to a complete measure. |  |  | CO3, CO4 |
| Unit 4 | Integration as a linear functional: |  |  |  |
| A | Positive Borel measure, vector spaces |  |  | CO5 |
| B | Integration as a linear functional, Topological ingredients |  |  | CO5 |
| C | Definition of compactness and Hausdorff spaces. |  |  | CO5 |
| Unit 5 | Riesz representation theorem: |  |  |  |
| A | Locally compact Hausdorff spaces, support of a complex function |  |  | CO6 |

LINEAR PROGRAMMEMING (MMT 203)

|  | ol: SSBSR | Batch :2022-24 |
| :---: | :---: | :---: |
|  | ramme: <br> c. | Academic Year: 2024-25 |
|  | ch: hematics | Semester: IV |
| 1 | Course Code | MMT 203 |
| 2 | Course Title | LINEAR PROGRAMMEMING |
| 3 | Credits | 4 |
| 4 | Contact Hours (L-T-P) | 4-0-0 |
|  | Course Status | Compulsory |
| 5 | Course Objective | To make students familiar with the concepts of simple analytical Methods to solve L.P.P., queuing theory with kendall's notations, inventory control with ABC analysis, Project Management (CPM \& PERT). |
| 6 | Course Outcomes | CO1: Discuss the origins of Operation Research, formulate the problems in L.P. and solve it by graphical. (K1, K3, K6) <br> CO2: Explain analytical Methods: Simplex, Big M, Primal and Dual problems and discuss about economic interpretation of dual. (K2,K3, K4) <br> CO3: Describe queuing theory and Kendall's Notations and formulate M/M/1: $\infty /$ FCFS model illustrate with example. (K2, K3, K6) <br> CO4: Explain inventory classifications and develop economic order quantity models. (K2, K4, K6) <br> CO5: Explain ABC analysis. (K2,K4) <br> CO6: Describe the concept of CPM and PERT and calculate float calculation and Cost reduction by Crashing of activities. (K1, K2,K3) |
| 7 | Course Description | This course is an introduction to concept of linear Programmeming problems. The primary objective of the course is to develop the understanding of queuing theory with kendall's notations, inventory control with ABC analysis, Project Management (CPM \& PERT). |
| 8 | Outline syllabus |  |

|  |  |  |  | Mapping |
| :---: | :---: | :---: | :---: | :---: |
| Unit 1 | Origin of Operation Research |  |  |  |
| A | Origin of Operation Research, Historical Standpoint, Methodology, Different Phases. |  |  | CO1 |
| B | Characteristics, Scope and Application of Operations Research. Introduction. |  |  | CO1 |
| C | Requirement of LP, Basic Assumptions, Formulation of LP, General Statement of LP, Solution techniques of LP: Graphical Methods. |  |  | CO1 |
| Unit 2 | Analytical Methods |  |  |  |
| A | Analytical Methods: Simplex. |  |  | CO2 |
| B | Big M, Primal and Dual Problems. |  |  | CO 2 |
| C | Economic Interpretation and Dual Simplex Method. |  |  | CO2 |
| Unit 3 | Queuing Theory |  |  |  |
| A | Basis of Queuing theory, elements of queuing theory. |  |  | CO3 |
| B | Kendall's Notation, Operating characteristics of a queuing system, Classification of Queuing models. |  |  | CO3 |
| C | Preliminary examples of M/M/1: $\sim$ /FCFS. |  |  | CO3 |
| Unit 4 | Inventory Control |  |  |  |
| A | Inventory classification, Different cost associated to Inventory. |  |  | CO4 |
| B | Economic order quantity, Inventory models with deterministic demands |  |  | CO4 |
| C | ABC analysis. |  |  | CO4, CO5 |
| Unit 5 | Project Management |  |  |  |
| A | Introduction to PERT and CPM, critical Path calculation. |  |  | CO6 |
| B | Float calculation and its importance. |  |  | CO6 |
| C | Cost reduction by Crashing of activity. |  |  | CO6 |
| Mode of examination | Theory |  |  |  |
| Weightage Distribution | CA | MTE | ETE |  |
|  | 25\% | 25\% | 50\% |  |

DISCRETE MATHEMATICS (MMT 208)

| School: SSBSR |  | Batch: 2023-25 |
| :--- | :--- | :--- |
| Programme: M.Sc. | Academic Year: 2024-25 |  |
| Branch: Mathematics |  | Semester: IV |
| 1 | Course Code | MMT-208 |
| 2 | Course Title | DISCRETE MATHEMATICS |
| 3 | Credits | Contact Hours |
| (L-T-P) | Course Status | 4-0-0 |
| 5 | Course Objective | $\begin{array}{l}\text { Compulsory } \\ \text { This course is aimed to provide an advance understanding to the sets } \\ \text { and propositions, relations and functions, permutation and } \\ \text { combination, graphs, groups and rings. }\end{array}$ |
| 6 | Course Outcomes | $\begin{array}{l}\text { CO1: Discuss the concept of sets, un-countably infinite sets, principle } \\ \text { of inclusion and exclusion, multisets, propositions, conditional } \\ \text { propositions and evaluate normal forms, Mathematical } \\ \text { induction.(K2,K3, K4,K5) }\end{array}$ |
| $\begin{array}{l}\text { CO2: Describe the concept functions, composition of function, } \\ \text { invertible functions, discrete properties of binary relations and check } \\ \text { the closure of relations. (K3, K6) }\end{array}$ |  |  |
| CO 3: Explain the concept of POSET and lattices, Warshall's |  |  |
| algorithm, Equivalence relations and partitions and evaluate Chains, |  |  |
| and Anti-chains. Generating Functions, Recurrence relations and |  |  |
| discuss linear recurrence relations with constant coefficient, |  |  |
| homogeneous solution, total solutions, solutions by method of |  |  |
| Generating function. (K2, K4,K5) |  |  |
| CO 4: Illustrate the concept permutations and combinations: rule of |  |  |\(\left.\} \begin{array}{l}sum and product, write the algorithms for generation of permutations <br>

and combination.(K3, K5,K6) <br>

CO 5: Discuss the concept graph, sub-graph, Walks, Path and circuits,\end{array}\right\}\)| Connected graphs, Disconnected graphs and component, evaluate the |
| :--- |
| fundamental circuits, distance, diameters, radius and pendant vertices, |
| rooted and binary trees (K1,K2,K5,K6) |
| CO6: Demonstrate the understanding of Algebraic systems, Group |
| and evaluate Semi-groups, Monoid, Subgroups, Isomorphism and |
| Automorphism. (K2, K5) |

| 7 | Course Description | This course is given the deep knowledge of sets and propositions, relations and functions, permutation and combination, graphs, groups and rings. |  |
| :---: | :---: | :---: | :---: |
| 8 | Outline syllabus |  | CO Mapping |
|  | Unit 1 | Sets and Propositions: |  |
|  | A | Sets, Un-countably infinite sets, Principle of inclusion and exclusion, multisets, propositions, conditional propositions. | CO1 |
|  | B | Logical connectivity, Propositional, calculus, Universal and existential quantifiers | CO1 |
|  | C | Normal forms, methods of proofs, Mathematical induction. | CO1 |
|  | Unit 2 | Relations and Functions: |  |
|  | A | Functions , Composition of function , invertible functions, Discrete properties of binary relations, closure of relations | CO 2 |
|  | B | Warshall's algorithm, Equivalence relations and partitions, POSET and lattices, Chains, and Antichains. Generating Functions, Recurrence relations | CO3 |
|  | C | Linear Recurrence relations with constant coefficient, Homogeneous solution, Total Solutions, Solutions by method of Generating function. | CO 3 |
|  | Unit 3 | Permutation and Combination: |  |
|  | A | Permutations and combinations : Rule of sum and Product | CO4 |
|  | B | Permutations, Combination | CO 4 |
|  | C | Algorithms for Generation of Permutations and Combination. | CO4 |
|  | Unit 4 | Graphs: |  |
|  | A | Graph, Sub-graph, Various examples of graph and their subgraphs, Walks, Path and circuits, Connected graphs, Disconnected graphs and componant | CO5 |
|  | B | Euler's graphs, various operation on graphs, Hamiltonian Paths and circuits. Trees and fundamental circuits, distance, diameters, radius and pendant vertices, rooted and binary trees | CO5 |
|  | C | Counting tree, Spanning tree, Fundamental circuits, Finding all spanning trees, Fundamental circuits. | CO5 |

| Unit 5 | Groups and Rings: |  |  |  |

## Big Data Analytics (MMT 221)

|  | ol: SSBSR | Batch: 2023-25 |
| :---: | :---: | :---: |
| Programme: M.Sc. |  | Academic Year: 2024-25 |
| Branch: Mathematics |  | Semester: IV |
| 1 | Course Code | MMT-221 |
| 2 | Course Title | Big Data Analytics |
| 3 | Credits | 3 |
| 4 | Contact Hours (L-T-P) | 3-0-0 |
|  | Course Status | Compulsory |
| 5 | Course Objective | This course is aimed to provide an advance understanding to the big data overview, model building, clustering and advance analytics. |
| 6 | Course Outcomes | CO1: Discuss the concept big data analysis and data preparation. (K2,K5) <br> CO2: Describe the concept model building, communicating results and check the basic data analysis. (K3, K6) <br> CO 3: Explain the concept how using R to look at data introduction to R , Analysing and Exploring the Data, Statistics for Model Building and Evaluation Advanced Analytics. (K2, K4,K5) <br> CO 4: Illustrate the concept of K Means Clustering, association rules, linear regression, logistic regression, Naïve Bayesian Classifier and evaluate decision trees, time series analysis, text analysis. (K3, K5,K6) <br> CO 5: Discuss the concept of unstructured data - Map Reduce and <br> Hadoop, The Hadoop Ecosystem In-database Analytics and illustrate SQL Essentials, Advanced SQL and MADlib for In-database Analytics. (K1,K2,K5,K6) <br> CO6: Demonstrate the understanding of the Endgame, or putting it all together: operationalizing an analytics project, creating the final deliverables, data visualization techniques, final lab exercise on big data analytics. (K2, K5) |
| 7 | Course Description | This course is given the deep knowledge of big data, model building, clustering and advance analytics. |
| 8 | Outline syllabus | CO Mapping |

|  | Text book/s* | 1) Big Data, Big Dupe, 2016 |  |

Practical

## Mathematics Lab I ( MMT-151)

| School: SSBSR |  | Batch: 2023-25 |
| :--- | :--- | :--- |
| Programme: M.Sc. | Academic Year: 2024-25 |  |
| Branch: Mathematics | Semester: I |  |
| 1 | Course Code | MMT-151 |
| 2 | Course Title | Mathematics Lab I |
| 3 | Credits | 2 |
| 4 | Contact Hours <br> (L-T-P) | 0-0-4 |
| 5 | Course <br> Objective | The goal of this course is to introduce students to the fundamental <br> mathematical concepts for MATLAB. The course will cover the <br> syntax and semantics of MATLAB including control structures, <br> comments, variables, functions etc. Once the foundations of the <br> language have been established students will explore different types <br> of scientific Programmeming problems including curve fitting, ODE <br> solving etc |
| 6 | Course <br> Outcomes | Com: Describe the fundamentals of MATLAB and use MATLAB for <br> interactive computations. ( K2, K3) <br> CO2: Demonstrate with strings and matrices and their uses. (K2, K3) <br> CO3: Illustrate basic flow controls (if-else, for, while). (K3) <br> CO4: Create plots and export this for use in reports and presentations. <br> (K3, K5) <br> CO5: Develop Programme scripts and functions using the MATLAB <br> development environment. (K4, K5) <br> CO6.Create and control simple plot and user-interface graphics <br> objects in MATLAB (K4, K5) |
| 7 | Course <br> Description | The course will give the fundamental knowledge and practical <br> abilities in MATLAB required to effectively utilize this tool in <br> technical numerical computations and visualisation in other courses. <br> Syntax and interactive computations, Programmeming in MATLAB <br> using scripts and functions, rudimentary algebra and analysis. One- <br> and two-dimensional graphical presentations. Examples on <br> engineering applications. |
|  | Practical based MATLAB as a calculator. |  |

|  |  | Creating an Array in MATLAB | CO1 |
| :--- | :--- | :--- | :--- |
|  | Unit 2 | Practical related to -- Mathematical Operations with <br> Arrays | CO3 |
|  | Unit 4 | Practical related to-- How to make scripts files in <br> MATLAB and do some examples. | CO4 |
|  | Practical related to--- Make some function files in <br> MATLAB. Basic two-dimensional and three- <br> dimensional plotting, change in axes and annotation in <br> a figure. | CO5,CO6 |  |
|  | Unit 5 <br> examination | Practical related to--- If-End statement, If-Else-End <br> statement, nested If-Else-End statement <br> Solving a system of linear equations, curve fitting with <br> polynomials using inbuilt functions such as polyfit. | CO2,CO6 |
|  | Weightage <br> Distribution | CA |  |
|  | 25\% | CE | ETE |

| 1 | Course Code | MMT155 |
| 2 | Course Title | Numerical Analysis Lab |
| 3 | Credits | 2 |
| 4 | Contact Hours (L-T-P) | 0-0-4 |
|  | Course Status | Compulsory |
| 5 | Course Objective | - To familiarize the student in introducing and exploring MATLAB software. <br> - To enable the student on how to approach for solving problems using MATLAB tools. <br> - To prepare the students to use MATLAB in their project works. <br> - To provide a foundation in use of this software for real time applications. |
| 6 | Course Outcomes | CO1: Understand the procedures, algorithms, and concepts require to solve specific problems. (K2) <br> CO2: Discuss and develop the algorithms to solve system of linear equations and measure the accuracy. (K2, K5, K6) <br> CO3: Discuss and develop the algorithms to solve finite differences and interpolation and measure the accuracy. (K2, K5, K6) <br> CO4: Discuss and develop the algorithms to solve system of transcendental equations and measure the accuracy. (K2, K5, K6) <br> CO5: Discuss and develop the algorithms to solve divided differences and measure the accuracy. (K2, K5, K6) <br> CO6: Discuss and develop the algorithms to solve numerical differentiation and integration and measure the accuracy. (K2, K5, K6) |
| 7 | Course Description | This course teaches computer Programmeming to those with little to no previous experience. It uses the Programmeming system and language called MATLAB to do so because it is easy to learn, versatile and very useful for engineers and other professionals. MATLAB is a special-purpose language that is an excellent choice for writing moderate-size Programmes that solve problems involving the manipulation of numbers. |
| 8 | Outline syllabus | CO Mapping |

| Unit 1 | Lab. Experiment no:1-3 |  |
| :--- | :--- | :--- | :--- |
|  | Solution of transcendental equations using <br> 1. Bisection method <br> 2. Regula falsi method and secant method <br> 3. Newton Raphson method | CO1, CO2 |
| Unit 2 | Lab. Experiment no:4-6 | CO1, CO3 |
|  | System of Transcendental equations using <br> 4. Gauss-Jacobi method <br> 5. Gauss-Seidel method <br> 6. Gauss-Jacobi and Seidel with convergence criteria |  |
| Unit 3 | Lab. Experiment no: 7-8 |  |
|  | Finite differences and interpolation: <br> 7. Newton forward and backward interpolation <br> 8. Trapezoidal, Simpson (1/3) and Simpson(3/8) | CO1, CO4 |
| Unit 4 | Lab. Experiment no: 9-10 |  |
|  | Solution of ODEs using: <br> 9. Euler's and Range Kutta 2 |  |
| 10.BVPs using finite difference method |  |  |

## Mathematics Lab IV (MMT-154)

| School: SSBSR |  | Batch: 2023-25 |  |
| :---: | :---: | :---: | :---: |
| Programme: M.Sc. |  | Academic Year: 2024-25 |  |
| Branch: <br> Mathematics |  | Semester: II |  |
| 1 | Course Code | MMT-154 |  |
| 2 | Course Title | Mathematics Lab IV |  |
| 3 | Credits | 2 |  |
| 4 | Contact Hours (L-T-P) | 0-0-4 |  |
|  | Course Status | Compulsory |  |
| 5 | Course Objective | - To create understanding of the LaTeX and enable the students how to write resume, write question paper, write articles/ research papers. |  |
| 6 | Course Outcomes | CO1: Understand the procedures installation of the software LaTeX. (K2) <br> CO2: Discuss and explain Latex basic syntax and write equations, matrix, and tables. (K2, K4, K6) <br> CO3: Explain and write page layout, equation references citation tables of contents list of figures etc. (K2, K4, K6) <br> CO4: Describe how to write Geometry, Hyperref, amsmath, amssymb, algorithms in Latex. (K1, K2, K6) <br> CO5: Discuss the classes and explain how to write article, book, report, beamer, slides. IEEtran. . (K2,K4, K6) <br> CO6: Write resume, question paper, research paper, project in Latex . (K2, K5, K6) |  |
| 7 | Course Description | This course teaches the LaTeXTo and describes how to write resume, write question paper, and write articles / research papers. |  |
| 8 | Outline syllabus |  | CO <br> Mapping |
|  | Unit 1 | Lab. Experiment 1: |  |
|  |  | Installation of the software LaTeX | CO1, CO2 |
|  |  | Understanding Latex compilation: |  |

|  | Basic Syntex, Writing equations, Matrix, Tables |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Unit 2 | Lab. Experiment 2: |  |  |  |
|  | Page Layout - Titles, Abstract Chapters, Sections, References, <br> Equation references, citation. <br> List making environments <br> Table of contents, Generating new commands, Figure handling numbering, List of figures, List of tables, Generating index. |  |  | CO3 |
| Unit 3 | Lab. Experiment 3: |  |  |  |
|  | Packages: Geometry, Hyperref, amsmath, amssymb, algorithms, <br> algorithmic graphic, color, tilez listing. |  |  | CO4 |
| Unit 4 | Lab. Experiment 4: |  |  |  |
|  | Classes: article, book, report, beamer, slides. IEEtran. |  |  | CO5 |
| Unit 5 | Lab. Experiment 5: |  |  |  |
|  | Applications to: <br> Writing resume <br> Writing question paper <br> Writing articles/ research papers |  |  | CO6 |
| Mode of examination | Practical |  |  |  |
