

## SCHOOL OF ENGINEERING AND TECHNOLOGY SCHOOL OF ENGINEERING AND TECHNOLOGY Bachelor of Science (Information Technology)

Programme Code: SET0126 Duration- 1/2/3/4 Years Full Time

## PROGRAM STRUCTURE AND CURRICULUM & SCHEME OF EXAMINATION 2021

### **1. Standard Structure of the Program at University Level**

1.1 Vision, Mission and Core Values of the University

### Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

### Mission of the University

- 1. Transformative educational experience
- 2. Enrichment by educational initiatives that encourage global outlook
- **3.** Develop research, support disruptive innovations and accelerate entrepreneurship
- 4. Seeking beyond boundaries

**Core Values** 

- Integrity
- Leadership
- Diversity
- Community

Note: Detailed Mission Statements of University can be used for developing Mission Statements of Schools/ Departments.

### Vision of the School

To become a globally acclaimed institution of higher learning in engineering and technology promoting excellence in research, innovation and entrepreneurship

### Mission of the School

- 1. To impart quality education with strong industry & academic connectivity in the expanding fields of Engineering and Technology in a conductive and enriching learning environment.
- 2. To product technocrats equipped with technical & soft skills and experiential learning required to stay current with the modern tools in emerging technologies to fulfill professional responsibilities and uphold ethical values.
- **3.** To inculcate a culture of interdisciplinary research, innovation and entrepreneurship to provide sustainable solutions to meet the growing challenges and societal needs.
- 4. To foster collaborative learning and to play adaptive leadership role in professional career and pursuit of higher education through effective mentoring and counseling.

### **Core Values**

- Industry & Academic Connectivity
- Experiential learning
- Interdisciplinary research
- Global

### 1.2 Vision and Mission of the Department

### Vision of the Department

To be recognized as the fountainhead of excellence in technical knowledge and research in computer science and engineering to attract students and scholars across the globe

### **Mission of the Department**

- 1. To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning.
- 2. To promote interdisciplinary research & innovation-based activities in emerging areas of technology globally
- **3.** To facilitate and foster the industry-academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture.
- 4. To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration

### **Core Values**

- Competency
- Global
- Entrepreneurship Skills
- Interdisciplinary research

### **1.3 Programme Educational Objectives (PEO)**

### **1.3.1** Writing Programme Educational Objectives (PEO)

Program educational objectives are broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.

The Program Educational Objectives (PEOs) of UG Program in Computer Science & Engineering are:

**PEO-1** The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering.

**PEO-2** The graduates will provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities.

**PEO-3** The graduates will become employable, successful entrepreneur as an outcome of Industry-Academia collaboration.

**PEO-4** The graduates will embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities

#### **Methods of Forming PEO's**

STEP 1 :	The needs of the Nation and society are identified through scientific
	publications, industry interaction and media.
STED 2	Taking the above into consideration, the PEOs are established by the

- STEP 2. Taking the above into consideration, the PEOs are established by the Coordination Committee of the department.
- STEP 3. The PEOs are communicated to the alumni and their suggestions are obtained.
- STEP 4. The PEOs are communicated to all the faculty members of the department and their feedback is obtained.
- STEP 5. The PEOs are then put to the Board of Studies of the department for final approval.

### [Note: Prepare a file for the same, how you arrive for PEO's]

### **1.3.2** Map PEOs with Mission Statements:

DEPARTMENT PEOs DEPT OF CSE MISSION STATEMENTS	1. The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering.	2. The graduates will be able to provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities.	3. The graduates will become employable, successful entrepreneur and innovator as an outcome of Industry- Academia collaboration.	4. The graduates will be able to embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities.	
1. To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning.	3	3	2	2	10/12
2. To promote interdisciplinary research & innovation based activities in emerging areas of technology globally.	2	3	2	2	9/12
3. To facilitate and foster the industry- academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture.	2	2	3	3	10/12
4: To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration	2	2	2	3	9/12
	9/12	10/12	9/12	10/12	83%

Enter correlation levels 1, 2, or 3 as defined below:

### 1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)

If there is no correlation, put "-"

### **1.3.3 Program Outcomes (PO's)**

PO1:	Computing knowledge:	Understand the basic principles and methods of computer science for solving complex computing problems.
PO2:	Problem Analysis and Design of solutions:	Analyze and formulate a problem, evaluate a computing- based solution to meet a given set of requirements using software development concepts.
PO3:	Modern tool usage:	Ability to select and apply current techniques and modern IT Tools for innovative software solutions.
PO4:	Technical Skill Development	To develop and sharpen programming, networking, and other computer science skills required in the field of study/ higher education.
PO5:	Societal Concern:	Utilize the role of computing for solving real life problems and to analyze its global impact on individuals, organizations, and society.
PO6:	Environment and Sustainability :	Actively involved with knowledge, skills and right attitude in environmental context for sustainable development.
PO7:	Ethics:	Recognize ethical principles and moral values for the computing profession in global economic environment.
PO8:	Individual and team work:	Ability to function effectively as an individual or a team member engaged in accomplishes a common goal.
PO9:	Communicati on:	Development of good communication skills in both written and verbal form to convey technical information effectively and accurately.
PO10 :	Life-long learning:	Ability to recognize the need of training and skills to engage in self-regulating and life-long learning.
PSO1 :	Computer Science	Provide effective and efficient solutions to real life problems using acquired knowledge in Data Mining, graph theory, advanced DBMS and other computer science concepts for continued professional development.
PSO2 :	Information Technology	Explore and provide software solutions of complex problems using information technology concepts like Enterprise Resource Planning, network security, IT infrastructure management.

### 1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

Mapping	PEO1	PEO2	PEO3	PEO4
PO1:	3	3	2	1
PO2:	3	3	3	1
PO3:	2	2	3	2
PO4:	2	3	2	2
PO5:	1	2	2	3
PO6:	1	1	2	3
PO7:	1	1	2	3
PO8:	1	2	3	1
PO9:	1	1	3	2
PO10:	2	3	1	1
PSO1:	2	3	1	3
PSO2:	3	3	2	2

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

**1.3.5 Program Outcome Vs Courses Mapping Table<sup>1</sup>:** 

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

<sup>&</sup>lt;sup>1</sup> Cel value will contain the correlation value of respective course with PO.

Prepared by : Board of Studies, Department of CSE, SUSET

### 1.3.5.2 COURSE ARTICULATION MATRIX<sup>2</sup>

1-Slight (Low) 2-Moderate (Medium) 3-Substantial (High)

<sup>&</sup>lt;sup>2</sup> Each course outcome (Based on Blooms Taxanomy-CO1, CO2, CO3, CO4, CO5, and CO6) of the course needs to map with PO. This table evolves once faculty has mapped each course outcomes of their respective course with PO's.

### **Course Outcome**

- **Course Outcomes**–What is it?
  - Course outcomes (COs) are clear statements of what a student should be able to demonstrate on completion of a course.
  - COs should be assessable and measurable knowledge, skills, abilities and attitudes that student attains by the end of the course.
  - It is generally good idea to identify between 4 and 7 outcomes.
  - All courses in a particular programme shall have their own PO.
  - Each CO is mapped to relevant PO.
  - The teaching learning process and assessment process are to be designed in a way to achieve the COs.

### **Beginning words for Course Outcome:**

Knowledge	Understand	Apply	Analyze	Evaluate	Create
define	explain	solve	analyze	reframe	design
identify	describe	apply	compare	criticize	compose

### CO and PO Mapping

S.	Course Outcome (CO)	Program Outcomes (PO) &
No.		Program Specific Outcomes
		(PSO)
1.	Explain the basics concepts of data base & design an ER model	PO1, PO4, PO8, PO9, PO10
	for a given example from real world description.	
2.	Design & Solve the given problem using Relational Algebra,	PO1, PO2, PO4, PO8, PO10
	Relational Calculus, SQL and PL/SQL.	
3.	Apply normalization techniques to reduce redundancy from the	PO1, PO2, PO3, PO4, PO8, PO10
	database.	
4.	To appraise the basic issues of Transaction processing,	PO1, PO2, PO3, PO4, PO8
	Serializability & deadlock.	
5	Determine the roles of concurrency control techniques in database	PO1, PO2, PO3, PO4, PO10
	design.	
6	Design & develop database system for real life problems	PO1, PO2, PO3, PO4, PO5, PO6,
		PO9, PO10, PSO1, PSO2

-	Course Status	Core								
5	Course	This course provides a mathematical foundation for subsequen	t study in							
C	Objective	Computer Science, as well as developing the skills necessary to	o solve practical							
	objeeuve	problems.	L L							
6	Course	After the completion of this course, students will be able to:								
	Outcomes	CO-1. Apply the basic principles of sets and operations in sets	5.							
		CO-2. Construct and prove models by using algebraic structu	res.							
		CO-3. <i>Classify</i> logical notation and determine if the argument	t is or is not							
		valid.								
		CO-4. Apply the concepts of data structure, data type	and ADT and							
		appropriate data structures and Choose the suitable data	appropriate data structures and Choose the suitable data structures like							
		arrays, linked list, stacks and queues to solve real w	orld problems							
		efficiently.								
		CO-5. <i>Represent</i> and manipulate data using nonlinear data structures								
		like trees and graphs to design algorithms for various app.	like trees and graphs to design algorithms for various applications.							
		CO-6 Formulate new solutions for programming proble	ms as per							
		industry standards.								
7	Course	The purpose of this course is to understand and use (abstract)	discrete							
	Description	structures that are backbones of computer science. A basic un	derstanding of							
		discrete mathematical topics is fundamental for work in comp	uter science.							
		Many students of this course will find they have familiarity wit	h some of the							
		topics: for instance, truth tables, logical propositions, element	s of set theory,							
		as well as basic notions of functions and mathematical induction	on. In this							
		course we will discover that logical propositions are the under	lying model of							
		discrete systems. From this modest beginning we develop algo	brithms and							
		prove their efficacy. Topics include propositional and predication	e logic, basic							
		proof techniques, set algebra and Boolean algebra, recursion a	and induction.							
		rine knowledge gained will be extremely useful in upper level	of computer

5 Course
Objective Understand the fundamentals of object-oriented concept in Java, defined
classes, objects, invoking methods inheritance, interfaces and except
handling mechanisms. To develop skills in analyzing the usability of
web and understand fundamentals of tools and technology of web design.
6 Course COI: Describe the fundamental of object-oriented concept in java and web
Outcomes design.
CO2: <b>Compare</b> and contrast different features of java and web design.
CO3: <b>Develop</b> programs using core concepts of java and web development too
CO4: Analyze Exception and Error in java programs and security in web design
CO5: <b>Explain</b> the concept of inheritance, polymorphism and interfaces and we
applications.
CO6: <b>Design</b> application of real-world problem using Java and web developm
tools.
7 Course Basic Object-Oriented Programming (OOP) concepts, includ
Description objects, classes, methods, parameter passing, information hid
inheritance and polymorphism are introduced and their implementation
using Java are discussed.
8 Outline syllabus CO Mapping
Unit 1 Introduction to Object Oriented Paradigm
A Procedural Languages, object-based languages, object- CO1, CO2
oriented languages, difference between programming
paradigms, advantages of OOPs.
B Object oriented programming features: Abstraction, CO2
class, object, Encapsulation, data hiding,
polymorphism, inheritance.
Class Loader, Execution Engine, Carbage collection
Unit 2         Introduction to Jaya with class and object
A Java development Kit (IDK) Introduction to IDE CO2
for java development setting java environment
(steps for path and CLASSPATH setting)
B Constants, Variables, Data Types, Operators, CO2
Expressions, Decision Making, Branching, Loops,
command line argument
