Minutes of BOS Meeting

Date: 01st June, 2018

1. External members of BOS suggested that the following courses should be included as departmental electives:
 - a. Elevator Engineering (3-0-0)3
 - b. Six-sigma practices (3-0-0)3
 - c. Internet of Things (IoT) (3-0-0)3
2. The course of Material Science and Metrology (3-0-0)3 may be split into two separate courses, Material Science (2-0-0)2 and Metrology (0-0-2)1.
3. The external experts were of the opinion that the students after completion of 1st and 2nd year studies may not be ready to go for proper industry internship since they may not be able to derive the intended benefits. Also, the industries may not be willing to accommodate students for internship at their premature stage. It was suggested that instead of industry internship alone, we could have a bucket containing industry internship, training in industry relevant skills, etc., of at least 4 weeks duration.
4. Some suggestion for Project based learning were also given. These included:
 - a. Design and Fabrication of Experiments for teaching lab.
 - b. Small industry related projects.
5. It was recommended that instead of 2D CAD lab in the 1st term, a 3D software should be included so that training should not be on Auto-CAD 2D but on software such as Solid Works. However some experience in reading 2D drawing and imagining their 3D shapes is highly desirable.

Meeting ended with vote of thanks to the chair.

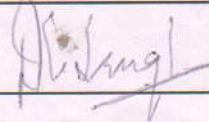

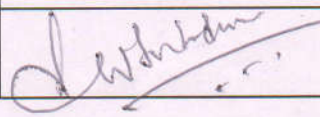

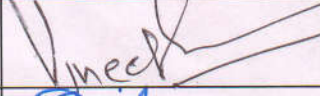

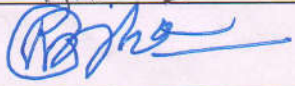

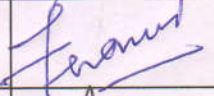

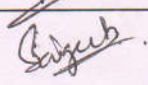

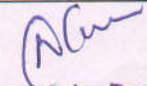

Programs wise changes in BOS 2018:

1. The total credits of programs B.Tech Mechanical Engineering, B.Tech Mechanical Engineering + M.Tech, B.Tech Mechanical Engineering + MBA, B.Tech Mechanical Engineering with specialization in Automobile Engineering and B.Tech Mechanical Engineering with specialization in Automobile Engineering + M.Tech are reduced to 160 credits for the 2018-2022 curriculum as presented in the Annexure.
2. The new program B.Tech Mechanical Engineering with specialization in Mechatronics has been introduced in 2018-2019 academic year as presented in the Annexure.
3. No changes in the curriculum of programs B.Tech Mechanical Engineering with specialization in Production and Industrial Engineering and B.Tech Mechanical Engineering with specialization in Aerospace Engineering as presented in the Annexure.
4. No much changes in the curriculum of programs M.Tech Mechanical Engineering with specialization in Production and Industrial Engineering, M.Tech Mechanical Engineering with specialization in Machine Design and B.Tech Mechanical Engineering with specialization in Fluid and Thermal Engineering as presented in the Annexure.
