

SCHOOL OF ENGINEERING AND TECHNOLOGY Bachelor in Computer Application (BCA) BCA with Specialization in Multimedia and Animations

Programme Code: SET0103 Duration- 1/2/3/4 Years Full Time

PROGRAM STRUCTURE AND CURRICULUM & SCHEME OF EXAMINATION 2021

1. Standard Structure of the Program at University Level

1.1 Vision, Mission and Core Values of the University

Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

Mission of the University

- 1. Transformative educational experience
- 2. Enrichment by educational initiatives that encourage global outlook
- **3.** Develop research, support disruptive innovations and accelerate entrepreneurship
- 4. Seeking beyond boundaries

Core Values

- Integrity
- Leadership
- Diversity
- Community

Note: Detailed Mission Statements of University can be used for developing Mission Statements of Schools/ Departments.

Vision of the School

To become a globally acclaimed institution of higher learning in engineering and technology promoting excellence in research, innovation and entrepreneurship

Mission of the School

- 1. To impart quality education with strong industry & academic connectivity in the expanding fields of Engineering and Technology in a conductive and enriching learning environment.
- 2. To product technocrats equipped with technical & soft skills and experiential learning required to stay current with the modern tools in emerging technologies to fulfill professional responsibilities and uphold ethical values.
- **3.** To inculcate a culture of interdisciplinary research, innovation and entrepreneurship to provide sustainable solutions to meet the growing challenges and societal needs.
- 4. To foster collaborative learning and to play adaptive leadership role in professional career and pursuit of higher education through effective mentoring and counseling.

Core Values

- Industry & Academic Connectivity
- Experiential learning
- Interdisciplinary research
- Global

1.2 Vision and Mission of the Department

Vision of the Department

To be recognized as the fountainhead of excellence in technical knowledge and research in computer science and engineering to attract students and scholars across the globe

Mission of the Department

- 1. To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning.
- 2. To promote interdisciplinary research & innovation-based activities in emerging areas of technology globally
- **3.** To facilitate and foster the industry-academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture.
- 4. To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration

Core Values

- Competency
- Global
- Entrepreneurship Skills
- Interdisciplinary research

1.3 Programme Educational Objectives (PEO)

1.3.1 Writing Programme Educational Objectives (PEO)

Program educational objectives are broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.

The Program Educational Objectives (PEOs) of UG Program in Computer Science & Engineering are:

PEO-1 The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering.

PEO-2 The graduates will provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities.

PEO-3 The graduates will become employable, successful entrepreneur as an outcome of Industry-Academia collaboration.

PEO-4 The graduates will embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities

Methods of Forming PEO's

STEP 1 :	The needs of the Nation and society are identified through scientific
	publications, industry interaction and media.
STED 2	Taking the above into consideration, the PEOs are established by the

- STEP 2. Taking the above into consideration, the PEOs are established by the Coordination Committee of the department.
- STEP 3. The PEOs are communicated to the alumni and their suggestions are obtained.
- STEP 4. The PEOs are communicated to all the faculty members of the department and their feedback is obtained.
- STEP 5. The PEOs are then put to the Board of Studies of the department for final approval.

[Note: Prepare a file for the same, how you arrive for PEO's]

1.3.2 Map PEOs with Mission Statements:

DEPARTMENT PEOs DEPT OF CSE MISSION STATEMENTS	1. The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering.	2. The graduates will be able to provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities.	3. The graduates will become employable, successful entrepreneur and innovator as an outcome of Industry- Academia collaboration.	4. The graduates will be able to embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities.	
 To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning. 	3	3	2	2	10/12
2. To promote interdisciplinary research & innovation based activities in emerging areas of technology globally.	2	3	2	2	9/12
3. To facilitate and foster the industry- academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture.	2	2	3	3	10/12
4: To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration	2	2	2	3	9/12
	9/12	10/12	9/12	10/12	83%

Enter correlation levels 1, 2, or 3 as defined below:

1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)

If there is no correlation, put "-"

1.3.3 Program Outcomes (PO's)

PO1:	Computing knowledge:	Apply the knowledge of computing fundamentals to Identify, formulate, and solve problems in the areas of computer applications
PO2:	Problem Analysis and Design of solutions:	Apply analytical skills in solving computer based problems using fundamentals of computer science and application domains.
PO3:	Modern tool usage:	Ability to select and apply modern IT Tools and technologies for innovative software solutions and applications.
PO4:	Technical Skill Development	To develop and sharpen their IT/ programming, networking and data management skills required for identifying problems and issues relating to the Disciplinary area and field of study/ higher education.
PO5:	Societal Concern:	Recognize & appreciate the role of computing to design state-of-the-art methodologies for solving real life problems for the betterment of the society
PO6:	Environment and Sustainability:	Actively involved with knowledge, skills and right attitude to give sustainable solutions for the benefit of environment.
PO7:	Ethics:	Pertain ethical principles and entrust to professional ethics and responsibilities in a global economic environment.
PO8:	Individual and team work:	Ability to work effectively as an individual, and in assorted teams.
PO9:	Communication:	Development of good communication skills in both written and verbal form in a substantial technical manner.
PO10:	Life-long learning:	Ability to engage in independent and life-long learning through professional activities.
PSO1:	Multimedia Applications	Professionally trained in the areas of multimedia, animation, web designing, effective media management, and to acquire knowledge in various domain multimedia applications.
PSO2:		Develop competence in the field of, system analysis and design, multimedia and graphics, web design, data & information security, networking, and recent areas of cloud computing.

1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

Mapping	PEO1	PEO2	PEO3	PEO4
PO1:	3	3	2	1
PO2:	3	3	3	1
PO3:	2	2	3	2
PO4:	2	3	2	2
PO5:	1	2	2	3
PO6:	1	1	2	3
PO7:	1	1	2	3
PO8:	1	2	3	1
PO9:	1	1	3	2
PO10:	2	3	1	1
PSO1:	2	3	1	3
PSO2:	3	3	2	2

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

1.3.5 Program Outcome Vs Courses Mapping Table¹:

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

¹ Cel value will contain the correlation value of respective course with PO.

Prepared by : Board of Studies, Department of CSE, SUSET

1.3.5.2 COURSE ARTICULATION MATRIX²

1-Slight (Low) 2-Moderate (Medium) 3-Substantial (High)

² Each course outcome (Based on Blooms Taxanomy-CO1, CO2, CO3, CO4, CO5, and CO6) of the course needs to map with PO. This table evolves once faculty has mapped each course outcomes of their respective course with PO's.

Course Outcome

- **Course Outcomes**–What is it?
 - Course outcomes (COs) are clear statements of what a student should be able to demonstrate on completion of a course.
 - COs should be assessable and measurable knowledge, skills, abilities and attitudes that student attains by the end of the course.
 - It is generally good idea to identify between 4 and 7 outcomes.
 - All courses in a particular programme shall have their own PO.
 - Each CO is mapped to relevant PO.
 - The teaching learning process and assessment process are to be designed in a way to achieve the COs.

Beginning words for Course Outcome:

Knowledge	Understand	Apply	Analyze	Evaluate	Create
define	explain	solve	analyze	reframe	design
identify	describe	apply	compare	criticize	compose
describe	interpret	illustrate	classify	evaluate	create
label	paraphrase	modify	contrast	order	plan
list	summarize	use	distinguish	appraise	combine
name	classify	calculate	infer	judge	formulate
state	compare	change	separate	support	invent
match	differentiate	choose	explain	compare	hypothesize
recognize	discuss	demonstrate	select	decide	substitute
select	distinguish	discover	categorize	discriminate	write
examine	extend	experiment	connect	recommend	compile
locate	predict	relate	differentiate	summarize	construct
memorize	associate	show	discriminate	assess	develop
quote	contrast	sketch	divide	choose	generalize
recall	convert	complete	order	convince	integrate
reproduce	demonstrate	construct	point out	defend	modify
tabulate	estimate	dramatize	prioritize	estimate	organize
tell	express	interpret	subdivide	find errors	prepare
copy	Identify	Manipulate	survey	grade	produce
discover	indicate	Paint	advertise	measure	rearrange
duplicate	Infer	Prepare	appraise	predict	rewrite

Active verbs developed based on Bloom's Taxonomy

(Reference: Retrieved from <u>http://www.teachthought.com/learning/249-blooms-taxonomy-verbs-for-critical-thinking/</u>)

CO and PO Mapping

S.	Course Outcome	Program Outcomes (PO) & Program Specific
No.		Outcomes (PSO)
1.	CO1: Understand the basic concept of SQL commands in	PO1,PO3,PO4,PO8,PO9,PO10,PSO1
	DBMS.	
2.	CO2: Demonstrate various DDL Commands used to create	PO1,PO2,PO3,PO4,PO8,PO9,PO10
	and alter a table.	
3.	CO3: Experiment with operations using Data Manipulation	PO1,PO2,PO3,PO4,PO8,PO9,PO10
	Language statements like Insert, Update and Delete.	
4.	CO4: Examine data to apply various grouping clauses and	PO1,PO2,PO3,PO4,PO8,PO9,PO10,PSO1
	aggregate functions.	
5	CO5: Evaluate the queries using the concepts like sub-	PO1,PO2,PO3,PO4,PO8,PO9,PO10, PSO1
	queries, JOINS, Views, Cursors, Triggers.	
6	CO6: Develop project based on various SQL commands.	PO1,PO2,PO3,PO4,PO5, PO7, PO8, PO9,
		PO10, PSO1

CO and PO Mapping

S.	Course Outcome (CO)	Program Outcomes (PO) &
No.		Program Specific Outcomes
		(PSO)
1.	Explain the basics concepts of data base & design an ER model	PO1, PO4, PO8, PO9, PO10
	for a given example from real world description.	
2.	Design & Solve the given problem using Relational Algebra,	PO1, PO2, PO4, PO8, PO10
	Relational Calculus, SQL and PL/SQL.	
3.	Apply normalization techniques to reduce redundancy from the	PO1, PO2, PO3, PO4, PO8, PO10
	database.	
4.	To appraise the basic issues of Transaction processing,	PO1, PO2, PO3, PO4, PO8
	Serializability & deadlock.	
5	Determine the roles of concurrency control techniques in database	PO1, PO2, PO3, PO4, PO10
	design.	
6	Design & develop database system for real life problems	PO1, PO2, PO3, PO4, PO5, PO6,
		PO9, PO10, PSO1, PSO2

	(L-T-P)							
	Course Status	Core						
5	Course	This course provides a mathematical foundation for subsequent study in						
	Objective	Computer Science, as well as developing the skills necessary to solve practical						
		problems.						
6	Course	After the completion of this course, students will be able to:						
	Outcomes	CO-1. Apply the basic principles of sets and operations in sets.						
		CO-2. <i>Construct</i> and prove models by using algebraic structures.						
		CO-3. <i>Classify</i> logical notation and determine if the argument is or is not						
		valid.						
		CO-4. Apply the concepts of data structure, data type and ADT and						
		appropriate data structures and Choose the suitable data structures like						
		arrays, linked list, stacks and queues to solve real world problems						
		efficiently.						
		CO-5. <i>Represent</i> and manipulate data using nonlinear data structures						
		like trees and graphs to design algorithms for various applications.						
		CO-6 <i>Formulate</i> new solutions for programming problems as per						
		industry standards.						
7	Course	The purpose of this course is to understand and use (abstract) discrete						
	Description	structures that are backbones of computer science. A basic understanding of						
		discrete mathematical topics is fundamental for work in computer science.						
		Many students of this course will find they have familiarity with some of the						
		topics: for instance, truth tables, logical propositions, elements of set theory,						
		as well as basic notions of functions and mathematical induction. In this						
		course we will discover that logical propositions are the underlying model of						
		discrete systems. From this modest beginning we develop algorithms and						
		prove their efficacy. Topics include propositional and predicate logic, basic						
		proof techniques, set algebra and Boolean algebra, recursion and induction.						
		The knowledge gained will be extremely useful in upper level of computer						
0	Science classes.

Status
5 Course
Objective Understand the fundamentals of object-oriented concept in Java, defined
classes, objects, invoking methods inheritance, interfaces and except
handling mechanisms. To develop skills in analyzing the usability of
web and understand fundamentals of tools and technology of web design.
6 Course COI: Describe the fundamental of object-oriented concept in java and web
Outcomes design.
CO2: Compare and contrast different features of java and web design.
CO3: Develop programs using core concepts of java and web development too
CO4: Analyze Exception and Error in java programs and security in web design
CO5: Explain the concept of inheritance, polymorphism and interfaces and we
applications.
CO6: Design application of real-world problem using Java and web developm
tools.
7 Course Basic Object-Oriented Programming (OOP) concepts, includ
Description objects, classes, methods, parameter passing, information hid
inheritance and polymorphism are introduced and their implementation
using Java are discussed.
8 Outline syllabus CO Mapping
Unit 1 Introduction to Object Oriented Paradigm
A Procedural Languages, object-based languages, object- CO1, CO2
oriented languages, difference between programming
paradigms, advantages of OOPs.
B Object oriented programming features: Abstraction, CO2
class, object, Encapsulation, data hiding,
polymorphism, inheritance.
Class Loader, Execution Engine, Carbage collection
Unit ? Introduction to Jaya with class and object
A Java development Kit (IDK) Introduction to IDE CO2
for java development setting java environment
(steps for path and CLASSPATH setting)
B Constants, Variables, Data Types, Operators, CO2
Expressions, Decision Making, Branching, Loops,
command line argument
