Mechanical & Automobile Engineering

FOCUS AREAS: ROBOTICS AND MECHATRONICS, ADVANCED MANUFACTURING PROCESSES, AUTOMOBILE ENGINEERING, THERMAL ENGINEERING

The Department of Mechanical Engineering has modern laboratories where students, with the help of faculty members, learn and practice mechanical engineering principles having applications of design, production, industrial engineering, mechatronics and automobile engineering. The students design & fabricate vehicles and participate in national events like SAE BAJA, Auto Expo etc.

Mechatronics

Mechatronics is an emerging field which includes various engineering disciplines such as mechanical, electrical, electronics, control and computer engineering. Mechatronics provides engineers with multi-disciplinary skills. The applications of Mechatronics includes manufacturing, power systems, transportation, optical telecommunications and biomedical engineering. Industrial robot is the most appropriate example of Mechatronics system as it has electronics, mechanics, and computing to perform its daily routine.

Automobile Engineering

In Automobile Engineering students get an opportunity to learn manufacturing designing, mechanical mechanisms as well operations of automobiles through experiential learning. Student will conduct real time automotive activities at different levels such as skilling, up-skilling programmes in automobile

domain based on National Occupational Standards (NOS) to be first day job ready. They will get exposure to global & futuristic trends in automobile through lectures and training by industry experts.

Milestones

- Tinkering lab in first year (Automobile, Refrigeration and air conditioning, CNC machines) where students get an opportunity to learn real engineering by assembling and disassembling auto and refrigeration parts and hands on experience.
- Our students designed and manufactured ATV, Hybrid vehicle and Divya Sakti (vehicle for disabled and elderly people) and these projects were eye catcher in Auto Expo 2018. The students also designed Electric Sports Bike, Electric tubeless Bike and Collapsible car in Auto Expo 2020.
- Regular feature to participate in SAE-BAJA organized by Society of Automotive Engineers (SAE) by designing and manufacturing.
- Students got Acceleration Award in SAE-BAJA-INDIA-2020 and won Rs. 60000/- Prize.

Training and Placement

Placements and Summer Internships are an integral part of any University's annual calendar of activities. Sharda University has a well laid-out and systematic process of dovetailing our student career aspirations with corporate expectations. The Placement Department at Sharda University comprises of the Student Committee with 30 members from the last two years of the course and the Placement Department represented by the Placement Managers, Faculty, and Industry Professionals.

The leading companies from all sectors are invited by the Placement Department on the campus, where the eligible students are facilitated to go through the entire selection process. The entire process is governed by the student's ability and performance, as well as the requirements and norms of the Industries.

We encourage competitiveness by nurturing knowledge, entrepreneurship and creativity. We believe these strengths help us to successfully compete and exploit emerging opportunities.

Life Skills Training

We believe in an education system that looks beyond employment and concentrates on individual development by imparting "Life Skills" and enhancing life time opportunities. We spare no efforts to groom our students, not only in their chosen discipline, but also broaden their mindsets and create positive attitudes, thus equipping them with all qualities to make them an asset to whichever organization they join.

Campus Partner Programme

To bridge the gap between the theoretical and practical aspects of the curriculum, Industry and Corporate Interaction is extremely important. The Placement Department recognizes this need and addresses it through the Campus Partner programme. Regular associations and meetings with Corporate provide industry exposure to the students and enable them to pick up new skills other than what is being imparted in the classrooms.

The Placement Department offers strategic partnerships with companies and creates mutually beneficial relationships. Internships, recruitments, alumni database access and specialized short term training of the students as per the requirements of the companies, are just a few ways this goal is accomplished.
