MDS
(Oral & Maxillofacial Surgery)

SDS0108

2020-2023

1.1 Vision, Mission and Core Values of the University

Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

Mission of the University

1. Transformative educational experience
2. Enrichment by educational initiatives that encourage global outlook
3. Develop research, support disruptive innovations and accelerate entrepreneurship
4. Seeking beyond boundaries

Core Values

1. Integrity
2. Leadership
3. Diversity
4. Community

1.2 Vision, Mission and Core Values of the School

Vision of the School

To serve the society by being a global center in pursuit of academic and professional excellence in the field of dentistry.

Mission of the School

1. Creating a stimulating and flexible learning environment amongst the faculty and students
2. Strongly promoting research, innovation, clinical excellence
3. Promote and inculcate ethical values and continued betterment in the dental profession and in all facets of life.

Core Values

1. Integrity
2. Leadership
3. Diversity
4. Community

1.3 Programme Educational Objectives (PEO)

Program educational objectives are broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.

PEO1 : To train a post-graduate student to have adequate knowledge and understanding of the etiology, patho physiology and diagnosis, treatment planning of various common oral and Maxillofacial surgical problems both minor and major in nature.

PEO2 : To have understood the general surgical principles like pre and post- surgical management, particularly evaluation, post- surgical care, fluid and electrolyte management, blood transfusion and post- surgical pain management.

PEO3 : Understanding of basic sciences relevant to practice or oral and maxillofacial surgery.

PEO4 : Able to identify social, cultural, economic, genetic and environmental factors and their relevance to disease process management in the oral and Maxillofacial region.

PEO5 : Essential knowledge of personal hygiene and infection control, prevention c cross infection and safe disposal of hospital waste keeping in view the high prevalence of hepatitis and HIV.

1.3.3 Program Outcomes (PO's)

- PO1 : To obtain proper clinical history, methodical examination of the patient, perform essential diagnostic procedures and order relevant laboratory tests and interpret them and to arrive at a reasonable diagnosis about the surgical condition.
- PO2 : To perform with competence minor oral surgical procedures and common maxillofacial surgery. To treat both surgically and medically (or by other means of the oral and Maxillofacial and the related area).
- PO3 : Capable of providing care for maxillofacial surgery patients.
- PO4 : Develop attitude to adopt ethical principles in all aspect of surgical practice, professional honesty and integrity are to be fostered. Surgical care is to be delivered irrespective of the social status, caste, creed or religion of the patient.
- PO5 : To share the knowledge and clinical experience with professional colleagues
- PO6 : To adopt new and techniques of surgical management developed from time to time based on scientific research which are in the best interest of the patient
- PO7 : Professional honesty and integrity to be fostered.
- PSO1: acquired adequate knowledge and understanding of the etiology, patho physiology and diagnosis, treatment planning of various common oral and Maxillofacial surgical problems both minor and major in nature.
- PSO2: to identify social, cultural, economic, genetic and environmental factors and their relevance to disease process management in the oral and Maxillofacial region.
- PSO3: Able to do mass screening of oral cancer patients
- PSO4: Competency to analyze and interpret routine blood investigations

2.1 Template A1: Syllabus

School:		School of Dental Sciences
Program:		Master Of Dental surgery
Batch		2020-2023
1	Course Code	MDS303
2	Course Title	Oral & Maxillofacial Surgery
3	Credits	NA
4	Contact Hours (L-T-P)	134-0-4187
Course Type		CC
5	Course Objective	<p>1. To train a post-graduate student to have adequate knowledge and understanding of the etiology, patho physiology and diagnosis, treatment planning of various common oral and Maxillofacial surgical problems.</p> <p>2. To have understood the general surgical principles.</p> <p>3. Understanding of basic sciences relevant to practice or oral and maxillofacial surgery.</p> <p>4. Essential knowledge of personal hygiene and infection control.</p> <p>5. Essential knowledge of personal hygiene and infection control</p>
6	Course Outcomes	<p>The student will be able to:</p> <p>CO 303.1.1: Student should know about Development and growth of face, teeth and jaws, Age changes and evaluation of mandible in detail Congenital abnormality of orofacial regions Surgical anatomy of scalp, temple and face</p> <p>CO 303.1.2: Anatomy and its applied aspects of triangles of neck and deep structures of neck, Cranial facial bones and surrounding soft issues. Cranial nerves, Tongue, Temporal and infratemporal region and temporomandibular joint in detail Orbits and its contents, Muscles of face and neck.</p> <p>CO 303.1.3: Histology of skin, oral mucosa, connective tissue bone, cartilage, cellular elements of blood vessels,</p>

		<p>Lymphatic, Nerves, Muscles.</p> <p>CO 303.2.1:Endocrinology - metabolism of calcium, endocranial activity and disorder relating thyroid gland, parathyroid gland, adrenal gland, pituitary gland, pancreas and gonads</p> <p>CO 303.2.2:Nutrition – general principles balanced diet, effect of dietary deficiency, protein energy malnutrition, nutritional assessment, metabolic responses to stress, need for nutritional support, entrails nutrition, roots of access to GIT, parenteral nutrition, access to central veins, nutritional support</p> <p>CO 303.3.1:Fluid and electrolytic balance / acid base metabolism– the body fluid compartment, metabolism of water and electrolytes, factors maintaining hemostasis causes for treatment of acidosis and alkalosis.</p> <p>CO 303.3.2: Wound management - wound healing factors influencing healing, properties of suture materials, and appropriate uses of sutures.CO 303.4.1: The students would be able to diagnose, meticulously plan and manage competently various conditions in maxillofacial surgery including challenging cases.</p> <p>CO 303.4.1 The students would be able to diagnose, meticulously plan and manage competently various conditions in maxillofacial surgery including challenging cases.</p> <p>CO 303.4.2:Students would be knowledgeable about conventional and recent advances in the diagnosis and management of oral and maxillofacial conditions</p>
7	Course Description	<p>Oral and Maxillofacial surgery deal with the diagnosis, surgical and adjunctive treatment of diseases, injuries and defects of the human jaws and associated oral and facial structures. It is also a surgery to treat many diseases, injuries and defects in the head, neck, face, jaws and the hard and soft tissues of the oral (mouth) and maxillofacial (jaws and face) region. The course helps to develop skilled professionals in diagnosis, surgical and adjunctive treatment of disease, injuries, defects of the human jaws and associated oral and facial structures.</p>

8	Outline syllabus	
----------	-------------------------	--

MDS303.A	Unit A Applied Basic Sciences:	
MDS303.A1	Unit A Topic 1	Applied Anatomy- Surgical anatomy of scalp, temple and face anatomy and its applied aspects
MDS303.A2	Unit A Topic 2	Applied Physiology - General consideration of the structure and function, brain and applied anatomy of intracranial venous sinuses, cavernous sinus and superior sagittal sinus, Brief consideration of autonomous nervous system of head and neck.
MDS303.A3	Unit A Topic 3	Applied Biochemistry- General principles governing the various biological principles of the body such as osmotic, pressure, electrolytes, dissociation, oxidation, reduction etc, general composition of body enzymes and antimetabolite
MDS303. A4	Unit A Topic 4	Applied General Pathology- Wound management, Hypersensitivity, Shock and pulmonary failure, types of shock, diagnosis, resuscitation, pharmacological support, ARDS and its causes and prevention, ventilation and support.
MDS303. A5	Unit A Topic 5	Applied Oral Pathology and microbiology - Wide range of pathological lesions of hard and soft tissues of the Orofacial regions like the odontogenic infection, maxillary sinus diseases, mucosal diseases, role of laboratory investigation in oral surgery.
MDS303. A6	Unit A Topic 6	Applied Pharmacology and therapeutics- Dosage and mode of administration of drugs, action and fate in the body.
MDS303. A7	Unit A Topic 7	Applied Computer science- The value of computer based systems in biomedical equipment.

MDS303. A8	Unit A Topic 8	ORAL AND MAXILLOFACIAL SURGERY- Evolution of Maxillofacial surgery, Diagnosis, history taking, clinical examination, investigations, Informed consent/medico-legal issues, Principles of surgery, Pre operative workup, Surgical sutures, drains, Post operative care.
MDS303.B	Unit B	ORAL AND MAXILLOFACIAL SURGERY – Minor
MDS303.B1	Unit B Topic 1	Communication skills with patients
MDS303. B2	Unit B Topic 2	Principles of evidence based surgery
MDS303. B3	Unit B Topic 3	Medical emergencies
MDS303. B4	Unit B Topic 4	Common cysts and Tumors.
MDS303. B5	Unit B Topic 5	Airway obstruction management
MDS303. B6	Unit B Topic 6	Facial pain
MDS303. B7	Unit B	Pain control

	Topic 7	
MDS303. B8	Unit B Topic 8	Temporomandibular joint disorders
MDS303. B9	Unit B Topic 9	Clinical oral surgery
MDS303. B10	Unit B Topic 10	Pre-prosthetic surgery
MDS303. B11	Unit B Topic 11	Maxillofacial trauma
MDS303. B12	Unit B Topic 12	Assessment of trauma
MDS303. B13	Unit B Topic 13	General patient management
MDS303. B14	Unit B Topic	Cyst and tumors of head and neck region and their management

	14	
MDS303. B15	Unit B Topic 15	Surgical Infections
MDS303. B16	Unit B Topic 16	Distraction osteogenesis in maxillofacial region
MDS303. B17	Unit B Topic 17	Implantology principles
MDS303. B18	Unit B Topic 18	Allied specialties- Neuro-surgery, ENT/ Ophthalmology, Orthopaedic
MDS303. C	Unit C	ORAL & MAXILLOFACIAL SURGERY – Major
MDS303.C1	Unit C Topic 1	Principles of surgical audit
MDS303.C2	Unit C Topic 2	Tissue grafting

MDS303.C3	Unit C Topic 3	Laser surgery
MDS303. C4	Unit C Topic 4	Cleft lip and palate surgery
MDS303. C5	Unit C Topic 5	Aesthetic facial surgery
MDS303. C6	Unit C Topic 6	Craniofacial surgery
MDS303. C7	Unit C Topic 7	Head and Neck Oncology
MDS303. C8	Unit C Topic 8	Micro vascular surgery

1.	Course evaluation	Attendance	Minimum 75% is Needed for both theory and clinical practical
		Discussions	Every week
		Presentations	Seminar, Journal Club, Case Presentations

		Any Other		Posters	
		Annual examination	(700 Marks Theory and Practical)	1 st year theory – 100 marks	3 rd year theory – 300marks
					3 rd year practical – 300 marks
2.	Text book/s*	<ol style="list-style-type: none"> 1. Local anesthesia – Malamed 2. Text book of Oral & Maxillofacial Surgery – Laskin Vol. 1 & 2 3. Principles of Oral & Maxillofacial Surgery – Peterson Vol. 1 & 2 4. Maxillofacial Injuries – Row & Williams Vol.1 & 2 5. Maxillofacial Trauma Fonseca Vol. 1 &2 6. Maxillofacial Infections – Topazian 7. Principles of Oral & Maxillofacial Surgery – Moore 8. Facial esthetics& Dentofacial deformities – Epker Vol 1 to 4 			Stanley F. Malamed Daniel M. Laskin Peterson N.L Rowe & J.LI. Williams Fonseca Topazian Moore Bruce N. Epker

3.	SUGGESTED PERIODICALS	1. Journal of Oral & Maxillofacial Surgery 2. British Journal of Oral & Maxillofacial Surgery 3. International Journal of Oral & Maxillofacial Surgery	
4.	Other References	TED learning EBSCOHOST Various scientific articles from various sources
